Foreword xviii
Johannes J. Manni

Preface xix

Dedication and Acknowledgments xx

Contributors xxi

Part I: Embryology, Anatomy, Physiology, and Applied Basic Sciences

1. Embryology and Anatomy of the Facial Nerve: Correlates of Misdirected Reinnervation and Poor Recovery of Function after Lesions 2
Doychin N. Angelov

1.1 Introduction 2

1.2 Neural Plate, Neural Crest, Ectodermal Placodes 2

1.3 Neural Folds, Neural Tube, Rhombomeres, Roof and Floor Plates ... 2

1.4 First Differentiation into Motor and Sensory Cells 2

1.5 Primordial Tissues of the Facial Nerve Occur at the End of the 3rd Week 3

1.6 The Second Pharyngeal Arch 3

1.7 Development of the Intraparenchymal Portion of the Facial Nerve 3

1.8 Development of the Extramedullary Portion of the Facial Nerve 6

1.9 Development of the Pars Intratemporalis 6

1.10 Development of Facial Nerve Branches 6

1.11 Development of Intratemporal Communications 7

1.12 Development of Extratemporal Communications 7

1.13 Relationships to Developing Facial Muscles 7

1.14 Axonal Growth and Guidance 8

1.15 Postnatal Development 8

1.16 Intracranial Portion of the Facial Nerve 9

1.17 Surgical Anatomy of the Facial Nerve Trunk and its Branches 9

1.18 Key Points 12

2. Physiology of the Facial Motor System 14
Andrey Irintchev

2.1 Introduction 14

2.2 Muscles 14

2.3 Motoneurons and Glial Cells 15

2.4 Proprioception 17

2.5 Reflex Responses and Automatic Motor Behaviors 18

2.6	Central Pattern Generators	19	2.8	Emotional Motor Control	20
2.7	Voluntary Motor Control	19	2.9	Key Points	20
3.	Applied Basic Science: Improvement of Nerve Regeneration	23			
	<i>Andrey Irintchev and Doychin N. Angelov</i>				
3.1	Introduction	23	3.4.3	Manual Stimulation Reduces Polyinnervation of Muscle Fibers	27
3.2	Clinical Relevance of Animal Models ..	23	3.4.4	Growth Factors to Promote Axonal Growth	27
3.3	Factors Limiting Recovery	24	3.4.5	Mimetic Peptides Improve Diameters and Myelination of Regenerated Axons ...	28
3.4	Therapeutic Approaches	25	3.4.6	Cell-Based Approaches for Axonal Growth Enhancement across a Nerve Prosthesis	28
3.4.1	Targeting Axonal Misdirection	26	3.5	Key Points	28
3.4.2	Electrical Stimulation to Counteract Denervation Atrophy and Accelerate Reinnervation	27			

Part II: Diagnostics

4.	Clinical Examination	32			
	<i>Gerd Fabian Volk, Orlando Guntinas-Lichius, and Barry M. Schaitkin</i>				
4.1	Introduction	32	4.3.6	Palate Symmetry	47
4.2	Patient History	33	4.3.7	Tongue Deviation	47
4.2.1	Time Course	33	4.3.8	Loss of Taste and Taste Papillae	48
4.2.2	Recurrence	35	4.3.9	Signs of Acquired Immunodeficiency Syndrome	48
4.2.3	Recurrent Alternating Palsy	35	4.3.10	Pain or Numbness	48
4.2.4	Bilateral Simultaneous Palsy	36	4.3.11	Vesicles	49
4.2.5	Conditions Associated with Facial Nerve Palsy	37	4.3.12	Ear	49
4.2.6	Family History and Congenital Facial Palsy	40	4.3.13	Dizziness	49
4.2.7	Pregnancy	40	4.4	Topodiagnosics	50
4.2.8	Systemic Illnesses	40	4.4.1	Stapedial Reflex (Acoustic Reflex)	50
4.2.9	Drugs	41	4.4.2	Other Hearing Tests and Balance Tests ...	52
4.2.10	Immunizations	41	4.4.3	Schirmer's Test	52
4.2.11	Malignancies	41	4.4.4	Taste Test	53
4.2.12	Idiopathic (Bell's) Palsy	41	4.5	Extended Diagnostics	53
4.3	Clinical Examination	41	4.5.1	Imaging	53
4.3.1	Facial Muscle Weakness and Facial Palsy ..	42	4.5.2	Electrodiagnostics	53
4.3.2	Gross Neurological Examination	46	4.5.3	Psychological Exploration	54
4.3.3	Cranial Nerve Survey	46	4.6	Follow-up	54
4.3.4	Corneal Sensation	46	4.7	Key Points	55
4.3.5	Keratitis	47			

