Session 1: Materials, Semi-Finished Products and Composite Structures for Lightweight Design

Carbon fibre-reinforced thermoplastic semi-finished products for high-performance applications C. Zopp, W. Stenbeck, D. Schultze, L. Kroll, S. Nendel, D. Nestler	15
Technology demonstration of continuous orbital winding process R. Wallasch, R. Tirschmann, M. Spieler, W. Nendel, L. Kroll, O. Rohde, S. Nendel, H.-J. Heinrich	23
Reinforcement of injection-molded parts using 3D-embroidery technology M. Walther, A. Bauer, M. Heinrich	31
Functionalized braids as potential solution for high performance CFRP structures C. Metzner, A. Gessler, J. Kaufmann, L. Kroll	37
Large scale production of contour-based and load-conforming material efficient thermo-plastic tapes using warp knitting technology for textile preforming processes T. Ruder, V. Sankaran, S. Rittner, Ch. Cherif	45
Woven fiber reinforced poly(hydroxybutyrate-co-bhydroxyvalerate)-base composites: effect of processing techniques S. Wongmanee, R. Dangtungee, L. Kroll, S. Siengchin	53
Integration of polyimide foils into hybrid fiber-reinforced laminates with varying thermoplastic matrices D. Wett, D. Nestler, G. Wagner, C. Zopp, L. Kroll, S. Nendel	63
Development and application of a high-strength integration zone between FRP and metal parts F. Riedel, D. Landgrebe, M. Puschmann, G. Töberling, D. Mattheß, T. Lampke, Th. Lindner	65
Tunable interphase composition of polymer interconnections by use of <i>in situ</i> twin polymerization and functional polymers S. Spange, M. Göring, K. Trommler, K. Schreiter, I. Roth, S. Anders, T. Lampke, A. Wagenführ, W. Nendel, L. Kroll	73
Heat-conductive CFRP with low-resistance junctions A. Saillard, J. Danchin, B. Thomas, M. Villière, B. Bourouga, D. Delaunay	75
Plasma electrolytic polishing of metalized carbon fibers F. Böttger-Hiller, K. Nestler, H. Zeidler, C. Loeser, G. Glowa, T. Lampke	81
Natural fibers reinforced components for interior of cars W. Klusmeier, O. Becker	85
Natural unidirectional sheet for fibre reinforced bioplastics A.-A. Ouali, R. Rinberg, W. Nendel, L. Kroll, C. Siegel, B. Buchelt, A. Wagenführ, K. Trommler, K. Schreiter, R. John, A. Richter, S. Spange	91

Polypropylene/hemp woody core fiber composites: effect of aspect ratio and modification	
C. Ngaowthong, S. Pinmanee, V. Rungsardthong, S. Siengchin, L. Kroll	99
New composites from bio-based polyamide with short fibers for lightweight structures	
N. Anton, S. Volfson, R. Rinberg, T. Hartmann, L. Kroll	109

Session 2: Processing, Systems and Application for Mass Production of Lightweight Structures

Efficient injection molding processes for the serial production of continuous fiber reinforced parts	
G. P. Holzinger, M. Würtele, S. Schierl, S. Kruppa	119
Re-design of an automotive front-end in full thermoplastic hybrid composite	
R. Giusti, A. Costa, A. Bicego, G. Lucchetta	127
Precision machining of multi-material sheets by water jet cutting	
M. Putz, A. Rennau, M. Dix	137
Logistics planning for merged production processes of hybrid components	
M. Thurm, A. Merkel, E. Müller	145
New Potentials of lightweight structures for extrusion and thermoset products – Appliances of reinforcements from short to endless fibers	
J. Liebhold	151
Production and application potentials of hybrid components	
A. Albert, W. Zorn, W.-G. Drossel, D. Raithe, W. Nendel	157
Scoring concept for fibre reinforced composites used in mass production car bodies	
D. Hofbauer, K. Gustke, J. Kaufmann, U. Götze, A. Schmidt	165
Development of a handling system for multi-layer textile-foil-stacks	
M. Dudczig, M. Hübner, Ch. Paul, Ch. Cherif	175
Characterization of shape memory alloy wires integrated into lightweight structures	
B. Senf, W.-G. Drossel, A. Bucht, C. Elibol, M. F.-X. Wagner	181
Smart high performance conveyor chain made of plastics	
C. Rohne, M. Schreiter, J. Sumpf, K. Nendel, W. Nendel, L. Kroll	189
Open Hybrid LabFactory – The lightweight campus Wolfsburg	
A. Plath, F. Eichleiter, B. Morabito, K. Dilger, K. Dröder, T. Vietor, A. Gross	195
DigitPro – Digital prototype build-up using the example of a braided structure	
J. Dittmann, P. Böhler, D. Michaelis, M. Vinot, C. Liebold, F. Fritz, H. Finckh, P. Middendorf	201

