## **VII Preface**

## **IX Foreword**

## **XII Contributors**

### Biological Base of Frailty

#### **1 Connecting Age-Related Biological Decline to Frailty and Late-Life Vulnerability**

Walston, J.D. (USA)

#### **11 Cellular Senescence and the Biology of Aging, Disease, and Frailty**

LeBrasseur, N.K.; Tchkonja, T.; Kirkland, J.L. (USA)

#### **19 The Role of Genome Instability in Frailty: Mitochondria versus Nucleus**

Seo, A.Y.; Leeuwenburgh, C. (USA)

#### **29 Determinants of Frailty and Longevity: Are They the Same Ones?**

Rodríguez Mañas, L. (Spain)

#### **41 A Summary of the Biological Basis of Frailty**

Fielding, R.A. (USA)

### Clinical Phenotype of Frailty

#### **45 Psychological Frailty in the Aging Patient**

Fitten, L.J. (USA)

#### **55 Frailty Clinical Phenotype: A Physical and Cognitive Point of View**

Aubertin-Leheudre, M. (Canada/USA); Woods, A.J.; Anton, S.; Cohen, R.;

Pahor, M. (USA)

#### **65 Overlaps between Frailty and Sarcopenia Definitions**

Cederholm, T. (Sweden)

## Interventions for Frailty

### **71 Recovery after Hip Fracture: Interventions and Their Timing to Address Deficits and Desired Outcomes – Evidence from the Baltimore Hip Studies**

Magaziner, J.; Chiles, N.; Orwig, D. (USA)

### **83 Physical Exercise as Therapy for Frailty**

Aguirre, L.E.; Villareal, D.T. (USA)

### **93 Frailty in Clinical Practice**

Cesari, M.; Vellas, B. (France)

### **99 Integrating Frailty into Clinical Practice to Prevent the Risk of Dependency in the Elderly**

Vellas, B. (France)

## **105 Subject Index**
