SECTION 1 Introductory overview 1

1. Guide to the book.....	3
2. Terminology	5
3. Epidemiology	9
3.1 Aetiology of disease	9
3.2 Epidemiological indicators.....	9
4. Aetiology of myofascial pain syndrome ..	13
4.1 Causative factors	13
4.2 Perpetuating factors of myofascial pain.....	15
4.3 Chronification of myofascial pain.....	15
5. The anatomy and physiology of the muscles	17
5.1 Macroscopic structure.....	17
5.2 Function	18
5.3 Neurophysiology	20
6. Pathophysiology	27
6.1 Historical development.....	27
6.2 Underlying theories of pathophysiology.....	27
6.3 Specific pathophysiology	29
6.4 The extended integrated hypothesis	31
7. The trigger point as expression of a functional disorder of the locomotor system	33
7.1 The function of the locomotor system in association with memory.....	33
7.2 Pathophysiological role of mTrP	35

8. Trigger points and myofascial pain: acupuncture points and the meridian system.....	41
8.1 Trigger points and acupuncture points.....	41
8.2 Referred pain patterns and meridians	41
8.3 Other study results.....	42
8.4 Pain and somatovisceral correlations between trigger points and acupuncture points.....	45
8.5 Summary.....	48
9. Myofascial trigger points and fascia.....	49
9.1 Anatomy: definitions	49
9.2 Biomechanical function	50
9.3 Muscle hardening (taut bands) ..	50
9.4 Fascia as a sensory organ	51
9.5 Relation to trigger points: therapeutic considerations	51
10. Fibromyalgia syndrome.....	53
10.1 Epidemiology	53
10.2 The patient's pattern of symptoms	53
10.3 Diagnosis	54
10.4 Treatment.....	55
11. Myofascial trigger points and somatoform pain	59
11.1 Introduction and clinical signs	59
11.2 Epidemiology	59
11.3 Aetiology and pathogenesis	59
11.4 Differential diagnosis	60
11.5 Therapy.....	61
11.6 Assessment of ability to work	61

12. Integrated holistic consideration of the muscles	63	19. Treatment plan for myofascial trigger point therapy.....	149
12.1 Introduction	63	19.1 Manual techniques and dry needling.....	149
12.2 Function and purpose of the muscles...	64	19.2 Extension and relaxation/stretching and detensioning.....	151
12.3 Approach using acupuncture.....	66	19.3 Functional training and ergonomics ..	155
13. Diagnosis of myofascial pain.....	69	20. Physical procedures.....	159
13.1 Principles.....	69	20.1 Ultrasound therapy	159
13.2 Questioning.....	70	20.2 Hot and cold therapy	159
13.3 Physical examination.....	77	20.3 Electrotherapy	160
13.4 Specific diagnosis of mTrPs.....	89	20.4 Cupping (baguanfa)	161
13.5 Technical examination procedures	92	20.5 Transcutaneous electrical nerve stimulation (TENS).....	162
13.6 Making a comprehensive diagnosis with instructions for treatment.....	94	20.6 Laser therapy	164
14. Differential diagnosis.....	99	20.7 Shock wave therapy	168
14.1 Differential diagnosis according to affected structure and cause	99	21. Trigger point infiltration	171
14.2 Differential diagnosis depending on distribution pattern.....	113	21.1 Indications and contraindications	171
SECTION 2 Treatment of myofascial pain 121		21.2 Injectants.....	171
15. Principles of treatment	123	21.3 Technique	175
15.1 Doctor-patient relationship	123	22. Acupuncture and related procedures.....	179
15.2 Practical advice	123	22.1 Dry needling (trigger point acupuncture)	179
15.3 Legal aspects	124	22.2 Traditional acupuncture.....	184
15.4 Keeping records	124	22.3 Kiiko Matsumoto acupuncture.....	201
16. The doctor-patient relationship in cases of chronic pain	125	22.4 Microsystem acupuncture.....	204
16.1 The patient situation and possible obstacles to treatment	125	22.5 Electrostimulation acupuncture	219
16.2 Possible errors by the doctor or therapist.....	126	22.6 Laser acupuncture	221
16.3 Solutions.....	126	22.7 Preusser gelopuncture.....	223
16.4 Quotations and stories for understanding pain.. ..	127	22.8 Tuina.....	224
17. Selection of suitable treatments.....	129	23. Complementary and alternative therapies and naturopathic treatments	233
17.1 Standard treatments	129	23.1 Definitions.. ..	233
17.2 Other (standard) treatments	130	23.2 Principles. . .	234
18. Manual therapy and physiotherapy.....	133	23.3 Treatment procedures.....	235
18.1 Dejung manual trigger point therapy .	133	23.4 Integrating CAM into multimodal pain programmes	242
18.2 Lewit treatment techniques.....	136	24. Relaxation techniques: body and mind....	245
18.3 Spray and stretch, cooling and stretching.....	142	24.1 Preliminary remarks	245
18.4 Fascia techniques for the treatment of mTrPs.....	144	24.2 Western relaxation techniques.....	246
		24.3 Eastern relaxation techniques	249
		25. Systemic pharmacotherapy.....	253
		25.1 Introduction	253

