| - Vorwort von Farokh Master zur zweiten Auflage ..... | 9  |
| - Danksagung .....                                    | 11 |

## TEIL I – THEORIE

|                                                                                                                                 |    |
|---------------------------------------------------------------------------------------------------------------------------------|----|
| - Einleitung .....                                                                                                              | 14 |
| - Verhaltensstörungen .....                                                                                                     | 15 |
| - Die Kunst und Wissenschaft homöopathischer Pädiatrie .....                                                                    | 20 |
| - Die Fallaufnahme .....                                                                                                        | 22 |
| - Beobachtung von Neugeborenen, Säuglingen und Kleinkindern .....                                                               | 24 |
| - Körperliche Untersuchung .....                                                                                                | 31 |
| - Wie unterscheidet sich die homöopathische Anamnese und körperliche Untersuchung eines Kindes von der eines Erwachsenen? ..... | 45 |
| - Markierungspunkte und Warnsignale in der kindlichen Entwicklung .....                                                         | 46 |
| - Verdacht auf Zerebralparese .....                                                                                             | 47 |
| - Klinisch-diagnostische Untersuchung .....                                                                                     | 47 |
| - Punkte, an die man denken sollte .....                                                                                        | 47 |
| - Wie man mit Neugeborenen richtig umgeht .....                                                                                 | 49 |

## TEIL II – ARZNEIMITTELLEHRE

|                                      |    |                                         |     |
|--------------------------------------|----|-----------------------------------------|-----|
| - Abelsonia* .....                   | 54 | - Androctonus ammureuxi hebraeus* ..... | 90  |
| - Abrotanum .....                    | 55 | - Anisum stellatum* .....               | 91  |
| - Adenosinum monophosphoricum* ..... | 58 | - Anthemis nobilis* .....               | 92  |
| - Aethusa cynapium .....             | 59 | - Antimonium crudum .....               | 93  |
| - Agaricus muscarius .....           | 66 | - Antimonium tartaricum .....           | 102 |
| - Agathis australis* .....           | 75 | - Antipyrinum* .....                    | 114 |
| - Agraphis nutans* .....             | 77 | - Apis mellifica .....                  | 115 |
| - Ailanthus glandulosa* .....        | 78 | - Apium graveolens* .....               | 123 |
| - Alcoholus* .....                   | 79 | - Aranea diadema* .....                 | 124 |
| - Aloe socotrina* .....              | 80 | - Aranea ixobola .....                  | 125 |
| - Alumen* .....                      | 81 | - Arbutus menziesii* .....              | 128 |
| - Ambra grisea .....                 | 82 | - Argemone mexicana* .....              | 129 |
| - Ammonium bromatum* .....           | 87 | - Arsenicum album .....                 | 130 |
| - Amphisbaena vermicularis* .....    | 88 | - Artemisia vulgaris* .....             | 146 |
| - Anantherum muricatum* .....        | 89 | - Asa foetida* .....                    | 147 |

|                                   |     |                                    |     |
|-----------------------------------|-----|------------------------------------|-----|
| - Asarum europaeum* .....         | 148 | - Cina maritima .....              | 320 |
| - Atrax robustus* .....           | 149 | - Cinnabaris* .....                | 328 |
| - Atropinum sulphuricum* .....    | 150 | - Coccus cacti* .....              | 329 |
| - Aurum metallicum.....           | 151 | - Coffea cruda.....                | 330 |
| - Bacillium Burnett .....         | 159 | - Colibacillum* .....              | 335 |
| - Badiaga* .....                  | 164 | - Copaiva officinalis* .....       | 336 |
| - Baptisia tinctoria* .....       | 165 | - Corallium rubrum* .....          | 337 |
| - Barium carbonicum .....         | 166 | - Crotalus cascavella* .....       | 338 |
| - Barium muriaticum* .....        | 176 | - Cuprum metallicum .....          | 339 |
| - Barium phosphoricum.....        | 177 | - Cypripedium pubescens* .....     | 351 |
| - Barium sulphuricum .....        | 179 | - Desoxyribonucleicum acidum* .... | 352 |
| - Belladonna.....                 | 184 | - Diphtherinum* .....              | 353 |
| - Bellis perennis* .....          | 195 | - Diphtherotoxinum* .....          | 354 |
| - Benzoicum acidum* .....         | 196 | - Elaps corallinus** .....         | 355 |
| - Bismuthum subnitricum* .....    | 197 | - Elaterium* .....                 | 365 |
| - Borax veneta .....              | 198 | - Equisetum hyemale* .....         | 366 |
| - Bovista lycoperdon* .....       | 206 | - Eucalyptus globulus* .....       | 367 |
| - Bromium* .....                  | 207 | - Ferrum aceticum* .....           | 368 |
| - Bryonia alba.....               | 208 | - Ferrum metallicum.....           | 369 |
| - Bufo rana.....                  | 218 | - Filix mas* .....                 | 376 |
| - Calcium aceticum* .....         | 234 | - Flavus* .....                    | 377 |
| - Calcium bromatum* .....         | 235 | - Flor de piedra* .....            | 378 |
| - Calcium carbonicum .....        | 236 | - Folliculinum** .....             | 379 |
| - Calcium causticum* .....        | 247 | - Gambogia* .....                  | 384 |
| - Calcium hypophosphoricum* ..... | 248 | - Graphites .....                  | 385 |
| - Calcium lacticum* .....         | 249 | - Hecla lava* .....                | 390 |
| - Calcium muriaticum.....         | 250 | - Hedera helix* .....              | 391 |
| - Calcium phosphoricum .....      | 252 | - Heloderma suspectum* .....       | 392 |
| - Calcium picricum* .....         | 260 | - Hippomanes* .....                | 393 |
| - Calcium silicatum .....         | 261 | - Hyoscyamus niger.....            | 394 |
| - Capsicum .....                  | 267 | - Ictodes foetida* .....           | 405 |
| - Carcinosinum .....              | 272 | - Ignatia amara.....               | 406 |
| - Castoreum canadense* .....      | 278 | - Indigo tinctoria* .....          | 417 |
| - Causticum .....                 | 279 | - Iodoformium* .....               | 418 |
| - Chamomilla.....                 | 289 | - Jaborandi* .....                 | 419 |
