

Contents

Foreword	vi
Preface	vii
Part I Mechanics: Some Basics	1
1 Basic Concepts from Physics and Mechanics.....	3
2 Mechanical Properties of Solid Materials.....	36
3 Deformation and Strength of Structures	51
Part II Mathematics: Some Basics	67
4 Vector Algebra	69
5 Matrix Notation	86
6 Translation and Rotation in a Plane.....	88
7 Mathematical Description of Translation and Rotation in Three-Dimensional Space	103
Part III Mechanical Aspects of the Human Locomotor System	139
8 Mechanical Properties of Bone and Cartilage	141
9 Structure and Function of Skeletal Muscle	179
10 Mechanical Aspects of Skin	224
11 Dimensions, Mass, Location of the Center of Mass, and Moment of Inertia of the Segments of the Human Body	236
12 Determination of Joint Load in a Model Calculation.....	250
13 Mechanical Aspects of the Hip Joint	272
14 Mechanical Aspects of the Knee Joint	297
15 Mechanical Aspects of the Lumbar Spine	326
16 Mechanical Aspects of the Shoulder	362
17 Biomechanics of the Foot	380
18 Gait	414
Part IV Solved Problems	439
19 Solved Problems	441
Notation	481
Index	483
