Preface to the Second Edition	XVII
Preface to the First Edition	XVII
Preface to the First German Edition	XVIII
1 Introduction	1
1.1 Why Are There Fibers and Yarns?	1
1.1.1 Tenacity and Elongation	2
1.1.2 Surface and Porosity	3
1.1.3 Mechanics of Solid Bodies and Textile Structures	4
1.2 Evolution of Textile Technology	5
1.3 Production Stages	8
1.4 Typical Products Made from Natural and Man-Made Fibers	12
1.5 Yarns	15
1.6 Textiles	15
1.7 Textile Products	18
1.8 Multiscale Model	21
1.9 Importance of the Textile Industry	22
1.10 World Trade with Textiles	25
2 Raw Materials	29
2.1 Natural Fibers	31
2.1.1 Plant Fibers	32
2.1.1.1 Cotton (CO)	32
2.1.1.2 Flax (Linen) (LI)	36
2.1.1.3 Other Bast and Hard Fibers	42

2.1.2	Animal Fibers	43
2.1.2.1	Wool (Sheep's Wool; WO) and Fine Animal Hair	43
2.1.2.2	Silk (Mulberry Silk; SE)	47
2.1.3	Mineral Fibers	49
2.2	Chemical Fibers	50
2.2.1	Manufacturing Processes	50
2.2.2	Chemical Fibers from Natural Polymers	55
2.2.2.1	Viscose Fibers (CV)	57
2.2.2.2	Lyocell Fibers (CLY)	59
2.2.2.3	Cupro Fibers (CUP)	62
2.2.2.4	Acetate Fibers (CA)	63
2.2.3	Chemical Fibers from Synthetic Polymers	66
2.2.3.1	Mechanisms for the Generation of Macromolecules	66
2.2.4	Chemical Fibers from Inorganic Raw Materials	71
2.2.4.1	Glass Fibers (GF)	71
2.2.4.2	Carbon Fibers (CF)	74
2.2.4.3	Metal Fibers (MTF)	76
2.2.5	Further Processing	78
2.2.5.1	Drawing	78
2.2.5.2	Texturing	80
2.2.5.3	Production of Staple Fibers	84
2.3	Examples	86
2.3.1	Jeans	86
2.3.2	Carpet	87
2.3.3	Airbags	89
3	Principles and Machinery for Yarn Production	95
3.1	Cotton Spinning	95
3.1.1	Spinning Preparation Machines	98
3.1.1.1	Bale Opening	98
3.1.1.2	Opening and Cleaning	99
3.1.1.3	Mixing	100
3.1.1.4	Carding	101
3.1.1.5	Draw Frames	103
3.1.1.6	Homogenization of the Sliver	105
3.1.2	Combing Room	105
3.1.2.1	Purpose of Combing	106
3.1.2.2	Combing Machine	107
3.1.3	Ring Spinning Process	109
3.1.3.1	Flyer Spinning	109
3.1.3.2	Ring Spinning	110
3.1.3.3	Compact Spinning	112

3.1.4	Nonconventional Spinning Principles	113
3.1.4.1	OE-Rotor Spinning	114
3.1.4.2	Air-Jet Spinning	116
3.1.4.3	Air False-Twist Wrap-Spinning	119
3.1.4.4	Summary of Other Nonconventional Spinning Methods	120
3.1.4.5	Comparison of the Most Important Nonconventional Spinning Methods	120
3.2	Special Spinning Methods	121
3.2.1	Carded Woolen Spinning	121
3.2.1.1	Carding	122
3.2.1.2	Nonconventional Carded Woolen Spinning	125
3.2.2	Worsted Spinning	126
3.2.2.1	Intersecting Gill Box and Chain Gill Box	128
3.2.3	Mock-Worsted Spinning	129
3.3	Development Trends	130
3.3.1	Machines for Spinning Preparation	130
3.3.2	Production of Staple Fiber Yarns with Defined Properties	131
3.3.3	Production Increase of Ring Spinning Frames	131
3.3.4	Ring/Traveler Combination	131
3.3.5	Sliver Spinning	131
3.3.6	Compact and Condensation Spinning	132
3.3.7	Process Control Engineering	132
3.4	Fineness Measurements of Fibers and Yarns	132
3.4.1	Length Numbering	133
3.4.2	Mass/Weight Numbering	133
3.5	Summary of the Measurement Systems	136
3.5.1	Spinning Preparation	136
3.5.2	Combing Room	136
3.5.3	Ring Spinning	136
3.5.4	Rotor Spinning	137
3.6	Examples	137
3.6.1	Jeans	137
3.6.2	Carpet	138
3.6.3	Airbag	138
4	Principles and Machinery for Production of Woven Fabrics ...	141
4.1	Production Principles	141
4.2	Weaving Preparation	143
4.2.1	Winding	143
4.2.2	Twisting	145
4.2.3	Preparation of the Warp Beam	147

