

Contents

1	Introduction to Electron Beam Curing of Composites	1
1.1	Principles of the Technique	1
1.2	Chemical Aspects of the Curing Reaction	2
1.2.1	Free Radical Polymerization	3
1.2.2	Cationic Polymerization	4
1.2.3	Network Formation	6
1.3	Parameters Affecting Electron Beam Curing	7
1.3.1	Impurities	7
1.3.2	Irradiation Dose	8
1.3.3	Initiator Content	9
1.3.4	Thermal history	9
1.3.5	Irradiation Energy	11
1.4	Electron Beam Curing Facilities	13
1.5	Safety Issues	15
2	Aspects of Electron Beam Curable Materials	17
2.1	Initiators	17
2.1.1	Onium Salt Initiators	20
2.1.1.1	Iodonium Salt Initiators	20
2.1.1.2	Sulfonium Salt Initiators	26
2.1.1.3	Other Onium Salt Initiators and Related Compounds	34
2.1.2	Metal Complex Initiators	37
2.1.2.1	Cyclopentadienyl Iron(II) Arene Complex Initiators	37
2.1.2.2	Silver Alkene Complex Initiators	39
2.2	Neat Resins	41
2.2.1	Free Radical Polymerizable Resins	41
2.2.2	Cationically Polymerizable Resins	43
2.3	Toughened Resins	45
2.3.1	Liquid Reactive Rubber	47
2.3.2	Core-Shell Rubber Particles	48
2.3.3	Thermoplastics	56
2.3.4	Block Co-polymers	67
2.3.5	Inorganic Nanoparticles	72
2.3.6	Hyperbranched Polymers	76
2.4	Interfacial Properties Between Fibers and Matrix	77
2.4.1	Fiber Surface Treatment and Use of Sizings	78
2.4.2	Processing Conditions	79
2.5	Residual Stresses	80
2.6	Effect of Post-Curing	81

3	Electron Beam Curing Applied to Composite Molding Technologies	85
3.1	Layer-by-Layer Assembly	85
3.2	Prepregging	87
3.3	Vacuum Bagging	88
3.4	Pultrusion	89
3.5	Filament Winding	89
3.6	Resin Transfer Molding (RTM) and Vacuum Assisted RTM (VARTM)	90
3.7	Lost Core Molding	91
4	Current Limitations and Potentials for Electron Beam Curing	93
4.1	Cost Analysis of Electron Beam Curing Processes	93
4.2	Comparison Between Thermal and Electron Beam Cured Materials in Terms of Properties	95
4.3	Summary of Potential Applications for Electron Beam Curing	98
5	Research Trends and Projects in the Field of Electron Beam Curing	101
6	Examples of Electron Beam Curing Applications	105
6.1	Automotive	105
6.1.1	Composite Concept Vehicle, Daimler-Chrysler	105
6.1.2	Composite Armored Vehicle, US Army	105
6.2	Aircraft Industry	107
6.2.1	Patch Repairs for Civil and Military Applications	107
6.2.2	T-38 Talon, US Air Force	109
6.2.3	F/A-18 Hornet, Northrop Grumman	110
6.3	Space Applications	111
6.3.1	Space Shuttle Venture Star, Lockheed and NASA	111
6.3.2	Satellite's Flywheel, AFS Trinity and NASA	113
6.3.3	Satellite's Reflector Dish, Acsion and CASA (Spanish space agency)	114
