1	Introduction	1
1.1	Smart rotary friction welding and Industry 4.0	1
1.2	Aims and structure of the thesis	5
1.3	Notation remarks	7
2	State of the art	8
2.1	Rotary friction welding	8
2.1.1	Classification of the process	12
2.1.2	Process stages of DDFW	12
2.1.3	High precision friction welding	18
2.2	Modeling of welding processes	20
2.3	Literature survey on modeling rotary friction welding	22
2.4	Conclusions and need for research	37
3	Fundamental concepts	40
3.1	Continuum modeling	40
3.2	Constitutive model	45
3.2.1	Norton-Bailey constitutive model	47
3.2.2	Sellars and Tegart constitutive model	49
3.2.3	Modified Carreau fluid constitutive model	50
3.2.4	Consistently assessed Carreau fluid constitutive model	52
3.3	Spatial discretization of the equation of motion	55
3.3.1	Component representation in cylindrical coordinates	55
3.3.2	Finite element formulation	59
3.3.3	Incompressibility	65
3.4	Mesh generation	66
3.5	Contact and friction modeling	73
3.6	Environmental modeling	77
3.7	Solver	78
4	Material parameter investigation	81
4.1	Setup of the uniaxial tensile tests	81
4.2	Results	84
4.3	Discussion	89
5	Model validation and testing	92
5.1	Setup of the validation friction weld	92

5.1.1	Experimental setup	92
5.1.2	Model setup	94
5.2	Comparison of experimental and simulation results	95
5.3	Model calibration	101
5.3.1	Friction model	101
5.3.2	Dry friction coefficient	105
5.3.3	Translation strain rate	106
5.3.4	Convective heat transfer coefficient	107
5.3.5	Quadrature rule	110
5.3.6	Mesh size	113
5.3.7	Integration accuracy	114
5.4	Process parameter study	116
5.4.1	Design of experiments	116
5.4.2	Process parameter sensitivity study	121
5.5	Remeshing benchmark	125
6	Applications	129
6.1	Joint geometry design	129
6.1.1	Flash pocket	129
6.1.2	Overlap friction welding	131
6.1.3	Sleeve stud weld	134
6.2	Process parameter optimization	137
6.2.1	Peak torque reduction	138
6.2.2	Process parameter maps calculation	140
6.3	Quality assurance	142
6.3.1	Failure prediction	142
6.3.2	Uncertainty propagation analysis	145
6.4	Technology development	150
6.4.1	Friction plug welding	151
6.4.2	Friction soldering	153
7	Conclusions and outlook	156
A	Gauss quadrature rules	159
A.1	Gauss quadrature rules for volume integration	159
A.2	Gauss quadrature rules for surface integration	160
B	Test results of the uniaxial tensile tests	161
C	Results of the process parameter DoE	168
	Bibliography	178
