 - 3.1 Process and Data Flow Overview 49
 - 3.2 Capture Demand History 50
 - 3.2.1 Data Flow Overview 50
 - 3.2.2 Processing of the Demand History 54
 - 3.3 Manage Demand History 61
- 4 Stocking Decision 67**
 - 4.1 Process Overview 67
 - 4.2 Replenishment Indicator 68
 - 4.3 Rules and Decision Tables 71
 - 4.4 Stocking and De-Stocking Service and Approval 77

5	Forecasting	81
5.1	Process Overview	81
5.2	Planning Book, Forecast Profile and Forecast Service	84
5.2.1	Planning Book for Forecasting	84
5.2.2	Forecast Profile	89
5.2.3	Forecast Service	94
5.3	Model Evaluation	97
5.3.1	Historical Forecast	97
5.3.2	Tracking	101
5.3.3	Tripping	105
5.4	Model Selection and Parameter Tuning	107
5.4.1	Model Selection	107
5.4.2	Parameter Tuning	109
5.5	Calculation of the Forecast	110
5.5.1	Forecast Horizons	110
5.5.2	Forecast Model Overview	111
5.5.3	Standard Deviation	121
5.5.4	Outlier Correction	121
5.6	Forecast Approval	123
5.7	Life Cycle Planning	125
5.7.1	Phase-In Forecasting	125
5.7.2	Phase-Out Forecasting	127
5.8	Leading Indicator Based Forecasting	129
5.8.1	Process Overview	129
5.8.2	Basic Settings and Prerequisites	131
5.8.3	Determination of the History of the Leading Indicator	133
5.8.4	Determination of the Forecast of the Leading Indicator and the Relevant Service Parts	136
6	Economic Order Quantity and Safety Stock	139
6.1	Process Overview	139
6.2	Economic Order Quantity and Safety Stock	140
6.2.1	Economic Order Quantity	140
6.2.2	Safety Stock	143
6.2.3	Interdependency of EOQ, Safety Stock and TSL	145
6.2.4	EOQ and Safety Stock Planning Service	147
6.3	Planning Book for Inventory Planning	151
6.4	Additional Services	153
6.4.1	Deployment Indicator Determination	153
6.4.2	ABC Classification	153

7	Surplus and Obsolescence Planning	155
7.1	Process Overview	155
7.2	Surplus Quantity Determination	157
7.2.1	Overview and Common Steps	157
7.2.2	Surplus Quantity Determination for Current Model Part	159
7.2.3	Surplus Quantity Determination for Past Model Part	161
7.3	Surplus Disaggregation	164
7.4	Surplus Approval	166
7.5	Obsolescence Check	169
8	Distribution Requirements Planning	171
8.1	Process Overview	171
8.2	DRP Logic	173
8.2.1	DRP Matrix	173
8.2.2	Forecast Versus Customer Requirements	181
8.2.3	Rounding to Days of Supply	183
8.2.4	Fixed Requirements	185
8.3	Scheduling	186
8.4	Horizons	193
8.5	Stability Rules	196
8.6	DRP Features for Seasonality	204
8.6.1	Anticipated Demand Coverage	204
8.6.2	Pre-season Safety Stock Shift	207
8.7	Procurement Planning	209
8.7.1	Sourcing	209
8.7.2	Product Group Procurement	210
8.7.3	Supplier Shutdown	214
8.8	DRP Service	216
8.9	Repair or Buy Planning	218
8.9.1	Process Overview	218
8.9.2	Repair or Buy Planning Logic	223
8.10	Kit to Stock Planning	234
8.10.1	Overview	234
8.10.2	Kit to Stock Planning Logic and Parameters (Determinants)	236
8.11	Reorder Point-Based Planning	240
9	Procurement Approval	249
9.1	Process Overview	249
9.2	Approval Rules	252
9.3	Procurement Approval Service	253
9.4	Mass Approval	254
9.5	Interactive Approval in the Schedule Board	256
9.6	Release Creation	257
9.7	Procurement Execution	258

10	Deployment	265
10.1	Process Overview	265
10.2	Pull Deployment and Push Deployment	267
10.2.1	Difference Between Pull and Push Deployment	267
10.2.2	Event Driven Quantity Assignment	270
10.3	Available Quantity and Demands for Deployment	272
10.4	Priority Tiers, Fair Share and Sequence Rules	277
10.5	Push Deployment from Supplier	284
10.6	Multi-level-Deployment	295
10.6.1	Multi-level Push Deployment	295
10.6.2	Multi-level Tier Processing	302
10.7	Express Shipments	308
10.8	Deployment Simulation	309
10.9	Stock Transfer Approval	313
10.10	Stock Transfer Execution	314
10.11	Scheduling	316
11	Inventory Balancing	325
11.1	Process Overview	325
11.2	Inventory Balancing Area	327
11.3	Excess and Need Determination	330
11.4	Cost and Benefit Analysis	333
11.4.1	Cost and Benefit Analysis Overview	333
11.4.2	Inventory Savings	334
11.4.3	Warehouse Space Savings	335
11.4.4	Service Benefit	337
11.4.5	Move Costs	340
11.5	Inventory Balancing Services	340
11.6	Inventory Balancing Stock Transfer Approval	341
12	Interchangeability	343
12.1	Process Overview of Supersession	343
12.2	Interchangeability Master	345
12.3	Supersession Service	351
12.4	Realignment for Supersession	364
12.5	Stocking/De-Stocking with Supersession	365
12.6	DRP with Supersession	365
12.7	Deployment with Supersession	368
12.8	Inventory Balancing with Supersession	370
12.9	Interchangeability with FFF-Classes	370
13	Sales Order Fulfilment	377
13.1	Process Overview	377
13.2	Sales Order Taking	378
13.2.1	Basic Sales Configuration for SAP CRM™	378
13.2.2	Sales Order Taking in SAP CRM™	380

13.3 ATP Check 382

13.4 Processing of Unchecked Deliveries 385

13.5 Goods Issue 385

14 Monitoring and Reporting 391

14.1 Monitoring and Reporting Overview 391

14.2 Planner’s and Customer’s Worklist 392

14.2.1 Overview of Planner’s and Customer’s Worklist 392

14.2.2 Action Required Queries in Planner’s Worklist 394

14.2.3 Alert Queries in Planner’s Worklist 396

14.2.4 Monitoring Queries in Planner’s Worklist 398

14.2.5 Customer’s Worklist and its Queries 400

14.2.6 Configuration of Worklists 402

14.3 Shortage Monitor 410

14.4 Alert Monitor 414

14.5 SPP Cockpit 419

14.6 Product Detail 421

14.7 Reporting 423

15 Original Equipment Manufacturer Managed Inventory 427

15.1 OEM MI Process 427

15.2 Master Data for OEM MI 430

15.3 Capture and Manage Demand for OEM MI 432

15.4 Inventory Planning for OEM MI 437

15.5 Forecasting for OEM MI 437

15.6 DRP for OEM MI 437

15.7 Deployment and Inventory Balancing for OEM MI 440

15.8 Supersession for OEM MI 443

16 Outlook 445

16.1 Current and Future Improvements: “Customer Connection”
Programs 445

16.2 SPP on HANA 446

16.3 SPP and EIS 447