4.2.4	Warping	147
4.2.5	Section Warping	147
4.2.6	Sizing	148
4.3	Construction of Woven Fabrics	149
4.3.1	Definitions of Woven Fabrics	149
4.3.2	Repeating Pattern	149
4.3.3	Floatation	149
4.3.4	Weave Diagram	149
4.3.5	Weave Symbol	150
4.3.6	Basic Weave Patterns	150
4.3.6.1	Plain Weave	150
4.3.6.2	Twill Weave	151
4.3.6.3	Atlas or Satin Weave	151
4.3.7	Special Weaving Techniques	152
4.3.7.1	Cord and Velveteen	152
4.3.7.2	Terry Woven	152
4.3.7.3	Two-Ply Fabric	152
4.4	Design and Principle of Weaving Looms	153
4.4.1	Warp Let-Off Systems	154
4.4.2	Machines with Eccentric Drive	156
4.4.3	Machines with Shaft Drive	156
4.4.4	Jacquard Looms	157
4.4.5	Shuttle Loom	159
4.4.6	Projectile Loom	159
4.4.7	Rapier Loom	160
4.4.8	Jet Loom	161
4.4.9	Multiphase Loom	162
4.4.10	Weft Insertion Speed	162
4.4.11	Open-Reed Weaving	163
4.5	Development Trends	165
4.6	Examples	166
4.6.1	Jeans	166
4.6.2	Carpet	167
4.6.3	Airbag	169
5	Processes and Machines for Knitwear Production	173
5.1	Knitting	175
5.1.1	Design and Structure	175
5.1.2	Loop Formation	177
5.1.2.1	Jacquard Technique	179

5.1.3	Knitting Machines	181
5.1.3.1	Flat-Bed Knitting Machines	181
5.1.3.2	Circular Knitting Machines	182
5.1.3.3	Spacer Knitting Machines	184
5.2	Warp Knitting	186
5.2.1	Design and Structure	186
5.2.2	Warp-Knitting Machines	187
5.2.2.1	Coulier Warp-Knitting Machines	188
5.2.2.2	Warp-Knitting Machines	189
5.2.2.3	Warp-Knitted Spacer Fabrics	191
5.3	Development Trends	192
5.4	Examples	193
5.4.1	Carpets	193
6	Processes and Machines for Nonwovens Production	195
6.1	Basics	195
6.2	Market	196
6.3	Raw Materials	199
6.4	Processes and Machines	200
6.4.1	Processes of Web Formation	201
6.4.1.1	Mechanical Web Formation Processes	201
6.4.1.2	Aerodynamic Web Formation Processes	205
6.4.1.3	Hydrodynamic Web Formation Processes	206
6.4.1.4	Spun-Bonded Nonwovens	207
6.4.1.4.1	Melt-Blown Process	209
6.4.1.4.2	Reifenhäuser Process	209
6.4.1.5	Market Overview	209
6.4.2	Processes of Web Consolidation	210
6.4.2.1	Web Bonding by Friction Force	210
6.4.2.1.1	Needle Punching	210
6.4.2.1.2	Hydroentangling	211
6.4.2.2	Thermal Bonding	212
6.4.2.3	Chemical Bonding	213
6.4.2.4	Stitch Bonding	214
6.4.2.5	Market Overview	214
6.4.3	Drying	215
6.4.4	Finishing	216
6.4.4.1	Processes for the Improvement of Textile Drapability ..	216
6.4.4.2	Processes for Leather Finishing	217
6.4.4.3	Heat-Sealing Coating	217
6.5	Applications	217

