

Contents

1 Ionic Liquids in the Context of Separation Processes	1
Héctor Rodríguez	
2 Extractive Distillation with Ionic Liquids: Pilot Plant Experiments and Conceptual Process Design	11
G. Wytze Meindersma, Esteban Quijada-Maldonado, Mark T.G. Jongmans, Juan Pablo Gutiérrez Hernandez, Boelo Schuur, and André B. de Haan	
3 Ionic Liquids for Extraction Processes in Refinery-Related Applications	39
Ana Soto	
4 Ionic Liquids for Metal Ion Separation	67
Yu Liu and Ji Chen	
5 Aqueous Biphasic Systems Based on Ionic Liquids for Extraction, Concentration and Purification Approaches	91
Isabel M. Marrucho and Mara G. Freire	
6 Extraction of Sandalwood Oil Using Ionic Liquids: Toward a “Greener” More Efficient Process	121
Arvind Kumar, Hui Wang, and Robin D. Rogers	
7 Leaching of Active Ingredients from Plants with Ionic Liquids	135
Anna K. Rössmann and Katharina Bica	
8 Chiral Ionic Liquids in Separation Sciences	167
Maria Vasiloiu and Katharina Bica	
9 Analytical Applications of Ionic Liquids in Chromatographic and Electrophoretic Separation Techniques	193
María J. Trujillo-Rodríguez, Ana M. Afonso, and Verónica Pino
