

Table of Contents

Invited Speakers

A False History of True Concurrency: From Petri to Tools (Abstract) . . . <i>Javier Esparza</i>	1
How Far Can Enterprise Modeling for Banking Be Supported by Graph Transformation? <i>Christoph Brandt and Frank Hermann</i>	3

Session 1. Graphs and Logic

Graph Transformation Units Guided by a SAT Solver <i>Hans-Jörg Kreowski, Sabine Kuske, and Robert Wille</i>	27
Delaying Constraint Solving in Symbolic Graph Transformation <i>Fernando Orejas and Leen Lambers</i>	43
A Dynamic Logic for Termgraph Rewriting <i>Philippe Balbiani, Rachid Echahed, and Andreas Herzig</i>	59

Session 2. Behavioural Analysis

A New Type of Behaviour-Preserving Transition Insertions in Unfolding Prefixes <i>Victor Khomenko</i>	75
On the Computation of McMillan's Prefix for Contextual Nets and Graph Grammars <i>Paolo Baldan, Alessandro Bruni, Andrea Corradini, Barbara König, and Stefan Schwoon</i>	91
Verification of Graph Transformation Systems with Context-Free Specifications <i>Barbara König and Javier Esparza</i>	107
Saturated LTSs for Adhesive Rewriting Systems <i>Filippo Bonchi, Fabio Gadducci, Giacomina Valentina Monreale, and Ugo Montanari</i>	123
A Hoare Calculus for Graph Programs <i>Christopher M. Poskitt and Detlef Plump</i>	139

Session 3. Models and Model Transformation

Formal Analysis of Functional Behaviour for Model Transformations Based on Triple Graph Grammars.....	155
<i>Frank Hermann, Hartmut Ehrig, Fernando Orejas, and Ulrike Golas</i>	
Conflict Detection for Model Versioning Based on Graph Modifications.....	171
<i>Gabriele Taentzer, Claudia Ermel, Philip Langer, and Manuel Wimmer</i>	
A Component Concept for Typed Graphs with Inheritance and Containment Structures	187
<i>Stefan Jurack and Gabriele Taentzer</i>	
Combining Termination Criteria by Isolating Deletion	203
<i>Dénes Bisztray and Reiko Heckel</i>	

Session 4. Algebraic Foundations

Graph Rewriting in Span-Categories.....	218
<i>Michael Löwe</i>	
Finitary $\mathcal{M}$ -Adhesive Categories	234
<i>Benjamin Braatz, Hartmut Ehrig, Karsten Gabriel, and Ulrike Golas</i>	
Hereditary Pushouts Reconsidered	250
<i>Tobias Heindel</i>	

Session 5. Applications

Graph Transformation for Domain-Specific Discrete Event Time Simulation	266
<i>Juan de Lara, Esther Guerra, Artur Boronat, Reiko Heckel, and Paolo Torrini</i>	
Counterpart Semantics for a Second-Order μ -Calculus	282
<i>Fabio Gadducci, Alberto Lluch Lafuente, and Andrea Vandin</i>	
Declarative Mesh Subdivision Using Topological Rewriting in MGS	298
<i>Antoine Spicher, Olivier Michel, and Jean-Louis Giavitto</i>	
A Model for Distribution and Revocation of Certificates	314
<i>Åsa Hagström and Francesco Parisi-Presicce</i>	

Session 6. Rule Composition

Local Confluence for Rules with Nested Application Conditions	330
<i>Hartmut Ehrig, Annegret Habel, Leen Lambers, Fernando Orejas, and Ulrike Golas</i>	
Multi-Amalgamation in Adhesive Categories	346
<i>Ulrike Golas, Hartmut Ehrig, and Annegret Habel</i>	
Amalgamating Pushout and Pullback Graph Transformation in Collagories	362
<i>Wolfram Kahl</i>	

Doctoral Symposium

ICGT 2010 Doctoral Symposium (Introduction)	379
<i>Andrea Corradini and Maarten de Mol</i>	
EMF Model Transformation Based on Graph Transformation: Formal Foundation and Tool Environment	381
<i>Enrico Biermann</i>	
Recognizable Graph Languages for the Verification of Dynamic Systems	384
<i>Christoph Blume</i>	
Stochastic Modelling and Simulation of Dynamic Resource Allocation	388
<i>Adwoa Donyina</i>	
Bisimulation Theory for Graph Transformation Systems	391
<i>Mathias Hülsbusch</i>	
Realizing Impure Functions in Interaction Nets	394
<i>Eugen Jiresch</i>	
Composite EMF Modeling Based on Typed Graphs with Inheritance and Containment Structures	397
<i>Stefan Jurack</i>	
Formal Modeling and Analysis of Communication Platforms Like Skype Based on Petri Net Transformation Systems	400
<i>Tony Modica</i>	
LTS Semantics for Process Calculi from Their Graphical Encodings	403
<i>Giacoma Valentina Monreale</i>	
Automated Assistance for Search-Based Refactoring Using Unfolding of Graph Transformation Systems	407
<i>Fawad Qayum</i>	

Correctness of Graph Programs Relative to HR^+ Conditions 410
 Hendrik Radke

Static Type Checking of Model Transformation Programs 413
 Zoltán Ujhelyi

Using Graph Transformations and Graph Abstractions for Software
Verification 416
 Eduardo Zambon

Author Index 419