7 Braiding Processes and Machines	221
7.1 Classification of Braids	222
7.1.1 Pattern	223
7.2 Braiding Processes	224
7.2.1 Conventional Braiding Processes	224
7.2.1.1 Strand-Forming Braiding Machine	224
7.2.1.2 Lace Braiding Machine	226
7.2.1.3 Package Braiding Machine	226
7.2.2 Processes for the Production of 3-D Braids	227
7.2.2.1 Circular Braiding (Multilayer-Interlock Braiding or Through-the-Thickness Braiding) and Overbraiding	228
7.2.2.2 Magnaweave/Omniweave or Four-Step Braiding Processes	229
7.2.2.3 Two-Step Braiding Process	230
7.2.2.4 Further Developments of the Known Processes	231
7.2.2.5 3-D Rotary Braiding	231
7.3 2-D and 3-D Braids	233
7.4 Development Trends	236
8 Noncrimp Fabrics	239
8.1 From Warp-Knit to Multiaxial Fabric	240
8.2 Biaxial Noncrimp Fabrics	242
8.2.1 Structure	242
8.2.2 Principle	243
8.2.3 Stitch Types	244
8.3 Multiaxial Noncrimp Fabrics	244
8.3.1 Structure	245
8.3.2 Principle	245
8.4 Spacer Noncrimp Fabrics	247
8.4.1 Structure	247
8.4.2 Principle	248
8.5 Weft-Knitted NCF	249
8.5.1 Structure	249
8.5.2 Principle	249
8.6 Development Trends	250

9 Textile Finishing	253
9.1 Pretreatment	254
9.1.1 Dry Pretreatment	254
9.1.2 Wet Pretreatment	255
9.1.3 Fiber-Specific Processes	259
9.1.3.1 Cotton	259
9.1.3.2 Wool	261
9.1.3.3 Silk	263
9.2 Drying	263
9.3 Coloration	265
9.3.1 Dyeing	265
9.3.2 Printing	268
9.4 Appret	271
9.4.1 Chemical Appret	272
9.4.2 Mechanical Finishing	272
9.4.3 Thermal Finishing	273
9.5 Coating	273
9.6 Embroidery	275
9.6.1 Standard Embroidery (Sozni Stitch)	275
9.6.2 Chain Stitch Embroidery (Ari Stitch)	276
9.6.3 Tailored Fiber Placement (TFP)	276
9.7 Development Trends	278
9.8 Examples	279
9.8.1 Jeans	279
9.8.2 Carpets	279
9.8.3 Airbags	281
10 Processes and Machines for Clothing Manufacture	283
10.1 Separation	284
10.1.1 Pattern Design	284
10.1.2 Directional Orientation	285
10.1.3 Pattern Orientation	285
10.1.4 Types of Patterns	285
10.1.5 Processes for the Construction and Transfer of Patterns	286
10.1.6 Cutting	286
10.1.7 Marking	287
10.1.8 Work Preparation	287
10.2 Joining Processes	288
10.2.1 Sewing	288

10.2.1.1 Take-Up Lever	292
10.2.1.2 Thread Tightener	292
10.2.1.3 Transport	293
10.2.1.4 Seam Classification	293
10.2.2 Bonding and Setting	297
10.2.3 Welding	297
10.3 Forming	302
10.4 Automation	303
10.5 Development Trends	306
11 Technical Textiles	311
11.1 Definitions	311
11.2 Examples of Technical Textiles	312
11.2.1 Fiber-Reinforced Material (FRM)	312
11.2.1.1 Fiber-Reinforced Plastics	312
11.2.1.2 Conveyor Belts	313
11.2.1.3 Tires	314
11.2.2 Protective Textiles (Mobiltech, Protech)	316
11.2.2.1 Mobility Textiles (Mobiltech)	316
11.2.2.2 Airbags	317
11.2.2.3 Armoring of Automobiles	318
11.2.2.4 Protective Garments for Firefighters	319
11.2.3 Textiles for Civil Engineering (Buildtech)	320
11.2.3.1 Textile-Reinforced Concrete	320
11.2.3.2 Coated Textiles	323
11.2.3.3 Ecological Laboratory House of TU Dresden	324
11.2.4 Geotextiles (Geotech)	324
11.2.5 Medical Textiles (Medtech)	333
11.2.5.1 Hygiene Textiles	333
11.2.5.2 Medical Textiles	334
11.2.5.2.1 Extracorporeal Medical Textiles	335
11.2.5.2.2 Implants (Intracorporeal Textiles)	337
11.3 Development Trends	338
12 Textile Testing	343
12.1 Standards	343
12.2 Testing Chamber Climate	344
12.2.1 Determination of Testing Climate	344
12.3 Fiber Testing	346
12.3.1 Fineness (Linear Density)	346

