

Contents

1	General introduction	7
1.1	Anticipatory action control.....	7
1.1.1	Effect anticipations.....	8
1.1.2	Start anticipations	11
1.1.3	Action perception	16
1.2	The cognitive architecture of complex movements	18
1.2.1	Sensorimotor control and representation (levels I and II)	19
1.2.2	Mental representation and mental control (levels III and IV)	19
1.2.3	The structure of mental representations	20
1.3	Open issues	21
1.4	Research questions and structure of the thesis	22
1.5	References	25
2	Motor expertise modulates the unconscious processing of human body postures	31
2.1	Introduction	32
2.2	Experiment 1	35
2.2.1	Methods and materials.....	35
2.2.2	Results	38
2.3	Discussion	40
2.4	References	43
3	Priming of future states in complex motor skills	45
3.1	Introduction	46
3.2	Experiment 2.....	48
3.2.1	Methods and materials.....	49
3.2.2	Results and discussion	50
3.3	Experiment 3.....	53
3.3.1	Methods and materials.....	54
3.3.2	Results and discussion	54
3.4	General discussion	57
3.5	References	59

4	Athletes and novices are differently capable to recognize feint and non-feint actions	61
4.1	Introduction	62
4.2	Experiment 4	64
4.2.1	Methods and materials	66
4.2.2	Results	68
4.2.3	Discussion	70
4.3	Experiment 5	71
4.3.1	Methods and materials	71
4.3.2	Results	73
4.3.3	Discussion	74
4.4	General discussion	75
4.5	References	77
5	How an athlete reads unconscious stimuli: Masked priming of complex movements	79
5.1	Introduction	80
5.2	Experiment 6	82
5.2.1	Methods and materials	83
5.2.2	Results	85
5.2.3	Discussion	88
5.3	Experiment 7	88
5.3.1	Methods and materials	89
5.3.2	Results	90
5.3.3	Discussion	94
5.4	General discussion	96
5.5	References	98
6	General discussion	101
6.1	General discussion	101
6.1.1	High jump studies	101
6.1.2	Studies on feint actions	106
6.2	Conclusion	110
6.3	Outlook	111
6.4	References	112
7	Summary	115
8	The Author	119