5.	Imaging	57			
	<i>Gerd Fabian Volk, Hartmut Peter Burmeister, and Orlando Guntinas-Lichius</i>				

5.1	Introduction	57	5.2	Indications for Imaging Studies	57
------------	---------------------------	----	------------	--	----

5.3	Magnetic Resonance Imaging	57	5.5	Ultrasonography	64
5.4	Computed Tomography	63	5.6	Key Points	70
6.	Electrophysiology	72			
	<i>Hans-Christoph Scholle, Nikolaus-Peter Schumann, and Gerd Fabian Volk</i>				
6.1	Introduction	72	6.5	Electrophysiologic Diagnostic Work-Up	74
6.2	Definition	72	6.5.1	Needle Electromyography	74
6.3	Physiology behind Electrophysiologic Diagnostics	72	6.5.2	Electroneurography	80
6.4	Pathology and its Electrophysiologic Correlates	72	6.5.3	Blink Reflex	83
6.4.1	Supranuclear Lesions	74	6.5.4	Transcranial Magnetic Stimulation and Magnetic Evoked Potentials	85
6.4.2	Infranuclear Lesions	74	6.5.5	Surface Electromyography	86
6.4.3	Synaptic Lesions	74	6.6	Key Points	91
6.4.4	Muscular Lesions	74			
7.	Grading	94			
	<i>Orlando Guntinas-Lichius and Mira Finkensieper</i>				
7.1	Introduction	94	7.4.4	Three-Dimensional Video Analysis and Surface Analysis	104
7.2	Definition	94	7.4.5	Glasgow Facial Palsy Scale	104
7.3	Subjective Grading	94	7.4.6	Facial Assessment by Computer Evaluation	104
7.3.1	House–Brackmann Facial Grading System	94	7.4.7	Facial Action Coding System	104
7.3.2	Yanagihara's Facial Grading Scale	98	7.5	Assessment of Nonmimic Motor Function and Nonmotor Facial Nerve Functions	105
7.3.3	Stennert's Index	98	7.6	Assessment of the Communicative and Emotional Function	105
7.3.4	May Facial Nerve Grading Scale	98	7.6.1	Facial Disability Index	106
7.3.5	Sunnybrook (Toronto) Facial Grading System	98	7.6.2	Facial Clinimetric Evaluation Scale Instrument	106
7.3.6	Facial Nerve Grading System 2.0	101	7.6.3	Assessment of Psychological Distress, Anxiety, and Depression	107
7.4	Objective Grading Systems	101	7.7	Key Points	107
7.4.1	Burres–Fisch Linear Measurement Index and the Nottingham System	101			
7.4.2	Neely's Facial Analysis Computerized Evaluation system	102			
7.4.3	Facial Landmark-Based Computer Systems and Programs	103			

Part III: Management of Acute Peripheral Facial Palsy

8.	Bell's Palsy	112			
	<i>Eric Smouha and Elizabeth Toh</i>				
8.1	Introduction	112	8.4	Clinical Features	113
8.2	Definition	112	8.5	Diagnostic Work-Up	115
8.3	Epidemiology and Etiology	112	8.6	Treatment	118

