Contents

Impact of Stratified Randomization in Clinical Trials 1
Vladimir V. Anisimov
1 Introduction 1
2 Recruitment in Different Strata 2
3 Randomization Effects 3
3.1 Impact of Randomization on the Power and Sample Size .. 4
4 Conclusions 8
References 8

The Non-Uniqueness of Some Designs for Discriminating Between Two Polynomial Models in One Variable 9
Anthony C. Atkinson
1 Introduction 9
2 Background 10
3 Examples 10
4 Designs for Higher-Order Models 13
5 Design and the Analysis of Data 15
References 16

Covariate Adjusted Designs for Combining Efficiency, Ethics and Randomness in Normal Response Trials 17
Alessandro Baldi Antognini and Maroussa Zagoraiou
1 Introduction 17
2 Optimal Allocations for Inference 18
3 Optimal Allocations for Ethics 20
4 Compound Optimal Designs 20
5 Doubly-Adaptive Biased Coin Designs with Covariates 22
References 24

Split-Plot and Robust Designs: Weighting and Optimization in the Multiple Response Case 25
Rossella Berni
1 Introduction 25
2 Split-Plot Theory 26
3 The Optimization Procedure 27
3.1 Desirability Function and Weighting 28
4 An Application to a Case Study 28
5 Optimization Results 30
6 Concluding Remarks 32
References 32

An Improvement in the Lack-of-Fit Optimality of the (Absolutely) Continuous Uniform Design in Respect of Exact Designs 33
Wolfgang Bischoff
1 Introduction 33
2 Preliminaries 34
3 LOF Optimality 35
4 Appendix 38
References 39

Optimal Allocation Proportion for a Two-Treatment Clinical Trial Having Correlated Binomial Responses 41
Atanu Biswas and Saumen Mandal
1 Introduction 41
2 Optimal Allocation Proportions in the Presence of Correlation 43
3 Numerical Computations 45
4 Concluding Remarks 47
References 48

Sample Size Determination for Multivariate Performance Analysis with Complex Designs 49
Stefano Bonnini, Livio Corain and Luigi Salmaso
1 Introduction 49
2 Global Ranking Methods 50
3 Simulation Study and Sample Size Determination 52
4 Conclusions 54
References 55

Optimal Design for Compositional Data 57
Roelof L. J. Coetzer and Linda M. Haines
1 Introduction 57
2 Additive Logistic Normal 58
2.1 Model 58
2.2 Design 59
3 Dirichlet Model 59

3.1 Model 59
3.2 Design 60
4 Example 61
4.1 Additive Logistic Normal 62
4.2 Dirichlet 63
5 Conclusions 63
References 64

Dose Finding Experiments: Responses of Mixed Type 65
Valerii V. Fedorov, Yuehui Wu and Rongmei Zhang
1 Introduction 65
2 Model 66
2.1 Information Matrix for a Single Observation 66
2.2 Utility and Penalty Functions 67
3 Optimal Designs 68
3.1 Adaptive Designs 69
4 Examples 70
5 Conclusions 71
References 72

Pharmacokinetic Studies Described by Stochastic Differential Equations: Optimal Design for Systems with Positive Trajectories 73
Valerii V. Fedorov, Sergei L. Leonov and Vyacheslav A. Vasiliev
1 Introduction 73
2 Response Models 74
2.1 Stochastic Systems with Positive Trajectories 75
3 Optimal Designs 76
3.1 Sampling Times and Examples of Optimal Design 76
4 Discussion 78
Appendix: Proof of Lemma 1 79
References 80

On Testing Hypotheses in Response-Adaptive Designs Targeting the Best Treatment 81
Nancy Flournoy, Caterina May, Jose A. Moler and Fernando Plo
1 Introduction 81
2 RRU-Designs and Test of Hypotheses 82
2.1 Test Based on the t-Statistic 83
2.2 Test Based on the 'Proportion of Black Balls' Statistic 84
3 Numerical Results 85
4 Discussion and Further Developments 87
References 88

Asymptotic Properties of Adaptive Penalized Optimal Designs over a Finite Space 165
Luc Pronzato
1 Introduction 165
2 Asymptotic Properties of Estimators when $\mathscr{X}$ is Finite 166
3 Adaptive Penalized D-optimal Design 167
3.1 A bound on the sampling rate of nonsingular designs 168
3.2 λ_n is bounded in (6) 169
3.3 λ_n tends to infinity in (6) 170
References 171

Filling and D-optimal Designs for the Correlated Generalized Exponential Model 173
Juan M. Rodríguez-Díaz, Teresa Santos-Martín, Milan Stehlík and Helmut Waldl
1 Introduction 173
2 Assuming m Known 175
3 Case of Unknown m 176
4 Parabolic Designs 176
5 Illustrative Example 178
6 Conclusions and Discussion 179
References 179

Designs for Dose Finding Studies on Safety and Efficacy 181
Katrin Roth
1 Introduction 181
2 Optimal Design in a Bivariate Model 182
2.1 Definition of the Model 182
2.2 Optimal Designs for This Model 183
3 Sequential Approach and Simulation Study 186
4 Discussion 188
References 188

A Radial Scanning Statistic for Selecting Space-filling Designs in Computer Experiments 189
Olivier Roustant, Jessica Franco, Laurent Carraro and Astrid Jourdan
1 Introduction 189
2 The Radial Scanning Statistic 190
2.1 Selecting a Goodness-of-fit Test for the Uniform Distribution 192
2.2 Graphical Properties 193
2.3 Decisional Issues 193
3 Usage and Applications 194
4 Conclusion and Further Research 195
References 196

Optimal Designs for Two-Colour Microarray Experiments for Estimating Interactions 197
Katharina Schiffl and Ralf-Dieter Hilgers
1 Introduction 197
2 Preliminaries 198
3 Optimal Designs 200
3.1 Interactions in Multi-factor Settings for the Estimation of All Pairwise Comparisons 200
3.2 Interactions in Two-factor Settings 201
4 Discussion 202
Appendix: Proof of Theorem 2 202
References 204

Discrimination Between Random and Fixed Effect Logistic Regression Models 205
Chiara Tommasi, Maria Teresa Santos-Martín and Juan Manuel Rodríguez-Díaz
1 Introduction 205
2 Logistic Regression Model 206
3 D_S-Optimality Criterion 207
4 KL-Optimality Criterion 209
5 Some Results 209
6 Appendix 210
References 212

Estimation and Optimal Designing under Latent Variable Models for Paired Comparisons Studies via a Multiplicative Algorithm 213
Bernard Torsney
1 Paired Comparisons 213
1.1 Introduction 213
1.2 The Data 214
1.3 Models 214
2 Parameter Estimation 215
3 Optimality Conditions 216
4 Algorithms 217
4.1 Multiplicative Algorithm 217
4.2 Properties of the Algorithm 217
5 Fitting Bradley-Terry Models 217
6 Local Optimal Designing 218
7 Discussion 220
