Invited Talk

Polarized Substructural Session Types	3
<i>Frank Pfenning and Dennis Griffith</i>	

Semantics of Programming Languages I

Synthesis of Strategies and the Hoare Logic of Angelic Nondeterminism	25
<i>Konstantinos Mamouras</i>	
An Infinitary Model of Linear Logic	41
<i>Charles Grellois and Paul-André Melliès</i>	
Game Semantics and Normalization by Evaluation	56
<i>Pierre Clairambault and Peter Dybjer</i>	
Foundations of Differential Dataflow	71
<i>Martín Abadi, Frank McSherry, and Gordon D. Plotkin</i>	

Categorical Models and Logics

States of Convex Sets	87
<i>Bart Jacobs, Bas Westerbaan, and Bram Westerbaan</i>	
A Categorical Semantics for Linear Logical Frameworks	102
<i>Matthijs Vákár</i>	
A Completeness Result for Finite λ -bisimulations	117
<i>Joost Winter</i>	
Sequent Calculus in the Topos of Trees	133
<i>Ranald Clouston and Rajeev Goré</i>	

Modal and Temporal Logics

Coalgebraic Trace Semantics via Forgetful Logics	151
<i>Bartek Klin and Jurriaan Rot</i>	
Unifying Hyper and Epistemic Temporal Logics	167
<i>Laura Bozzelli, Bastien Maubert, and Sophie Pinchinat</i>	

Concurrent, Probabilistic and Timed Systems

On the Total Variation Distance of Semi-Markov Chains	185
<i>Giorgio Bacci, Giovanni Bacci, Kim Guldstrand Larsen, and Radu Mardare</i>	
Decidable and Expressive Classes of Probabilistic Automata	200
<i>Rohit Chadha, A. Prasad Sistla, Mahesh Viswanathan, and Yue Ben</i>	
Knowledge = Observation + Memory + Computation	215
<i>Blaise Genest, Doron Peled, and Sven Schewe</i>	
Compositional Metric Reasoning with Probabilistic Process Calculi	230
<i>Daniel Gebler, Kim Guldstrand Larsen, and Simone Tini</i>	

Semantics of Programming Languages II

Fragments of ML Decidable by Nested Data Class Memory Automata	249
<i>Conrad Cotton-Barratt, David Hopkins, Andrzej S. Murawski, and C.-H. Luke Ong</i>	
Operational Nominal Game Semantics	264
<i>Guilhem Jaber</i>	
Step-Indexed Logical Relations for Probability	279
<i>Aleš Bizjak and Lars Birkedal</i>	

Automata, Games, Verification

Minimisation of Multiplicity Tree Automata	297
<i>Stefan Kiefer, Ines Marusic, and James Worrell</i>	
Robust Multidimensional Mean-Payoff Games are Undecidable	312
<i>Yaron Velner</i>	
The Cyclic-Routing UAV Problem Is PSPACE-Complete	328
<i>Hsi-Ming Ho and Joël Ouaknine</i>	
Typing Weak MSOL Properties	343
<i>Sylvain Salvati and Igor Walukiewicz</i>	

Logical Aspects of Computational Complexity

Three Variables Suffice for Real-Time Logic	361
<i>Timos Antonopoulos, Paul Hunter, Shahab Raza, and James Worrell</i>	

On Presburger Arithmetic Extended with Modulo Counting Quantifiers	375
<i>Peter Habermehl and Dietrich Kuske</i>	
Parity Games of Bounded Tree- and Clique-Width	390
<i>Moses Ganardi</i>	
 Type Theory, Proof Theory and Implicit Computational Complexity	
Programming and Reasoning with Guarded Recursion for Coinductive Types	407
<i>Ronald Clouston, Aleš Bizjak, Hans Bugge Grathwohl, and Lars Birkedal</i>	
The Computational Contents of Ramified Corecurrence	422
<i>Daniel Leivant and Ramyaa Ramyaa</i>	
On the Dependencies of Logical Rules	436
<i>Marc Bagnol, Amina Doumane, and Alexis Saurin</i>	
On the Mints Hierarchy in First-Order Intuitionistic Logic	451
<i>Aleksy Schubert, Paweł Urzyczyn, and Konrad Zdanowski</i>	
Author Index	467