8.6.1	Eye Care	118	8.7	Outcomes and Prognosis	121
8.6.2	Medical Treatment of Bell's Palsy	118	8.8	Key Points	122
8.6.3	Surgical Decompression.....	120			
8.6.4	Medical Treatment of Bell's Palsy	121			
9.	Facial Nerve Trauma	124			
	<i>Peter L. Santa Maria, Mira Finkensieper, Orlando Guntinas-Lichius, and Robert K. Jackler</i>				
9.1	Introduction	124	9.5.2	Electrophysiology	134
9.2	Definition	124	9.5.3	Imaging.....	135
9.3	Epidemiology and Etiology	125	9.5.4	Facial Nerve and Facial Muscle Biopsies	137
9.4	Clinical Features	131	9.6	Treatment	137
9.4.1	Intracranial Trauma.....	131	9.6.1	Nonsurgical Treatment.....	138
9.4.2	Intratemporal Trauma	132	9.6.2	Surgical Treatment	138
9.4.3	Extratemporal Trauma.....	132	9.7	Outcome and Prognosis	144
9.5	Diagnostic Work-Up	132	9.8	Key Points	145
9.5.1	Examination	133			
10.	Ramsay Hunt Syndrome	147			
	<i>Claus Wittekindt</i>				
10.1	Introduction	147	10.6.2	Treatment for Disequilibrium.....	153
10.2	Definition	147	10.6.3	Treatment for Facial Paralysis.....	153
10.3	Epidemiology and Etiology	147	10.6.4	Treatment for Pain.....	153
10.4	Clinical Features	148	10.6.5	Treatment for Postherpetic Neuralgia ..	153
10.5	Diagnostic Work-Up	150	10.6.6	Topical Antiviral Cream	153
10.5.1	Virology Testing.....	150	10.6.7	Treatment for the Eye.....	153
10.5.2	Imaging Studies	150	10.6.8	Surgical Treatment	153
10.5.3	Electrodiagnostic Tests of Facial Nerve .	150	10.7	Outcome and Prognosis	154
10.5.4	Lumbar Puncture.....	151	10.7.1	Complications.....	154
10.6	Treatment	151	10.8	Prevention	155
10.6.1	Medical Treatment	151	10.9	Key Points	155
11.	Lyme Disease	157			
	<i>Howard S. Moskowitz and Barry M. Schaitkin</i>				
11.1	Introduction	157	11.7	Outcomes and Prognosis	159
11.2	Definition	157	11.7.1	Lyme Facial Palsy versus Bell's Palsy.	160
11.3	Epidemiology and Etiology	157	11.7.2	Studies on Lyme Facial Palsy.....	161
11.4	Clinical Features	158	11.7.3	Studies on Lyme Facial Palsy Focusing on Children	162
11.5	Diagnostic Work-Up	158	11.7.4	Overview of Lyme Facial Palsy Studies..	164
11.6	Treatment	159	11.8	Key Points	165

12. Pediatric Facial Nerve Palsies	167
<i>Kristen M. Davidge, J. Michael Hendry, Ronald Zuker, and Gregory H. Borschel</i>	
12.1 Introduction	167
12.2 Definition	167
12.3 Epidemiology	167
12.4 Etiology	168
12.4.1 Möbius Syndrome	168
12.4.2 Hemifacial Microsomia and Goldenhar's Syndrome	170
12.4.3 Hereditary Congenital Facial Nerve Paralysis	170
12.5 Diagnostic Work-Up	171
12.5.1 History	171
12.5.2 Physical Examination	171
12.5.3 Investigations	172
12.6 Treatment	172
12.6.1 Addressing the Lower Face	172
12.6.2 Neonatal Asymmetric Crying Facies ...	179
12.6.3 Acquired Facial Paralysis in the Pediatric Population	181
12.7 Key Points	181

Part IV: Importance of the Facial Nerve for Communication and Emotion

13. Psychological Exploration of Emotional, Communicative, and Social Impairments in Patients with Facial Impairments	184
<i>Christian Dobel and Orlando Guntinas-Lichius</i>	
13.1 Introduction	184
13.2 Emotions as a Core of Human Interactions	184
13.3 Understanding Own and Others' Emotions	185
13.4 Psychological Changes After Facial Palsy	187
13.5 Key Points	190
14. Diagnostic and Therapeutic Approaches to Emotional and Social Impairments in Patients with Facial Paresis	192
<i>Christian Dobel and Orlando Guntinas-Lichius</i>	
14.1 Introduction	192
14.2 Diagnosis of Emotional and Social Symptoms	192
14.2.1 Assessment of General Anxiety, Social Anxiety, and Distress	192
14.2.2 Assessment of Depressive Symptoms ...	194
14.2.3 Assessment of Quality of Life and Social Functioning	194
14.2.4 Guidance for Clinicians	195
14.3 Assessment of Emotional Functions	196
14.4 Therapeutic Approaches to Address Emotional and Social Changes	197
14.5 Key Points	197

