

Contents

Preface — V

1 Introduction — 1

- 1.1 Readers previous knowledge of ISPF — 1
- 1.2 Using this book — 1
- 1.3 Screens, source codes, JCL and other displays — 1
- 1.4 Labeling of important tips — 2
- 1.5 Citations from other publications — 2
- 1.6 IBM glossary — 2
- 1.7 z/OS basic information — 2
- 1.8 ISPF reference books — 4
- 1.8.1 ISPF books for ISPF users — 5
- 1.8.2 ISPF books for ISPF application programmers — 6
- 1.9 TSO reference books — 6
- 1.10 The ISPF services — 6
- 1.11 Working with ISPF — 7
- 1.12 ISPF interaction — 8
- 1.13 The 3270 screen — 8
- 1.13.1 3270 screen layout — 9
- 1.13.2 The full screen technology — 9
- 1.14 The ISPF online help facility — 9
- 1.14.1 Call the online help facility — 10
- 1.14.2 Overview of all commands and functions of ISPF — 10
- 1.14.3 Description of the DSLIST command — 12
- 1.15 ISPF sub-systems — 12
- 1.15.1 SDSF – System Display and Search Facility — 13
- 1.15.2 IBM Data Set Commander for z/OS — 13
- 1.15.3 File Manager for z/OS — 14
- 1.15.4 MVS/QuickRef — 15
- 1.16 Information sources — 15

2 Technical basics — 17

- 2.1 Data sets — 17
- 2.1.1 Allocation of data sets — 17
- 2.1.2 Naming conventions for data set names — 17
- 2.1.3 The relevance of qualifiers — 18
- 2.1.4 Data set types — 19
- 2.1.5 Other data set types — 23
- 2.1.6 Concatenated data sets basics — 23
- 2.1.7 Partitioned concatenated data sets — 24
- 2.1.8 Sequential concatenated data sets — 26
- 2.1.9 Abbreviations concerning data sets — 27

3	The TSO/ISPF logon process — 29
3.1	The logon procedure — 29
3.2	TSO start and the user logon process in detail — 30
3.3	ISPF start — 33
3.3.1	Necessary ISPF libraries — 33
3.3.2	Display currently existing library structures — 34
3.3.3	ISPF table service data sets — 35
3.3.4	The user profile library ISPPROF — 36
3.3.5	Contents of ISPF profile library — 38
3.3.6	The ISPF start command — 38
3.3.7	The initial logon procedure XYZLOGON — 39
3.3.8	Rules how a logon procedure may end — 40
3.3.9	The private logon procedure SLOGON — 40
3.3.10	Example of a LOGON procedure — 41
3.4	The SLOGON procedure of the SMART ISPF utilities — 42
3.4.1	Install the SLOGON procedure — 43
4	Customize ISPF — 47
4.1	Available 3270 screen formats — 47
4.2	ISPF options setting — 47
4.3	The ISPF settings panel (Selection 0) — 47
4.4	Panels and their handling — 50
4.5	The structure of ISPF panels — 50
4.5.1	Using HELP panels — 51
4.6	The primary option menu — 53
4.7	Screen splitting — 55
4.7.1	Essential rules and tips for split screen — 55
4.7.2	Direct activation of an ISPF logical screen — 56
4.7.3	Example, with eight logical screens of ISPF — 56
4.8	The program function keys of ISPF — 58
4.8.1	Optimize PF key settings — 58
4.8.2	Switching on the PF key setting display — 59
4.8.3	Utilize KEYLISTs for PF keys — 61
4.8.4	Display the PF key assignment in a KEYLIST — 61
4.8.5	PF keys use without using KEYLIST — 63
5	ISPF command tables — 67
5.1	Execute programs in a TSOP/ISPF environment — 67
5.1.1	Online execution — 68
5.1.2	Batch execution — 69
5.2	Introduction to the ISPF command technology — 71
5.2.1	The member ISPCONF — 73
5.2.2	Datasets for command tables — 74
5.2.3	Creating your own ISPF commands — 76

