Contents

1 Introduction 1

2 Planning the Technical Report 5
  2.1 General overview of all required work steps 5
  2.2 Accepting and analyzing the task 6
  2.3 Checking or creating the title 7
  2.4 The structure as the "backbone" of the Technical Report 10
    2.4.1 General information about structure and table of contents 11
    2.4.2 Rules for the structure in ISO 2145 12
    2.4.3 Logic and formal design of document part headings 13
    2.4.4 Work steps to create a structure and example structures 16
    2.4.5 General structure patterns for Technical Reports 22
  2.5 Project notebook (jotter) 26
  2.6 The style guide advances consistency in wording and design 26

3 Writing and creating the Technical Report 29
  3.1 Parts of the Technical Report and their layout 30
    3.1.1 Front cover sheet and title leaf 31
    3.1.2 Structure with page numbers = Table of Contents (ToC) 37
    3.1.3 Text with figures, tables, and literature citations 43
    3.1.4 List of references 45
    3.1.5 Other required or useful parts 46
  3.2 Collecting and ordering the material 51
  3.3 Creating good tables 53
    3.3.1 Table design 54
    3.3.2 Table numbering and table headings 58
    3.3.3 The morphological box – a *special* table 61
    3.3.4 Hints for evaluation tables 66
    3.3.5 Tabular re-arrangement of text 69
  3.4 Instructional figures 70
    3.4.1 Understandable design of instructional figures 73
    3.4.2 Figure numbering and figure subheadings 77
    3.4.3 Photo, photocopy, digital photo, scan and image from the internet 81
    3.4.4 Using graphics software and CAD programs 86
    3.4.5 Scheme and diagram (chart) 89
    3.4.6 The sketch as simplified drawing and illustration of computations 99

3.7.5 Text editing with OpenOffice Writer ... 172
3.8 Creating slides with presentation graphics programs ... 175
3.8.1 Slide creation with PowerPoint ... 175
3.8.2 Slide creation with Open Office Impress ... 178
3.9 Completion of the Technical Report ... 179
3.9.1 The report checklist assures quality and completeness ... 179
3.9.2 Proof-reading and text correction according to ISO 5776 ... 181
3.9.3 Creating and printing the copy originals and end check ... 186
3.9.4 Exporting the Technical Report to HTML or PDF for publication ... 189
3.9.5 Copying, binding or stapling the Technical Report and distribution ... 191

4 Useful behavior for working on your project and writing the Technical Report 201
4.1 Working together with the supervisor or customer ... 201
4.2 Working together in a team ... 203
4.3 Advice for working in the library ... 204
4.4 Organizing your paperwork ... 205
4.5 Organizing your file structure and back-up copies ... 207
4.6 Personal working methodology ... 210

5 Presenting the Technical Report 215
5.1 Introduction 215
5.1.1 Target areas university and industrial practice 215
5.1.2 What is it all about? 216
5.1.3 What is my benefit? 216
5.1.4 How do I proceed? 217
5.2 Why presentations? 218
5.2.1 Definitions 218
5.2.2 Presentation types and presentation targets 219
5.2.3 "Risks and side effects" of presentations and lectures 220
5.3 Planning the presentation 222
5.3.1 Required work steps and their time consumption 222
5.3.2 Step 1: Defining the presentation framework and target 224
5.3.3 Step 2: Material collection 229
5.3.4 Step 3: The creative phase 229
5.4 Creating the presentation 235
5.4.1 General recommendations for designing presentation slides 236
5.4.2 Step 4: Summarizing the text and working out the details 241
5.4.3 Step 5: Visualization and manuscript 243
5.4.4 Step 6: Trial presentation and changes 256
5.4.5 Step 7: Updating the presentation and preparations in the room 257
5.4.6 Step 8: Lecture, presentation 259
5.5 Giving the presentation 259
5.5.1 Contact preparations and contacting the audience 259
5.5.2 Creating a relationship with the audience 260
5.5.3 Appropriate pointing 261
5.5.4 Dealing with intermediate questions 262
5.6 Review and analysis of the presentation 263
5.7 57 Rhetoric tips from A to Z 266
