

Contents

Foreword	VI
Acknowledgments	VII
Introduction	VIII
Chapter 1 Diagnostics	1
Chapter 2 Biomechanics of invisalign	25
Chapter 3 Treatment planning and treatment with aligners	31
Chapter 4 Treatment of different malocclusions with aligners	41
Topic 1 <i>Deangulation of the maxillary incisors to remove an existing black triangle</i>	42
Topic 2 <i>Derotation of mandibular canines</i>	46
Topic 3 <i>Lingual tipped premolar, crowding and extrusion</i>	49
Topic 4 <i>Crowding</i>	53
Topic 5 <i>Buccal black corridors</i>	57
Topic 6 <i>Closing unwanted spacing</i>	61
Topic 7 <i>Spacing with periodontitis and bone loss</i>	64
Topic 8 <i>Bone and periodontium: General considerations</i>	67
Topic 9 <i>Missing maxillary lateral incisors</i>	70
Topic 10 <i>Crowding with insufficient space for full eruption of a retained tooth</i>	74
Topic 11 <i>Missing maxillary lateral incisor</i>	80
Topic 12 <i>Spaces with missing teeth</i>	84
Topic 13 <i>Agenesis of six teeth and migration of maxillary canines into spaces</i>	88
Topic 14 <i>Spaces after traumatic tooth loss with migration of neighboring teeth</i>	93
Topic 15 <i>Gummy smile in a young patient</i>	97
Topic 16 <i>Build up a "Speed Up"</i>	102
Topic 17 <i>Anterior open bite</i>	105
Topic 18 <i>Asymmetry of gingival height and crowding</i>	109
Topic 19 <i>When to use interproximal enamel reduction</i>	114
Topic 20 <i>Mandibular crowding: Extraction of a mandibular incisor</i>	119
Topic 21 <i>Bialveolar protrusion: Extraction of a mandibular incisor</i>	122
Topic 22 <i>Crowding in the lower arch with crossbite: Extraction of lower second premolars</i>	125
Topic 23 <i>CMD with unilateral class II relationship: Extraction of a single upper premolar</i>	128
Topic 24 <i>Unilateral class II relationship: Extraction of a unilateral premolar with sectional fixed mechanics followed by Invisalign treatment</i>	134
Topic 25 <i>Bialveolar protrusion: Extraction of four premolars</i>	137
Topic 26 <i>Class II treatment: General considerations</i>	142
Topic 27 <i>Class II with highly erupted upper canines</i>	144
Topic 28 <i>Class II/2 treatment</i>	149

Topic 29	<i>Class II pretreatment with Carrière distalizer in a teenager with all permanent teeth erupted</i>	156
Topic 30	<i>Class II pretreatment with Carrière distalizer in an adult</i>	160
Topic 31	<i>Craniomandibular disorder and class II relationship</i>	164
Topic 32	<i>Class II with open bite</i>	171
Topic 33	<i>Class III relationship and tongue dysfunction</i>	177
Topic 34	<i>Class III relationship treated without surgery</i>	182
Topic 35	<i>Intrusion of a maxillary molar with aligner therapy and miniscrews</i>	186
Topic 36	<i>Intrusion of a maxillary molar with aligner therapy</i>	188
Topic 37	<i>Tipped molars</i>	190
Topic 38	<i>Child with early loss of baby teeth</i>	194
Topic 39	<i>Creation of space for the eruption of a tooth in a young patient</i>	201
Topic 40	<i>Teenager with spaces and agenesis of two teeth</i>	206
Topic 41	<i>Teenager with agenesis of four teeth and an impacted tooth</i>	213
Topic 42	<i>Skeletal class II relationship in a teenager</i>	224
Topic 43	<i>Skeletal class II relationship in a teenager</i>	228
Topic 44	<i>Periodontitis with bone loss, extruded teeth, and spaces</i>	232
Topic 45	<i>CMD and bone loss in a patient with class II/2 relationship</i>	235
Topic 46	<i>Class II relationship treated with alignment before surgery</i>	240
Topic 47	<i>Class III relationship treated with alignment before surgery</i>	244
Topic 48	<i>Craniomandibular dysfunction: General considerations</i>	249
Topic 49	<i>Craniomandibular dysfunction: diagnosis and treatment planning ...</i>	251
Topic 50	<i>Craniomandibular disorder in a teenager</i>	256
Topic 51	<i>Craniomandibular disorder with pain</i>	265
Topic 52	<i>Craniomandibular disorder with pain treated with the Invisalign system followed by prosthodontics</i>	270
Topic 53	<i>Craniomandibular disorder with headache and cervical spine syndrome</i>	277
Topic 54	<i>Craniomandibular disorder with a crossbite and only partial centric contact on two molars</i>	282
Topic 55	<i>CMD and chronic pain, partial centric contact only on two molars</i>	288
Topic 56	<i>Craniomandibular disorder with partial centric contact on two incisors</i>	295
Topic 57	<i>Craniomandibular disorder with centric contact only on first premolars</i>	302
Topic 58	<i>Craniomandibular disorder with anterior disc displacement</i>	308
Topic 59	<i>Digital workflow in interdisciplinary dentistry</i>	313
Topic 60	<i>Posterior open bite at the end of Invisalign treatment</i>	334
Topic 61	<i>Selective tooth grinding in centric and/or excentric supraocclusions</i>	336
Topic 62	<i>Retention after the Invisalign technique</i>	341
Topic 63	<i>Scanning procedure with the iTero scanner</i>	342

Chapter 5	Advantages of the invisalign system	351
------------------	--	------------
