Abstract

Zusammenfassung

Project outline

Summary and thesis outline

Chapter I :	General introduction	1
Aims of the current research		
Chapter II:	The bacterial mobilome in different environmental habitats:	32
Cultivation-independent screening revealed hot spots of IncP-1.		
IncP-7 and IncP-9 plasmid occurrence		
Chapter III:	Bacterial community shifts and increase in abundance of IncP-1	52
plasmids in response to linuron application in an on-farm		
biopurification system		
Chapter IV:	Shifts in abundance and diversity of mobile genetic elements to	83
diverse pesticides introduced into an on-farm biopurification		
system over a year		
Chapter V:	Response of the bacterial community in an on-farm	103
biopurification system to diverse pesticides introduced over an		
agricultural season		
Chapter VI:	Conclusions and main findings	122