Part V: Surgery around the Facial Nerve

15. Intraoperative Facial Nerve Monitoring	200
<i>Brent J. Benscoter and Jack M. Kartush</i>	
15.1 Introduction	200
15.2 History	200

15.3 Clinical Application	201	15.6 Troubleshooting/Pitfalls	209
15.4 Physiology	202	15.7 Further Study	211
15.5 Training	205	15.8 Key Points	211
15.5.1 Technical Setup	206		
16. Tumors Affecting the Facial Nerve	213		
<i>John P. Leonetti, Sam J. Marzo, and Matthew L. Kircher</i>			
16.1 Introduction	213	16.6.1 Primary Neurorrhaphy	218
16.2 Surgical Anatomy	213	16.6.2 Interposition Graft	218
16.3 Clinical Features	213	16.6.3 Hypoglossal–Facial Anastomosis	219
16.3.1 Presenting Symptoms	213	16.6.4 Microvascular Free Flap	219
16.3.2 Presenting Signs	213	16.6.5 Cross-Facial Graft	219
16.4 Diagnostic Work-Up	214	16.7 Facial Schwannoma	219
16.5 Surgical Approaches	216	16.8 Adjuvant Procedures	220
16.6 Facial Nerve Management	218	16.9 Key Points	220
17. The Facial Nerve in Otologic Infection and Iatrogenic Injury	222		
<i>Jacob S. McAfee and Barry E. Hirsch</i>			
17.1 Introduction	222	17.5 Necrotizing Otitis Externa	229
17.2 Structural Considerations	222	17.5.1 Pathophysiology	230
17.3 Acute Otitis Media	234	17.5.2 Diagnostic Work-Up	230
17.3.1 Pathophysiology	224	17.5.3 Treatment	232
17.3.2 Electrophysiologic Diagnostics	225	17.6 Perioperative Management of Acute Facial Palsy during Middle Ear and Mastoid Surgery	233
17.3.3 Treatment	225	17.6.1 Immediate, Complete Paralysis	234
17.3.4 Prognosis	226	17.6.2 Delayed-Onset, Incomplete Palsy	235
17.4 Chronic Otitis Media	227	17.7 Key Points	236
17.4.1 Pathophysiology	227		
17.4.2 Treatment	228		
18. Facial Nerve and Vestibular Schwannoma	238		
<i>John C. Goddard, Courtney C. J. Voelker, and Derald E. Brackmann</i>			
18.1 Introduction	238	18.4 Microsurgery	240
18.2 General Considerations in Vestibular Schwannoma Surgery	238	18.4.1 Retrosigmoid Approach	240
18.2.1 Indications and Patient Selection	238	18.4.2 Middle Fossa Approach	242
18.2.2 Patient Information and Consent: Surgical	238	18.4.3 Translabrynthine Approach	245
18.2.3 Patient Information and Consent: Stereotactic Radiation	239	18.5 Postoperative Considerations	247
18.3 Stereotactic Radiation	239	18.6 Complications	247
18.3.1 Patient Selection	239	18.6.1 Measures for Specific Complications ...	248
18.3.2 Treatment Steps	239	18.7 Key Points	248

19. The Facial Nerve and Parotid Surgery	249
<i>Orlando Guntinas-Lichius and Mira Finkensieper</i>	
19.1 Introduction	249
19.2 Definition	249
19.3 Epidemiology and Etiology	249
19.4 Risk Factors for Postoperative Facial Palsy After Parotid Surgery	249
19.5 Preoperative Assessment and Measures to Avoid Postoperative Facial Palsy	251
19.6 Intraoperative Measures to Prevent a Facial Nerve Lesion	252
19.6.1 Identification of the Extratemporal Portion of the Facial Nerve and its End Branches	252
19.6.2 Management of the Facial Nerve Depending on the Type of Surgery	256
19.7 Management of Intraoperative Facial Nerve Lesions	257
19.8 Management of Postoperative Facial Palsy	258
19.8.1 A Facial Nerve Lesion Occurs During Parotid Surgery and is Recognized	258
19.8.2 The Patient Wakes Up After Parotid Surgery and has a Complete Facial Palsy on the Side of Surgery	259
19.8.3 The Patient Wakes Up After Parotid Surgery and has an Incomplete Facial Palsy	260
19.8.4 The Patient Develops a Delayed Facial Palsy	260
19.9 Key Points	260