25.2	Substance groups	253	28.11	M. teres major.....	342
25.3	Treatment plan.....	258	28.12	M. subscapularis	345
SECTION 3 Muscles and trigger points		261	28.13	MM. rhomboidei major and minor ...	348
26.	Head.....	263	28.14	M. coracobrachialis	351
26.1	Headaches.....	263	28.15	M. biceps brachii.....	354
26.2	Stomatognathic system	264	28.16	M. brachialis.....	357
26.3	M. masseter.....	268	28.17	M. triceps brachii (with M. anconeus) ..	360
26.4	M. temporalis	271	29.	Elbow, forearm and hand.....	365
26.5	M. pterygoideus medialis.....	274	29.1	Functional associations.....	365
26.6	M. pterygoideus lateralis.....	276	29.2	Psychosomatic associations.....	365
26.7	M. digastricus	279	29.3	Symptoms	366
26.8	M. stylohyoideus	281	29.4	Diagnostic and therapeutic considerations.....	366
26.9	M. mylohyoideus	282	29.5	Function examination for mTrP identification	366
26.10	M. geniohyoideus	284	29.6	Hand extensors	367
27.	Neck and shoulder region	287	29.7	M. brachioradialis	373
27.1	Functional associations..	287	29.8	Finger extensors.....	377
27.2	Psychosomatic associations.....	288	29.9	M. supinator.....	380
27.3	Symptoms.....	288	29.10	M. palmaris longus	383
27.4	Diagnostic and therapeutic considerations.....	289	29.11	Hand and finger flexors in the forearm.....	386
27.5	Functional testing for mTrP identification	290	29.12	M. adductor and opponens pollicis	392
27.6	M. splenius capitis.....	293	30.	Thoracic spine and thorax	397
27.7	M. splenius cervicis	295	30.1	Functional associations.....	397
27.8	Muscles of the cervical M. erector trunci.....	298	30.2	Psychosomatic associations.....	397
27.9	Suboccipital muscles	303	30.3	Symptoms	398
27.10	M. sternocleidomastoideus.....	307	30.4	Diagnostic and therapeutic considerations.....	399
27.11	MM. scaleni	310	30.5	Examination for trigger point identification	399
27.12	M. trapezius.....	314	30.6	Thoracic autochthonous back extensors	402
27.13	M. levator scapulae	318	30.7	M. pectoralis major... ..	407
28.	Shoulder and upper arm.....	321	30.8	M. pectoralis minor	411
28.1	Functional associations	321	30.9	M. sternalis	414
28.2	Psychosomatic associations	322	30.10	M. serratus posterior superior.....	416
28.3	Symptoms.....	322	30.11	M. serratus anterior..	419
28.4	Diagnostic and therapeutic considerations.....	322	30.12	M. serratus posterior inferior	422
28.5	Examination to identify mTrPs.....	323	31.	Abdomen.....	427
28.6	M. deltoideus	327	31.1	Functional associations.....	427
28.7	M. supraspinatus	330	31.2	Psychosomatic associations.....	427
28.8	M. infraspinatus.....	334	31.3	Symptoms	428
28.9	M. teres minor	337			
28.10	M. latissimus dorsi.....	339
