

Contents

1	Introduction	1
	Esther Lubzens, Joan Cerdà, and Melody S. Clark	
2	Akinetes: Dormant Cells of Cyanobacteria	5
	Ruth N. Kaplan-Levy, Ora Hadas, Michael L. Summers, Jacqueline Rücker, and Assaf Sukenik	
3	<i>Saccharomyces cerevisiae</i> Spore Germination	29
	Cecilia Geijer, Daphna Joseph-Strauss, Giora Simchen, Naama Barkai, and Stefan Hohmann	
4	Dormancy in Plant Seeds	43
	Henk W.M. Hilhorst, William E. Finch-Savage, Julia Buitink, William Bolingue, and Gerhard Leubner-Metzger	
5	Bud Dormancy in Perennial Plants: A Mechanism for Survival	69
	James V. Anderson, David P. Horvath, Wun S. Chao, and Michael E. Foley	
6	LEA Proteins: Versatility of Form and Function	91
	Alan Tunnacliffe, Dirk K. Hincha, Olivier Leprince, and David Macherel	
7	A Role for Molecular Studies in Unveiling the Pathways for Formation of Rotifer Resting Eggs and Their Survival During Dormancy	109
	Nadav Y. Denekamp, Koushirou Suga, Atsushi Hagiwara, Richard Reinhardt, and Esther Lubzens	

8	Anhydrobiotic Abilities of Tardigrades	133
	Ralph O. Schill	
9	Cryoprotective Dehydration: Clues from an Insect	147
	M. Roger Worland, Gordana Grubor-Lajšić, Jelena Purać, Michael A.S. Thorne, and Melody S. Clark	
10	A Molecular Overview of Diapause in Embryos of the Crustacean, <i>Artemia franciscana</i>	165
	Zhijun Qiu and Thomas H. MacRae	
11	An Exploratory Review on the Molecular Mechanisms of Diapause Termination in the Waterflea, <i>Daphnia</i>	189
	Evelyne Vanvlasselaer and Luc Meester	
12	Metabolic Dormancy and Responses to Environmental Desiccation in Fish Embryos	203
	Jason E. Podrabsky, Angèle Tingaud-Sequeira, and Joan Cerdà	
13	Mammalian Hibernation: Physiology, Cell Signaling, and Gene Controls on Metabolic Rate Depression	227
	Kenneth B. Storey, Gerhard Heldmaier, and Mark H. Rider	
14	Lessons from Natural Cold-Induced Dormancy to Organ Preservation in Medicine and Biotechnology: From the “Backwoods to the Bedside”	253
	Barry Fuller, Edgardo Guibert, and Joaquín Rodríguez
