

# Contents

## Part I Introduction

- The Chemokine System in Experimental and Clinical Hematology** ..... 3  
Øystein Bruserud and Astrid Olsnes Kittang

## Part II Experimental Hematology

- Chemokine Decoy Receptors: Structure–Function  
and Biological Properties** ..... 15  
Raffaella Bonecchi, Benedetta Savino, Elena M. Borroni,  
Alberto Mantovani, and Massimo Locati

- Role of Chemokines in the Biology of Natural Killer Cells** ..... 37  
Azzam A. Maghazachi

- Chemokines in Angiogenesis** ..... 59  
Anna Dimberg

## Part III Immunobiology of Allogeneic Stem Cell Transplantation

- Genetic Polymorphisms in the Cytokine and Chemokine System:  
Their Possible Importance in Allogeneic Stem Cell Transplantation** ..... 83  
Juergen Loeffler, Michael Ok, Oliver C. Morton, Markus Mezger,  
and Hermann Einsele

- The Chemokine System: A Possible Therapeutic Target  
in Acute Graft Versus Host Disease** ..... 97  
Nicolai A. Kittan and Gerhard C. Hildebrandt

**Homing in on Acute Graft vs. Host Disease: Tissue-Specific  
T Regulatory and Th17 Cells ..... 121**  
Brian G. Engelhardt and James E. Crowe Jr

**Part IV Clinical Hematology**

**The Chemokine Network in Acute Myelogenous Leukemia:  
Molecular Mechanisms Involved in Leukemogenesis  
and Therapeutic Implications ..... 149**  
Astrid Olsnes Kittang, Kimberley Hatfield, Kristoffer Sand,  
Håkon Reikvam, and Øystein Bruserud

**CXCR4 in Clinical Hematology ..... 173**  
Gary Calandra, Gary Bridger, and Simon Fricker

**Immunobiology of Heparin-Induced Thrombocytopenia ..... 193**  
Per Morten Sandset

**Index ..... 203**
