Abstract/Ubersicht	iii
Nomenclature	iv
1 Introduction	1
2 Experimental setup	9
2.1 Flow models	10
2.1.1 Straight vessel	11
2.1.2 Stenotic vessel	11
2.1.3 Curved vessel	12
2.2 Experimental facility	13
2.3 Static pressure and piston path acquisition	15
2.4 Particle-Image Velocimetry	16
2.4.1 Stereoscopic PIV	18
2.4.2 PIV setup	18
2.4.3 Configuration of the straight vessel experiments	19
2.4.4 Configuration of the stenotic vessel experiments	19
2.4.5 Configuration of the curved vessel experiments	22
2.5 Vessel wall detection and wall-shear stress calculation	23
2.5.1 Straight vessel	24
2.5.2 Stenotic vessel	25
2.5.3 Curved vessel	25
2.6 Data acquisition and synchronization	26
3 Straight vessels	29
3.1 Flow parameters	29
3.2 Results	31
3.2.1 Introductory discussion	31
3.2.2 Fluid-structure interaction	36
3.2.3 Comparison of elastic and rigid pipe flow	48
3.3 Summary	58
4 Stenotic vessel	59
4.1 Flow parameters	59

4.2	Results	60
4 2 1	Oscillating flow field	60
4 2 2	Static pressure	60
4.2.3	Structure mechanical response	64
4 2 4	Wall-shear stress	65
4.3	Summary	70
5	180°curved vessel	73
5.1	Flow Parameter	73
5.2	Results	74
5.2 1	Steady velocity distribution	74
5 2 2	Unsteady velocity distribution	75
5 2.3	Fluid-structure interaction	78
5.3	Summary	85
6	Summary and Conclusions	87
	References	90
	Appendix	97
A	Vessel geometries	97