Integrated sensors for structural health and crash monitoring in carbon fiber reinforced polymers	
H. Christof, L. Klein, E. Frank, E. Giebel, S. Küppers, L. Müller, K. Bahroun, M. Buchmeiser, G. T. Gresser, P. Middendorf	211

Session 3: Modelling and Simulation of Hybrid Structures and their Production Processes

Efficient simulation, optimization, and validation of lightweight structures	
S. Hannusch, R. Herzog, M. Hofmann, J. Ihlemann, L. Kroll, A. Meyer, F. Ospald, G. Rünger, R. Springer, M. Stockmann, L. Ulke-Winter	219
Computational modeling of polyurethane foam expansion for lightweight sandwich structures	
D. Niedziela, I. Ireka, K. Schäfer, J. Tröltzsch, Fr. Helbig, K. Steiner, L. Kroll	229
Fully anisotropic material laws for fiber-reinforced thermoplastics	
N. Goldberg, J. Ihlemann, L. Kroll, N. Schramm, M. Schneider	237
Auxetic structures with the aim of compensation of thermal dilatations	
M. Putz, G. Schmidt, C. Hochmuth, U. Semmler, F. Siciliano	245

Session 4: Smart Systems Integration

Fluidic actuators in composite structures: design, manufacturing, and life cycle-related evaluation	
M. Schueller, M. Lipowski, E. Schirmer, M. Walther, C. Symmank, A. Schmidt, L. Kroll, T. Geßner, U. Götze	257
Remote ice detection on rotor blades of wind turbines	
T. D. Großmann, M. Gaitzsch, M. Hartwig, M. Heinrich, C. Symmank, A. Schmidt, S. Kurth, T. Gessner, R. R. Baumann, L. Kroll, U. Götze	265
Printed functionalities in hybrid laminates	
D. J. Nestler, H. Jung, M. Trautmann, B. Wielage, G. Wagner, T. Seider, J. Martin, T. Otto, T. Gessner, F. Ebert, H. Illing-Günther, K. Nendel, A. Böddicker, U. Fügmann, A. Hübler	273
Development, analyses and verification testing of a hybrid fiber optic system for deflection and damage detection of morphing wing structures	
M. Scheerer, Z. Djinic, M. Tomic	281
Towards giant piezoresistance – Process improvements for highly sensitive CNTbased-sensors	
S. Böttger, S. Hermann, S. E. Schulz	287
Preliminary investigations of processing impact on microelectronic devices by injection moulding technology	
P. Nossol, J. Schaufuss, A. Tsapkolenko, F. Rost, B. Arnold, L. Kroll, J. Mehner, T. Gessner	293