12.3.1.1	Importance	346
12.3.1.2	Characteristic Values	346
12.3.1.3	Measuring Principles	347
12.3.2	Fiber Length	349
12.3.2.1	Staple Diagram	349
12.3.2.2	Measuring Methods	349
12.4	Yarn Testing	350
12.4.1	Fineness	350
12.4.2	Twist	351
12.4.2.1	Spun fiber Yarns	351
12.4.2.2	Filament Yarns	351
12.4.2.3	Ply-Yarns	351
12.4.3	Mechanical Properties	352
12.4.3.1	Measurement	352
12.4.4	Evenness	354
12.4.4.1	Measuring Principle	354
12.4.4.2	Diagram	355
12.4.4.3	CV Value	355
12.4.4.4	Normal Spectrogram	357
12.5	Textiles	357
12.5.1	Geometry and Design	358
12.5.1.1	Thickness	358
12.5.1.2	Length and Width	358
12.5.2	Tenacity (Stress) and Elongation (Strain)	359
12.5.3	Behavior against Water	360
12.5.3.1	Water Absorption	360
12.5.3.2	Water-Retention Capability	361
12.5.3.3	Water Repellency	361
12.6	Ready-Made Textiles	361
12.6.1	Surface Changes	362
12.6.1.1	Abrasion Resistance	362
12.6.1.2	Pilling	363
12.6.2	Behavior against Humidity and Water	364
12.6.2.1	Change of Geometric Dimensions	364
12.6.3	Colorfastness	365
12.6.3.1	Definitions	365
12.6.3.2	Gray Scale	366
12.6.3.3	Blue Scale (DIN EN ISO 105-B01 and -B02)	366
12.6.4	Fall and Drapeability	367
12.6.4.1	Measuring Methods	367

12.7	Physiology of Clothing	368
12.7.1	Heat Balance of the Human Body	368
12.7.2	Hohenstein Skin Model	370
12.7.3	Thermoregulation Model	372
12.8	Technical Textiles	372
12.8.1	Fibers	372
12.8.2	Yarns	373
12.8.3	Textiles	373
12.8.4	Composites	373
12.9	Development Trends	373
13	Disposal and Recycling of Textiles	377
13.1	Circulation of Material in the Textile Industry	378
13.1.1	Life Cycle of a Product	378
13.1.2	Economic Cycle and Waste Law	382
13.2	Material Recycling	383
13.2.1	Fiber Retrieval	383
13.2.2	Clothing	384
13.2.3	Carpets	386
13.2.4	Automotive Textiles	386
13.2.4.1	Seat Covers	386
13.2.4.2	Safety Belts	387
13.3	Processing and Treatment of Reprocessed Fibers	387
13.3.1	Preparation	387
13.3.2	Processing	389
13.4	Thermal Material Recycling	392
13.5	Depolymerization	393
13.6	Thermal Recycling	393
13.7	Environmental Issues in Textile Production	394
13.8	Development Trends	395
13.9	Examples	395
13.9.1	Jeans	395
13.9.2	Carpets	395
13.9.3	Airbags	395
14	Simulation	397
14.1	Simulation with and without Computer	397
14.2	Cost Effectiveness and Validation	398

14.3 Modeling	398
14.3.1 Types of Modeling	399
14.3.2 Expert Systems and Knowledge-Based Models	400
14.4 Analytical Simulation of Machines and Processes	402
14.4.1 Optimizing Machine Settings	403
14.4.2 Optimizing Product Quality	403
14.4.3 Simulating Yarn Production	403
14.4.4 Simulating Fabric Production	406
14.4.5 Simulating Finishing Techniques	408
14.4.6 Practical Advice	409
14.5 Numerical Simulation of Machines and Processes	409
14.5.1 Neural Networks	409
14.5.1.1 Biological Background	410
14.5.1.2 Model	411
14.5.1.3 Applications	412
14.5.1.4 Practical Advice	418
14.5.2 Genetic and Evolutionary Algorithms	418
14.5.2.1 Basics	419
14.5.2.2 Evolutionary Theory	419
14.5.2.3 Genotype and Phenotype	420
14.5.2.4 Mathematical Model	421
14.5.2.5 Applications	421
14.5.3 Fuzzy Logic	423
14.5.3.1 Basics	423
14.5.3.2 Mathematical Model	423
14.5.3.3 Applications	425
14.5.3.4 Practical Advice	426
14.6 Simulation of Yarns and Textile Structures	426
14.6.1 Yarns	426
14.6.2 Textile Structures	427
14.7 Industry 4.0: Control Systems and Cognitive Machines	428
