Preface	VII
----------------------	-----

Contents	IX
-----------------------	----

Part I

Polymeric Materials	1
----------------------------	----------

1 Introduction	3
1.1 Historical Background	3
1.2 General Properties	6
1.3 Macromolecular Structure of Polymers	11
1.4 Molecular Weight	12
1.5 Arrangement of Polymer Molecules	14
1.5.1 Thermoplastic Polymers	14
1.5.2 Amorphous Thermoplastics	15
1.5.3 Semi-Crystalline Thermoplastics	16
1.5.4 Thermosets and Crosslinked Elastomers	18
1.6 Copolymers and Polymer Blends	19
1.7 Polymer Additives	20
1.7.1 Plasticizers	20
1.7.2 Flame Retardants	20
1.7.3 Stabilizers	21
1.7.4 Antistatic Agents	21
1.7.5 Fillers	21
1.7.6 Blowing Agents	22
1.8 Plastics Recycling	22
1.9 The Plastics and Rubber Industries	25
1.10 Polymer Processes	26
References	27

2	Mechanical Behavior of Polymers	29
2.1	Viscoelastic Behavior of Polymers	29
2.1.1	Stress Relaxation	29
2.1.2	Time-Temperature Superposition	30
2.2	The Short-Term Tensile Test	32
2.2.1	Elastomers	33
2.2.2	Thermoplastic Polymers	35
2.3	Long-Term Tests	37
2.3.1	Isochronous and Isometric Creep Plots	38
2.3.2	Creep Rupture	38
2.4	Dynamic Mechanical Tests	39
2.5	Mechanical Behavior of Filled and Reinforced Polymers	42
2.6	Impact Strength	45
2.7	Fatigue	47
2.8	Weathering	48
	References	53
3	Melt Rheology	55
3.1	Introduction to Rheology	55
3.1.1	Shear Thinning Behavior of Polymers	57
3.1.2	Normal Stresses in Shear Flow	58
3.1.3	Deborah Number	59
3.1.4	Rheology of Curing Thermosets	61
3.1.5	Suspension Rheology	62
3.1.6	Viscoelastic Flow Models	63
3.2	Rheometry	64
3.2.1	The Melt Flow Indexer	65
3.2.2	The Capillary Viscometer	66
3.2.3	The Cone-and-Plate Rheometer	68
	References	69

Part II	
Polymer Processes	71
4 Extrusion	73
4.1 Pumping	73
4.2 The Plasticating Extruder	75
4.2.1 The Solids Conveying Zone	78
4.2.2 The Melting Zone	82
4.2.3 The Metering Zone	84
4.3 Extrusion Dies	85
4.3.1 Sheetting Dies	86
4.3.2 Tubular Dies	88
References	89
5 Mixing	91
5.1 Distributive Mixing	91
5.2 Dispersive Mixing	94
5.2.1 Break-Up of Particulate Agglomerates	94
5.2.2 Break-Up of Fluid Droplets	96
5.3 Mixing Devices	100
5.3.1 Banbury Mixer	101
5.3.2 Mixing in Single Screw Extruders	102
5.3.3 Static Mixers	104
5.3.4 Cokneader	106
5.3.5 Twin Screw Extruders	106
References	108
6 Injection Molding	111
6.1 The Injection Molding Cycle	112
6.2 The Injection Molding Machine	116
6.2.1 The Plasticating and Injection Unit	116
6.2.2 The Clamping Unit	117
6.2.3 The Mold Cavity	118
6.3 Special Injection Molding Processes	121
6.3.1 Multi-Component Injection Molding	121
6.3.2 Co-Injection Molding	122

6.3.3	Gas-Assisted Injection Molding (GAIM)	125
6.3.4	Injection-Compression Molding	127
6.3.5	Reaction Injection Molding (RIM)	128
6.3.6	Liquid Silicone Rubber Injection Molding	130
6.4	Computer Simulation in Injection Molding	131
6.4.1	Mold Filling Simulation	132
6.4.2	Orientation Predictions	134
6.4.3	Shrinkage and Warpage Predictions	134
	References	136
7	Other Plastics Processes	137
7.1	Fiber Spinning	137
7.2	Film Production	138
7.2.1	Cast Film Extrusion	138
7.2.2	Film Blowing	139
7.3	Blow Molding	141
7.3.1	Extrusion Blow Molding	141
7.3.2	Injection Blow Molding	143
7.4	Thermoforming	145
7.5	Calendering	147
7.6	Coating	148
7.7	Processing Reactive Polymers	151
7.8	Compression Molding	154
7.9	Foaming	157
7.10	Rotational Molding	159
7.11	Welding	161
	References	162
Part III		
Modeling		165
8	Transport Phenomena in Polymer Processing	167
8.1	Dimensional Analysis and Scaling	167
8.1.1	Dimensional Analysis	168
8.1.2	Scaling and Similarity	177

8.2	Balance Equations	179
8.2.1	The Mass Balance or Continuity Equation	179
8.2.2	The Material or Substantial Derivative	180
8.2.3	The Momentum Balance or Equation of Motion	181
8.2.4	The Energy Balance or Equation of Energy	185
8.3	Model Simplification	187
8.3.1	Reduction in Dimensionality	190
8.3.2	Lubrication Approximation	192
8.4	Simple Models in Polymer Processing	194
8.4.1	Pressure Driven Flow of a Newtonian Fluid through a Slit ...	194
8.4.2	Flow of a Power Law Fluid in a Straight Circular Tube (Hagen-Poiseuille Equation)	195
8.4.3	Volumetric Flow Rate of a Power Law Fluid in Axial Annular Flow	197
8.4.4	Radial Flow Between two Parallel Discs — Newtonian Model .	198
8.4.5	Cooling or Heating in Polymer Processing	201
	References	206
9	Modeling Polymer Processes	207
9.1	Single Screw Extrusion — Isothermal Flow Problems	207
9.1.1	Newtonian Flow in the Metering Section of a Single Screw Extruder	208
9.1.2	Cross Channel Flow in a Single Screw Extruder	211
9.1.3	Newtonian Isothermal Screw and Die Characteristic Curves .	214
9.2	Extrusion Dies — Isothermal Flow Problems	217
9.2.1	End-Fed Sheetting Die	217
9.2.2	Coat Hanger Die	220
9.2.3	Extrusion Die with Variable Die Land Thicknesses	222
9.2.4	Fiber Spinning	223
9.2.5	Wire Coating Die	227
9.3	Processes That Involve Membrane Stretching	229
9.3.1	Film Blowing	229
9.3.2	Thermoforming	234
9.4	Calendering — Isothermal Flow Problems	236
9.4.1	Newtonian Model of Calendering	236
9.4.2	Shear Thinning Model of Calendering	243

9.4.3	Calender Fed with a Finite Sheet Thickness	245
9.5	Injection Molding — Isothermal Flow Problems	247
9.5.1	Balancing the Runner System in Multi-Cavity Injection Molds	247
9.5.2	Radial Flow Between Two Parallel Discs	249
9.6	Non-Isothermal Flows	251
9.6.1	Non-Isothermal Shear Flow	252
9.6.2	Non-Isothermal Pressure Flow through a Slit	254
9.7	Melting and Solidification	256
9.7.1	Melting with Drag Flow Melt Removal	259
9.7.2	Melting Zone in a Plasticating Single Screw Extruder	265
9.8	Curing reactions during processing	271
9.9	Estimating Injection Pressure and Clamping Force	273
	References	279
	Subject Index	281
