

Contents of Volume II

Assessing the Sustainability of Polymer Products	1
Marc-Andree Wolf, Martin Baitz, and Johannes Kreissig	
Raw and Renewable Polymers	55
Seena Joseph, Maya Jacob John, Laly A. Pothen, and Sabu Thomas	
Sustainable Embedding of the Bioplastic Poly-(3-Hydroxybutyrate) into the Sugarcane Industry: Principles of a Future-Oriented Technology in Brazil	81
Martin Koller, Paula Hesse, Christoph Kutschera, Rodolfo Bona, Jeffer Nascimento, Silvio Ortega, José Augusto Agnelli, and Gerhart Braunegg	
Additives for the Manufacture and Processing of Polymers	97
Rainer Höfer and Klaus Hinrichs	
Environmental Aspects of Initiators for Plastic Manufacture and Processing	147
Maximilian Dorn	
Melt Modification of Polyamides	163
Dieter Lehmann	
Biodegradable Polymers: Properties, Possibilities, and Limits Considering the Synthesis, Processing, and Application of Poly(2-Hydroxypropionic Acid) and Poly(3-Hydroxybutyric Acid)	193
G. Schmack	
Product Design and Processing: Adhesive Technology	215
Otto-Diedrich Hennemann	
Microstructured Polymer Surfaces with Complex Optical Functions for Solar Applications	263
Benedikt Bläsi, Andreas Gombert, and Michael Niggemann	

Polymer Membranes for Sustainable Technologies 281
Jochen Meier-Haack, Martin Müller, and Klaus Lunkwitz

Index 299
