

Table of Contents

Chapter One: Introduction	1
Chapter Two: Beliefs	3
Decisions About Beliefs	4
Origins of Beliefs: I	5
Persistence of Beliefs	6
Origins of Beliefs: II	17
Chapter Three: Philosophy	18
Radical Skepticism	19
The Burden of Proof	21
Three Assumptions Underlie Almost All Claims to Knowledge	22
Chapter Four: The Four Pillars of Knowledge	25
Chapter Five: Kant's Pillar: A Priori Knowledge	26
Chapter Six: Pillar 2: Religious Faith	28
The Origins of Religious Faith	29
A Few Strange Religious Beliefs	31
Religious Faith Is Beneficial	32
Digression—Maybe Not So Beneficial	34
Faith (of Others) Is Very Beneficial to Some	36
Religious Leaders Have God's Cell Phone Number	36
Maybe They Had a Bad Connection	37

Other People also Get Messages from God	39
Points to Ponder	40
The Persistence of Religious Faith	42
Chapter Seven: Leavitt Lied	46
Chapter Eight: Introduction to Pillars 3 and 4	47
Chapter Nine: Pillar 3: Reasoning	48
Human Reasoning Is Imperfect	49
Evolution and Reasoning	52
Inductive Arguments	54
Counter-Induction	57
Inductive Inferences Are Ambiguous	58
Formal Logic—Deductive Arguments	59
Quiz	61
Conclusions Often Come First	63
We'll Never Know If Our Tools of Reasoning Lead to	
Valid Conclusions	64
Anything Can Be Proved	65
Quantum Logic	66
Reason Doesn't Tell about The World	67
Chapter Ten: Reason and Science in Opposition	68
Chapter Eleven: Pillar 4: Empiricism	73
Knowledge That Comes from Direct Sensory Experiences	74
Scientific Research on Perception	75
Empiricists Fight Back—Unsuccessfully	75
Our Low Fidelity Memories	78
"Knowledge" That Comes from Other Sources	80
Deception: Personal, Historic, Journalistic, Governmental,	
Corporate, Scientific	80
Motives to Deceive	82
Means	83
Opportunity	84
Drugs	84
Electrical Stimulation of the Brain	85
Natural Selection	85
Secret Experiments?	87
Individuals	88
N-1 Automatons: Not Exactly a Hypothetical Scenario	90
Self-Deception	91
Corporate	92

Governmental	93
Journalistic	95
Historical	96
Censorship	99
Major Conspiracies	99
Deception—A New Dimension	100
Science	102
Scientists May Unconsciously Bias Results or Commit	
Deliberate Fraud	102
Honest Science	107
The Basic Observations May Be Wrong	107
Miniscule Changes in Initial Conditions May Produce	
Huge Changes in Ultimate Observations	107
The Data May Not Be Replicable	110
Biomedical	110
The Data May Have Been Analyzed Incorrectly	111
Observations Reported in Scientific Publications May Differ	
Considerably from Equally Careful Observations over	
the Same Material That Go Unpublished	114
The Media Distorts the Public's Views of Scientific Findings	115
Inferences: Part I	115
Hard Sciences	116
Quantum Mechanics	117
The Single- and Double-Slit Experiment	119
Unstable Elements and Watched Pots	120
Aharonov-Bohm Effect	120
Pigeonholes and Pigeons	121
Quantum Eraser	121
Delayed-Choice	121
Interpretations	122
The Most Profound Discovery in the History of Science	124
Many Worlds	125
Beyond Quantum Mechanics	126
Chapter Twelve: Reason and Science in Almost One Voice	127
Chapter Thirteen: Inferences: Part II	129
Mathematics, Science, and Everyday Life	129
Chapter Fourteen: Recapitulation	132
Chapter Fifteen: Certainty, Likelihood, and Probability	134
Chapter Sixteen: Reasons for Resistance	138

Resistance Is Futile	141
A Priorists	143
Non-Deductivists	143
Pragmatists	144
Transcendentalists	144
Vindicationists	144
Conjecturalists	144
Chapter Seventeen: Conclusions	146
Solipsism	146
Free Will—Maybe	148
Purpose—Avoid	151
But There Is No God—Maybe	151
Afterlife—Maybe	152
On the Positive Side	157
Questions You'll Probably Never be Able to Answer	157
Worldviews of Prominent Physicists and Philosophers	157
Keep on Trucking	158
Epilogue	159
Appendices	160
Appendix 1: Predictions and Proclamations by Experts	160
Appendix 2: Wealth of Religious Leaders	161
Appendix 3: Sex Crimes of Religious Leaders	162
Appendix 4: Fraud and Other Crimes	164
Appendix 5: Murder in God's Name	165
Appendix 6: Unethical Research Studies	167
Appendix 7: Mostly Harmless Deceptions	170
Appendix 8: Unethical Corporate Behavior	172
Appendix 9: Lies and Distortions of Politicians	175
Appendix 10: Journalistic Fraud	176
Appendix 11: Examples from Project Censored	178
Appendix 12: Major Conspiracies	180
Appendix 13: Scientific Fraud and Other Forms of Misconduct	183
Appendix 14: Facts, Hypotheses, and Theories That at One Time	
Were Widely Accepted by Mainstream Scientists	185
Appendix 15: Bell's Proof	188
Notes	190
Chapter 2. Beliefs	190
Chapter 3. Philosophy	192

Chapter 5. Kant's Pillar: A Priori Knowledge	192
Chapter 6. Religious Faith	192
Chapter 9. Pillar Three: Reasoning	193
Chapter 11. Pillar Four: Empiricism	194
Chapter 12. Reason and Science in Almost One Voice	198
Chapter 13. Inferences: Part II	199
Chapter 15. Certainty, Likelihood, and Probability	199
Chapter 16. Reasons for Resistance	200
Chapter 17. Conclusions	200
Appendices	201
Index	202
