Part I Behavioral Neurobiology of Huntington's Disease

Clinical Aspects of Huntington's Disease	3
Rhia Ghosh and Sarah J. Tabrizi	
The Neuropathology of Huntington's Disease	33
Henry J. Waldvogel, Eric H. Kim, Lynette J. Tippett, Jean-Paul G. Vonsattel and Richard LM Faull	
Neurobiology of Huntington's Disease	81
Rebecca A.G. De Souza and Blair R. Leavitt	
Mouse Models of Huntington's Disease	101
Simon P. Brooks and Stephen B. Dunnett	
Transgenic Rat Models of Huntington's Disease	135
João Casaca Carreira, Ali Jahanshahi, Dagmar Zeef, Ersoy Kocabicak, Rinske Vlamings, Stephan von Hörsten and Yasin Temel	
Large Animal Models of Huntington's Disease	149
Xiao-Jiang Li and Shihua Li	
Therapeutic Strategies for Huntington's Disease	161
Ladislav Mrzljak and Ignacio Munoz-Sanjuan	

Part II Behavioral Neurobiology of Parkinson's Disease

Clinical and Pathological Features of Parkinson's Disease	205
Susanne A. Schneider and Jose A. Obeso	

Symptomatic Models of Parkinson's Disease and L-DOPA-Induced Dyskinesia in Non-human Primates	221
Tom M. Johnston and Susan H. Fox	
Neuroinflammation in Parkinson's Disease Animal Models: A Cell Stress Response or a Step in Neurodegeneration?	237
Carolina Cebrián, John D. Loike and David Sulzer	
Viral Vector-Based Models of Parkinson's Disease	271
Anke Van der Perren, Chris Van den Haute and Veerle Baekelandt	
Transgenic Rodent Models to Study Alpha-Synuclein Pathogenesis, with a Focus on Cognitive Deficits	303
Asa Hatami and Marie-Francoise Chesselet	
Modeling LRRK2 Pathobiology in Parkinson's Disease: From Yeast to Rodents	331
Guillaume Daniel and Darren J. Moore	
Models of Multiple System Atrophy	369
Lisa Fellner, Gregor K. Wenning and Nadia Stefanova	
Index	395