Poster Contributions

Process-oriented interface design for hybrid metal-plastic composites S. Anders, M. Göring, A. Schuberth, M. Birkner, G. Töberling, T. Lindner, K. Schreiter, D. Nickel, I. Roth, L. Kroll, S. Spange 305	305
ARENA2036 – Integration of energy storage and transmission systems into a CFRP floor module K. Bahroun, E. Giebel, L. Klein, S. Küppers, S. Zuleger 309	309
Utility properties modification of large-size constructional moulded pieces made of polycarbonate with glass fibers M. Bieliński, D. Sykutera, P. P. Szewczykowski 313	313
Integrateable quantum dot devices in plastic material P. J. Böttger, M. Meyer, L. Kroll, T. Otto, T. Geßner 319	319
Agile production of vehicles with multi-material structures T. Dietz, P. Foith-Förster, M. Hägele, T. Bauernhansl 323	323
Effects of geometrical interface architectures in hybrid metal-plastic structures manufactured through LFT injection molding K. Dröder, M. Kühn, M. Brand, P. Dreessen, A. Gerdes, S. Schulze, T. Große, S. Huinink 327	327
Efficient K-band antennas fabricated with large-scale processes M. Gaitzsch, T. D. Großmann, M. Hartwig, M. Heinrich, S. Kurth, T. Gessner, R. R. Baumann, L. Kroll 331	331
New approach for adhesion promotion in composite materials using functional twin monomers M. Göring, A. Schuberth, S. Anders, M. Birkner, K. Schreiter, D. Nickel, I. Roth, L. Kroll, T. Lampke, S. Spange 335	335
Requirements and design concepts of a software tool for a multidimensional analysis of process chains D. Grzelak, R. Freund, A. Rautenstrauch, C. Symmank, J. Boll, H. Wiemer, D. Landgrebe, U. Götze, B. Awiszus 339	339
Cross cutting research on the research campus ARENA2036 R. Hoogeveen 343	343
Model-based commissioning of systems and processes S. Ihlenfeldt, M. Hoffmann, M. Glänzel, U. Frieß 347	347
Aromatic oxime derivatives as reactive adhesion promoters R. John, K. Trommler, K. Schreiter, S. Spange 349	349
What we see is what we feel – Haptic texture versus optical structure at the example of a gear lever knob demonstrator A. Kaiser, A. C. Bullinger 353	353

Bio²Strategy - Design method of textile-based, partial reinforced semi-finished products for bionic inspired thermoplastic FRP	
A. Kolonko, F. Helbig	359
Concepts for the enhancement of structural integrity, strength and stiffness of carbon composites	
B. Lehmann, H.-J. Bauder, J. Wolfrum, E. Giebel, G. T. Gresser, M. Buchmeiser	363
Processing and mechanical properties of short glass fiber reinforced polypropylene films	
N. Loytseth, J. Tröltzsch, S. Siengchin, L. Kroll	367
Integrated load detection sensor for lightweight structures based on quantum dots	
M. Moebius, J. Martin, E. A. Poppitz, M. Hartwig, V. Dzhan, O. D. Gordan, H. Lang, D. R. T. Zahn, R. R. Baumann, T. Otto, T. Gessner	371
Effect of bark fiber content on properties of poplar wood/PLA composites	
J. Oktaee, C. Siegel, S. Siwek, S. Gantz, A. Winkler, A. Wagenfuehr	373
Fibre reinforced bioplastics – From prototype to series production	
A. Ouali, R. Rinberg, L. Kroll, H. Cebulla	377
Si stress sensor for process monitoring during encapsulation and fabrication	
F. Rost, F. Schindler-Saefkow, J. Schaufuß, D. Vogel, J. Mehner, B. Michel, S. Rzepka	381
ARENA2036 - FRP lightweight design by functional integration: challenges concerning an integrative FRP floor module	
S. Rothenberg, S. Vohrer, A. Schumann, T. Sommer-Dittrich	383
Self-reinforcement of polyamide textile-reinforced polymer composites	
S. Schindler, F. Helbig	385
Joining of copper using silver nanoparticles under mild conditions	
R. Schulze, P. Frenzel, S. Hausner, J. Noll, S. F. Jahn, A. Jakob, A. Schubert, H. Lang, G. Wagner	389
Casting technique for bio-based polymer reinforced sisal fiber composites	
J. Tengsuthiwat, R. Dangtungee, S. Siengchin, L. Kroll	395
ARENA2036 – FRP lightweight design by functional integration: method and concepts	
S. Vohrer, G. Kopp, S. Rothenberg, H. E. Friedrich	397