5.3	Program SICMD — 78
5.3.1	Edit ISPF commands using SICMD — 79
5.3.2	Display the list of all standard ISPF commands — 81
5.3.3	Define the call of SICMD as command — 81
5.3.4	Generating a list of commands — 82
6	DSLISL – Data set lists — 85
6.1	The DSLISL panel — 86
6.2	The possibilities of the action bar for DSLISLs — 86
6.3	The DSLISL panel fields — 89
6.4	DSLISL panel processing — 93
6.4.1	The DSLISL primary commands — 94
6.4.2	The commands MEMBER and SRCHFOR — 95
6.4.3	DSLISL line commands — 97
6.4.4	DSLISL settings — 100
6.4.5	Examples of the data set list settings — 102
6.5	Personal data set lists — 105
6.5.1	Creating personal data set lists — 106
6.5.2	Call DSLISLs — 108
6.6	Entering the DSLISL command with the name of a DSLISL — 109
6.6.1	Entering the DSLISL command without parameters — 110
6.6.2	Using the volume serial field — 111
6.7	DSLISL optimal use with command tables — 112
6.7.1	Organization and naming conventions — 112
6.7.2	Call DSLISLs using the ISPF command table — 113
7	The Object/Action Workplace — 115
7.1	The ISPF workplace panel — 116
7.1.1	Calling the workplace via the command table — 116
7.1.2	Operation of the workplace panel — 117
7.1.3	Action commands in the workplace panel — 118
7.2	Examples of workplace operation — 119
8	The ISPF editor — 123
8.1	Table of EDIT primary commands — 123
8.2	Table of EDIT line commands — 128
8.3	Displaying and maintaining an edit profile — 130
8.3.1	Setting EDIT options with EDSET/EDITSET — 130
8.3.2	EDIT profile settings and their use — 132
8.4	Colored code for EDIT and VIEW — 135
8.4.1	Colored code - what is it? — 135
8.4.2	Setting the colored code — 136
8.4.3	Uniform last level qualifier — 139
8.5	Edit recovery — 139
8.6	The UNDO function — 141

8.7	Turn the UNDO function on and off —	141
8.8	FIND and CHANGE —	143
8.8.1	Definition of search operands —	143
8.8.2	Definition of simple search texts —	145
8.8.3	Definition of special search texts —	146
8.9	Exclude —	149
8.10	SHIFT and OVERLAY —	150
8.10.1	Example one for using OVERLAY —	151
8.10.2	Example two for using OVERLAY —	154
8.11	CUT and PASTE —	159
8.11.1	Data transport via the clipboard of the PC system —	159
8.11.2	Data transport via the ISPF clipboard —	159
9	Utilities for allocated data sets —	165
9.1	DDLST – Description and call —	165
9.2	DDLST operation —	167
9.3	Find a member —	168
9.4	Free a data set allocation —	169
9.5	Warning when inconsistent data set structures exist —	170
9.6	The display options SHORT and LONG —	171
9.7	Display system library chains —	173
9.7.1	Display of parmlib member ALLOCxx —	174
9.7.2	Display the LINKLIST chain —	176
9.7.3	Browsing storage and loaded modules —	177
10	Secret Programs —	179
10.1	The TSO command CONCATD —	179
10.2	Program ISRDSLST —	182
10.3	The TASID program —	185
11	The SMART ISPF utilities —	187
11.1	Naming conventions —	187
11.2	The dynamic panel concept —	187
11.3	List of programs —	188
11.4	Program descriptions —	189
11.4.1	Edit macro ## —	190
11.4.2	Edit macro #ALTXT —	190
11.4.3	Edit macro #EDMEM —	190
11.4.4	Edit macro #IMACROA —	190
11.4.5	Edit macro #IMACRO1 —	191
11.4.6	Edit macro #IMACRO2 —	192
11.4.7	Edit macro #ISPFb —	193
11.4.8	Edit macro #LCH —	193
11.4.9	Edit macro #SPLJ —	193
11.4.10	Edit macro #SSS —	194

11.4.11	Edit macro #SSSCH —	194
11.4.12	Edit macro #SU —	194
11.4.13	Edit macro #TSOB —	195
11.4.14	Edit macro #VERASE —	196
11.4.15	Program SCURSOR —	196
11.4.16	Program SDOC —	197
11.4.17	Program SLE —	197
11.4.18	Data member SLOGDSN —	199
11.4.19	Program SLOGON —	200
11.4.20	Program SPROFEDT —	200
11.4.21	ISPF variables load member SPROFVAR —	200
11.4.22	Program SSC —	201
11.4.23	Program SSS —	202
11.5	Installation of SMART ISPF utilities —	203
11.5.1	Download and unzip —	203
11.5.2	Installation —	204
11.5.3	ALTLIB command —	205
11.5.4	Make the SMART ISPF utilities ready to run —	208

List of screens — 211

List of programs — 213

List of tables — 213

List of JCL — 213

Bibliography — 215

Index — 217
