1. Steel – the material for today and tomorrow.	2	6. Steel casting processes	79	8.7 Steel parting techniques	128
1.1 Innovations in steel	2	6.1 Continuous casting	80	8.8 Steel joining techniques	128
1.2 Fundamentals.	5	<i>The continuous casting process</i>	81	<i>Welding</i>	129
1.3 The various grades of steel.	9	<i>Types of continuous casting plant.</i>	82	<i>Adhesive bonding</i>	132
<i>Standardized classification</i>	9	<i>Automation.</i>	83	<i>Mechanical joining</i>	133
<i>Nomenclature systems for steels.</i>	10	<i>Near-net-shape casting</i>	84	8.9 Coatings and barrier layers for the protection of steel against corrosion.	134
<i>Steel names</i>	10	<i>Horizontal continuous casting</i>	88	<i>Organic coatings</i>	135
<i>Steel numbers</i>	12	6.2 Ingot casting.	88	<i>Inorganic coatings</i>	137
<i>Steel groups.</i>	12	6.3 Spray forming.	89	<i>Metallic coatings</i>	138
2. Raw materials for the production of iron and steel	16	7. Iron and steel castings	90	<i>Conversion coatings</i>	141
2.1 Iron ores	16	7.1 Cast iron	90	8.10 Heat treatment of steel	143
<i>Types of iron ore</i>	17	<i>Lamellar graphite cast iron.</i>	90	<i>Annealing</i>	144
<i>Quality requirements and the assessment of ores</i>	18	<i>Spheroidal graphite cast iron.</i>	91	<i>Hardening</i>	144
<i>Pre-treatment of the ores.</i>	20	<i>Vermicular graphite cast iron.</i>	91	<i>Tempering</i>	145
2.2 Scrap.	24	<i>Malleable cast iron.</i>	91	<i>Quenching and tempering</i>	145
2.3 Reducing agents	25	7.2 Cast steel	91	<i>Controlled cooling</i>	145
2.4 Fluxes	26	8. The forming of steel.	93	9. Materials testing	146
2.5 Refractories	26	8.1 The basics of steel rolling.	93	9.1 Overview	146
3. Routes to steel	28	<i>Deformation</i>	93	9.2 Test methods	148
3.1 Blast furnace – converter route	28	<i>Rolling</i>	94	10. Quality management	159
<i>Coke metallurgy</i>	28	8.2 Rolled steel products	97	11. Plant management.	161
<i>Coal metallurgy</i>	29	8.3 Rolling mill facilities.	101	12. Driving sustainability through efficient resource utilization, environmental protection and energy management	164
3.2 The electric arc furnace route	29	<i>Rolling stands</i>	101	<i>Steel's contribution to climate protection.</i>	164
<i>DRI metallurgy</i>	29	<i>Rolling stand terminology</i>	101	<i>Sustainable production</i>	165
<i>Scrap metallurgy</i>	30	<i>Rolling mill rolls</i>	103	<i>The steel cycle</i>	166
3.3 Secondary metallurgy	30	<i>Rolling mills</i>	103	<i>Multi-recycling in the life cycle analysis.</i>	167
3.4 Special developments	30	<i>Rolling trains</i>	104	<i>Retention of material quality</i>	168
4. Reduction of iron ores.	31	<i>Dressing and finishing department.</i>	106	<i>Slags and other by-products</i>	168
4.1 Hot metal production.	31	8.4 Production stages in the hot-rolling of steel	107	<i>Dusts and sludges</i>	169
<i>Blast furnace plant</i>	31	<i>Rolling of semi-finished products</i>	107	<i>Energy</i>	169
<i>Processes within the blast furnace</i>	35	<i>Rolling of finished products</i>	107	<i>CO₂ emissions</i>	170
<i>Products of the blast furnace.</i>	38	8.5 Other steel forming processes.	112	<i>Air pollution control</i>	171
<i>Material and mass balance of the blast furnace</i>	39	<i>Manufacture of seamless steel tube</i>	112	<i>Social and economic aspects of sustainability.</i>	172
<i>Process control</i>	39	<i>Manufacture of welded steel tube</i>	113	<i>Summary</i>	173
<i>Future prospects</i>	40	<i>Forging and pressing</i>	114	13. The uses of steel	175
4.2 Direct reduction processes	41	<i>Open-die forging</i>	114	13.1 Huge range of applications.	175
<i>Gas reduction processes</i>	42	<i>Radial-axial ring rolling.</i>	118	13.2 Mobility	177
<i>Solid-state reduction processes</i>	45	<i>Closed-die forging</i>	120	13.3 Building construction	183
4.3 Smelting reduction processes	48	<i>Extrusion</i>	120	13.4 Power engineering.	195
4.4 Hot metal pre-treatment	52	<i>Press-hardening.</i>	120	13.5 Machinery, plant and equipment.	197
5. Steelmaking	53	8.6 The cold-forming of steel	121	13.6 Medical engineering	202
5.1 Charge materials	53	<i>Cold-rolling</i>	121	13.7 Everyday things and lifestyle choices	204
5.2 Oxygen steelmaking	54	<i>Integration of pickling line and tandem mill</i>	124	13.8 Steel in art.	205
5.3 Electric steelmaking	61	<i>Manufacture of tailor-rolled blanks (flexible rolling)</i>	124	14. A brief history of iron and steelmaking	209
5.4 The open-hearth process	69	<i>Bright steel.</i>	124	Chart: Steelmaking routes	219
5.5 Secondary metallurgy	69	<i>Slip-drawing of hollow sections.</i>	127		
5.6 Future prospects	75	<i>Other methods of cold-forming steel (examples)</i>	127
