1	Introduction	1
2	General Principles	3
	Room Layout	3
	Use of the Mayfield Head Holder	4
	Computer-Guided Stereotactic Navigation	8
	Cranial Nerve Monitoring	9
	CSF Management	10
	Instrumentation	14
3	Middle Fossa Approaches	19
	Approach to the Internal Auditory Canal	19
	Kawase's Triangle Approach	33
	Orbitocraniozygomatic Approach	37
4	Posterior Fossa Approaches	51
	Translabyrinthine Approach	51
	Transcochlear Approach	72
	Retrosigmoid Approach	83
	Far Lateral Approach	104
5	Combined Approach to the Middle and Posterior Fossa	115
6	Infratemporal Fossa Approaches	131
	Postauricular Approach to the Infratemporal Fossa	131
	Preauricular Approach to the Infratemporal Fossa	162
	Pre- and Postauricular Approach to the Infratemporal Fossa	181
7	Temporal Bone Surgery for Infectious Disease	193
	Simple Mastoidectomy for Acute Mastoiditis	193
	Retrolabyrinthine Craniotomy for Intracranial	
	Complications of Acute Mastoiditis	196
	Subtotal (Circumferential) Petrosotomy for Acute Petrositis	
	or Skull Base Osteomyelitis	214
8	Temporal Bone Surgery for Encephaloceles, Superior Semicircular	
	Canal Dehiscence, Neoplasia, and Lesions of the Petrous Apex	221
	Repair of Temporal Lobe Encephalocele	221
	Repair of Superior Semicircular Canal Dehiscence	235
	Temporal Bone Resection	238
	Drainage of Petrous Apex Lesions	254
9	Facial Nerve Surgery	263
10	Cochlear Implantation	281

11	Surgery for Vertigo	303
	Endolymphatic Shunt	303
	Vestibular Nerve Section	307
	Labyrinthectomy	308
12	Complications and Additional Thoughts	311
	Index	319
