

Table of Contents

List of Figures	iv
List of Tables.....	vi
Acronyms	viii
A. Foundations.....	1
I. Introduction	2
I.1 Motivation.....	2
I.2 Research Gaps and Research Questions.....	4
I.3 Structure of the Thesis	7
I.4 Research Context and Design.....	12
I.5 Anticipated Contributions.....	13
II. Background	14
II.1 Fundamentals of Demand-Side Integration	14
II.2 Demand-Side Integration for Electric Vehicles.....	19
II.3 Case Study BESIC	23
B. Assessment of Demand-Side Integration Programs.....	29
I. Supply-Side Perspective on DSI Programs – Study 1: The Value of IS to Ensure the Security of Energy Supply.....	30
I.1 Introduction	31
I.2 Research Background and Related Work.....	31
I.3 Research Design.....	32
I.4 Assumptions for an Assessment of the Energetic Impacts on Power Plant Capacities	34
I.5 Assumptions for an Assessment of the Economic Impacts.....	35
I.6 Results	37
I.7 Conclusion	39

II.	Demand-Side Perspective on DSI Programs	41
1	Study 2: Applying Demand Response Programs for EV Fleets	42
1.1	Introduction	43
1.2	Background	44
1.3	Designing a Demand Response System for Fleet Operators	46
1.4	Research Methodology	48
1.5	Results	52
1.6	Discussion	53
1.7	Conclusion	54
2	Study 3: Assessing the Potential of Different Charging Strategies for Electric Vehicle Fleets in Closed Transport Systems	56
2.1	Introduction	57
2.2	Material and Method	58
2.3	Results	69
2.4	Discussion	72
2.5	Conclusion and Policy Implications	74
3	Study 4: Simulation of Power Demand in a Maritime Container Terminal using an Event-Driven Data Acquisition Module	77
3.1	Maritime Container Terminals and Electric Mobility	78
3.2	Container Terminal Simulation Models and Energy-Related Simulation Tools	79
3.3	Towards an Event-Driven Power Demand Simulation Module	81
3.4	Simulation-Based Energy Demand at CTA	85
4	Study 5: Demand-Side Integration for Electric Transport Vehicles	87
4.1	Introduction	88
4.2	Demand-Side Integration	89
4.3	Analysis of Demand-Side Integration Programs	93
4.4	Results	101
4.5	Discussion	105
4.6	Conclusion	107
5	Study 6: Using Electric Transport Vehicles within Closed Transport Systems	109
5.1	Introduction	110
5.2	Related Work	111
5.3	Material and Method	112
5.4	Results	121
5.5	Discussion	125
5.6	Conclusion and Further Research	128

III.	Recommendations for Actions for Policymakers – Study 7: Shaping the Future Energy Market.....	130
III.1	Introduction	131
III.2	Methodology.....	132
III.3	Case Study Research Design.....	132
III.4	Main Result and Discussion	133
III.5	Conclusion and Future Outlook	135
C.	Contributions.....	137
I.	Findings and Results	138
I.1	Findings Regarding the Supply Side of the Energy Sector.....	138
I.2	Findings Regarding the Demand Side of the Energy Sector.....	139
I.3	Findings Regarding Policymakers	141
I.4	Aggregated Findings and Results.....	142
II.	Implications for Theory and Practice.....	144
II.1	Managerial Implications.....	144
II.2	Policy Implications.....	147
II.3	Implications for Energy Economic Research	148
III.	Conclusion and Further Research Opportunities	151
III.1	Limitations	153
III.2	Further Research Opportunities	154
	References.....	159
	Appendix.....	xi
