

Table of Contents

Large Scale Systems

A Scalable MPI_Comm_split Algorithm for Exascale Computing	1
<i>Paul Sack and William Gropp</i>	
Enabling Concurrent Multithreaded MPI Communication on Multicore Petascale Systems	11
<i>Gábor Dózsa, Sameer Kumar, Pavan Balaji, Darius Buntinas, David Goodell, William Gropp, Joe Ratterman, and Rajeev Thakur</i>	
Toward Performance Models of MPI Implementations for Understanding Application Scaling Issues	21
<i>Torsten Hoefer, William Gropp, Rajeev Thakur, and Jesper Larsson Träff</i>	
PMI: A Scalable Parallel Process-Management Interface for Extreme-Scale Systems	31
<i>Pavan Balaji, Darius Buntinas, David Goodell, William Gropp, Jayesh Krishna, Ewing Lusk, and Rajeev Thakur</i>	
Run-Time Analysis and Instrumentation for Communication Overlap Potential	42
<i>Thorvald Natvig and Anne C. Elster</i>	
Efficient MPI Support for Advanced Hybrid Programming Models	50
<i>Torsten Hoefer, Greg Bronevetsky, Brian Barrett, Bronis R. de Supinski, and Andrew Lumsdaine</i>	

Parallel Filesystems and I/O

An HDF5 MPI Virtual File Driver for Parallel In-situ Post-processing	62
<i>Jerome Soumagne, John Biddiscombe, and Jerry Clarke</i>	
Automated Tracing of I/O Stack	72
<i>Seong Jo Kim, Yuanrui Zhang, Seung Woo Son, Ramya Prabhakar, Mahmut Kandemir, Christina Patrick, Wei-keng Liao, and Alok Choudhary</i>	
MPI Datatype Marshalling: A Case Study in Datatype Equivalence	82
<i>Dries Kimpe, David Goodell, and Robert Ross</i>	

Collective Operations

Design of Kernel-Level Asynchronous Collective Communication	92
<i>Akihiro Nomura and Yutaka Ishikawa</i>	
Network Offloaded Hierarchical Collectives Using ConnectX-2s CORE-Direct Capabilities	102
<i>Ishai Rabinovitz, Pavel Shamis, Richard L. Graham, Noam Bloch, and Gilad Shainer</i>	
An In-Place Algorithm for Irregular All-to-All Communication with Limited Memory	113
<i>Michael Hofmann and Gudula Rünger</i>	

Applications

Massively Parallel Finite Element Programming	122
<i>Timo Heister, Martin Kronbichler, and Wolfgang Bangerth</i>	
Parallel Zero-Copy Algorithms for Fast Fourier Transform and Conjugate Gradient Using MPI Datatypes	132
<i>Torsten Hoefer and Steven Gottlieb</i>	
Parallel Chaining Algorithms	142
<i>Mohamed Abouelhoda and Hisham Mohamed</i>	

MPI Internals (I)

Precise Dynamic Analysis for Slack Elasticity: Adding Buffering without Adding Bugs	152
<i>Sarvani Vakkalanka, Anh Vo, Ganesh Gopalakrishnan, and Robert M. Kirby</i>	
Implementing MPI on Windows: Comparison with Common Approaches on Unix	160
<i>Jayesh Krishna, Pavan Balaji, Ewing Lusk, Rajeev Thakur, and Fabian Tillier</i>	
Compact and Efficient Implementation of the MPI Group Operations . . .	170
<i>Jesper Larsson Träff</i>	
Characteristics of the Unexpected Message Queue of MPI Applications	179
<i>Rainer Keller and Richard L. Graham</i>	

Fault Tolerance

Dodging the Cost of Unavoidable Memory Copies in Message Logging Protocols	189
<i>George Bosilca, Aurelien Bouteiller, Thomas Herault, Pierre Lemarinier, and Jack J. Dongarra</i>	
Communication Target Selection for Replicated MPI Processes	198
<i>Rakhi Anand, Edgar Gabriel, and Jaspal Subhlok</i>	
Transparent Redundant Computing with MPI	208
<i>Ron Brightwell, Kurt Ferreira, and Rolf Riesen</i>	
Checkpoint/Restart-Enabled Parallel Debugging	219
<i>Joshua Hursey, Chris January, Mark O'Connor, Paul H. Hargrove, David Lecomber, Jeffrey M. Squyres, and Andrew Lumsdaine</i>	

Best Paper Awards

Load Balancing for Regular Meshes on SMPs with MPI.....	229
<i>Vivek Kale and William Gropp</i>	
Adaptive MPI Multirail Tuning for Non-uniform Input/Output Access	239
<i>Stéphanie Moreaud, Brice Goglin, and Raymond Namyst</i>	
Using Triggered Operations to Offload Collective Communication Operations	249
<i>K. Scott Hemmert, Brian Barrett, and Keith D. Underwood</i>	

MPI Internals (II)

Second-Order Algorithmic Differentiation by Source Transformation of MPI Code	257
<i>Michel Schanen, Michael Förster, and Uwe Naumann</i>	
Locality and Topology Aware Intra-node Communication among Multicore CPUs	265
<i>Teng Ma, George Bosilca, Aurelien Bouteiller, and Jack J. Dongarra</i>	
Transparent Neutral Element Elimination in MPI Reduction Operations	275
<i>Jesper Larsson Träff</i>	

Poster Abstracts

Use Case Evaluation of the Proposed MPIT Configuration and
Performance Interface 285
Carsten Clauss, Stefan Lankes, and Thomas Bemmerl

Two Algorithms of Irregular Scatter/Gather Operations for
Heterogeneous Platforms 289
Kiril Dichev, Vladimir Rychkov, and Alexey Lastovetsky

Measuring Execution Times of Collective Communications in an
Empirical Optimization Framework 294
Katharina Benkert and Edgar Gabriel

Dynamic Verification of Hybrid Programs 298
*Wei-Fan Chiang, Grzegorz Szubzda, Ganesh Gopalakrishnan, and
Rajeev Thakur*

Challenges and Issues of Supporting Task Parallelism in MPI 302
*Márcia C. Cera, João V.F. Lima, Nicolas Maillard, and
Philippe O.A. Navaux*