Part VI: Rehabilitation Techniques for Chronic Facial Palsy

20. Facial Nerve Reconstruction	264
<i>Orlando Guntinas-Lichius and Mira Finkensieper</i>	
20.1 Introduction	264
20.2 Definition	264
20.3 Direct Facial–Facial Nerve Reconstruction	266
20.3.1 Indications	266
20.3.2 Patient Information, Consent	266
20.3.3 Anesthesia and Positioning	266
20.3.4 Surgical Steps	266
20.3.5 Complications	267
20.3.6 Postoperative Care	267
20.3.7 Outcomes	267
20.4 Facial–Facial Nerve Interposition Graft	268
20.4.1 Indications	268
20.4.2 Patient Information, Consent	268
20.4.3 Anesthesia and Positioning	269
20.4.4 Surgical Steps	269
20.4.5 Complications	271
20.4.6 Postoperative Care	271
20.4.7 Outcomes	271
20.5 Hypoglossal–Facial Nerve Suture and Hypoglossal–Facial Jump Nerve Suture	272
20.5.1 Indications	272
20.5.2 Patient Information, Consent	272
20.5.3 Anesthesia and Positioning	273
20.5.4 Surgical Steps	273
20.5.5 Complications	276
20.5.6 Postoperative Care	276
20.5.7 Outcomes	276
20.6 Cross-Face Facial Nerve Suture	277
20.6.1 Indications	277
20.6.2 Patient Information, Consent	277
20.6.3 Anesthesia and Positioning	277
20.6.4 Surgical Steps	277
20.6.5 Complications	277
20.6.6 Postoperative Care	279
20.6.7 Outcomes	279
20.7 Other Cross-Nerve Sutures	279
20.8 Combined Approach	279
20.9 Key Points	280

21. Muscle Flaps and Static Procedures	281		
<i>Markus Jungehülsing and Orlando Guntinas-Lichius</i>			
21.1 Introduction	281	21.5 Digastric Muscle Transfer	286
21.2 Definition	281	21.5.1 Indications	286
21.3 Temporalis Muscle Transfer	282	21.5.2 Patient Information, Consent	286
21.3.1 Indications	282	21.5.3 Anesthesia and Positioning	287
21.3.2 Patient Information, Consent	282	21.5.4 Surgical Steps	287
21.3.3 Anesthesia and Positioning	283	21.5.5 Complications	287
21.3.4 Surgical Steps	283	21.5.6 Postoperative Care	287
21.3.5 Complications	284	21.5.7 Outcomes	287
21.3.6 Postoperative Care	284	21.6 Sling Techniques	288
21.3.7 Outcomes	284	21.6.1 Indications	288
21.4 Masseter Muscle Transfer	284	21.6.2 Patient Information, Consent	288
21.4.1 Indications	284	21.6.3 Anesthesia and Positioning	288
21.4.2 Patient Information, Consent	285	21.6.4 Surgical Steps	288
21.4.3 Anesthesia and Positioning	285	21.6.5 Complications	291
21.4.4 Surgical Steps	285	21.6.6 Postoperative Care	291
21.4.5 Complications	286	21.6.7 Outcomes	291
21.4.6 Postoperative Care	286	21.7 Combining Procedures	291
21.4.7 Outcomes	286	21.8 Key Points	291
22. Free Flaps	293		
<i>Caroline A. Banks and Tessa A. Hadlock</i>			
22.1 Introduction	293	22.5.1 First-Stage Cross-Face	296
22.1.1 Two-Stage Procedures	293	22.5.2 Preparation of the Face and Neck for Free Flap	296
22.1.2 One-Stage Procedures	294	22.5.3 Gracilis Harvest	298
22.2 Indications	294	22.5.4 Gracilis Preparation and Inset	300
22.2.1 Gracilis Free Muscle Transfer in Special Populations	295	22.6 Complications	302
22.3 Patient Information and Consent ...	295	22.7 Postoperative Care	303
22.4 Anesthesia and Positioning	296	22.8 Key Points	304
22.5 Surgical Steps	296		
23. Functional Outcomes of Facial Nerve Repair following Face Transplantation	306		
<i>Maria Z. Siemionow and Bahar Bassiri Gharb</i>			
23.1 Introduction	306	23.4 Current Clinical Experience with Facial Nerve Repair in Face Transplantation	311
23.2 Surgical Approach to Facial Nerve Repair in Face Transplantation	307	23.5 Functional Outcomes of Facial Nerve Repair in Face Transplantation	311
23.3 Rehabilitation Following Facial Nerve Repair in Face Transplantation	307	23.6 Key Points	311

24. Surgery of the Periorbital Region	313
<i>Kris S. Moe and Farhad Ardeshipour</i>	
24.1 Introduction	313
24.2 Forehead and Brow	314
24.2.1 Browlift	314
24.3 Eyelids	316
24.3.1 Upper Lid	317
24.3.2 Correction of Lower Lid Malposition ...	321
24.3.3 Midface Lift	326
24.4 Adjuvant Measures	327
24.4.1 Botulinum Toxin	327
24.4.2 Fillers and Fat	328
24.5 Key Points	328
25. Adjuvant Treatment with Botulinum Toxin and Fillers	329
<i>Claus Wittekindt</i>	
25.1 Introduction	329
25.2 Botulinum Toxin	329
25.2.1 Serotypes and Structure	330
25.2.2 Mechanism of Action and Recovery of Acetylcholine Release	330
25.2.3 Immunogenicity	330
25.2.4 Comparison of Botulinum Toxins	330
25.3 Clinical Use	331
25.3.1 Aging Face	331
25.3.2 Facial Synkinesis	332
25.3.3 Hyperlacrimation	333
25.3.4 Gustatory Sweating (Frey's Syndrome) .	334
25.3.5 Facial Asymmetry	335
25.4 Fillers	337
25.4.1 Types of Fillers	337
25.4.2 Complications	338
25.4.3 Choosing the Right Filler	338
25.4.4 Injection Technique	338
25.5 Key Points	339
26. Feedback Training and Other Training Programs	342
<i>Wolfgang H. R. Miltner, Thomas Weiss, and Eva Maria Miltner</i>	
26.1 Introduction	342
26.2 Neuromuscular Biofeedback Training	342
26.2.1 Technique	342
26.2.2 Efficacy	345
26.3 Rehabilitation of Facial Paralysis following Different Treatment Concepts of Physical Therapy without Concurrent Biofeedback Methods ..	348
26.3.1 Proprioceptive Neuromuscular Facilitation	348
26.3.2 Mime Therapy	348
26.3.3 Mixed Home Training	349
26.3.4 Neuromuscular Re-Education Versus Conventional Therapeutic Measures ...	349
26.4 General Status of Current Rehabilitation Outcome	351
26.5 Methodological Problems	351
26.5.1 Assessment of Motor Dysfunction	351
26.5.2 Evaluation of Stability of Treatment Effects Beyond the Termination of Rehabilitation	352
26.5.3 Sequencing of Treatment Components, Manualization	352
26.5.4 Intensity of Daily Training and Total Duration of Training	353
26.6 Key Points	354

Part VII: Diseases Other Than Peripheral Facial Palsy

27. Central Facial Palsy	358		
<i>Carsten M. Klingner and Otto W. Witte</i>			
27.1 Introduction	358	27.4 Clinical Features	364
27.2 Definition	358	27.5 Diagnostic Work-Up	365
27.3 Epidemiology and Etiology	358	27.5.1 Medical Interview	365
27.3.1 Causes of a Central Facial Palsy	358	27.5.2 Imaging	366
27.3.2 Anatomy of the Central Facial Pathway	362	27.5.3 Electrophysiology	366
27.3.3 Voluntary Facial Movements	362	27.6 Treatment	368
27.3.4 Emotional Facial Movements	362	27.7 Key Points	368
27.3.5 The Facial Nucleus	363		
28. Facial Dystonia and Facial Spasms	370		
<i>Claus Wittekindt</i>			
28.1 Introduction	370	28.5.1 Meige's Syndrome	373
28.2 Definition	370	28.5.2 Oromandibular Dystonia	373
28.3 Dystonia Classification	370	28.6 Hemifacial Spasm	374
28.4 Blepharospasm	371	28.6.1 Epidemiology and Etiology	374
28.4.1 Epidemiology and Etiology	371	28.6.2 Clinical Features	375
28.4.2 Clinical Features	371	28.6.3 Diagnostic Work-Up	375
28.4.3 Diagnostic Work-Up	372	28.6.4 Treatment	376
