The Genetics of Multiple Sclerosis	1
Jan Hillert	
Potential Triggers of MS	21
Jane E. Libbey and Robert S. Fujinami	
Immunological Basis for the Development of Tissue Inflammation and Organ-Specific Autoimmunity in Animal Models of Multiple Sclerosis.....	43
Thomas Korn, Meike Mitsdoerffer, and Vijay K. Kuchroo	
T-Cells in Multiple Sclerosis	75
Christopher Severson and David A. Hafler	
B Cells and Antibodies in MS.....	99
Markus Reindl, Bettina Kuenz, and Thomas Berger	
Cooperation of B Cells and T Cells in the Pathogenesis of Multiple Sclerosis.....	115
Martin S. Weber and Bernhard Hemmer	
Role of NK Cells and Invariant NKT Cells in Multiple Sclerosis.....	127
Kaori Sakuishi, Sachiko Miyake, and Takashi Yamamura	
Antigen Processing and Presentation in Multiple Sclerosis	149
Christina Stoeckle and Eva Tolosa	
Immune-Mediated CNS Damage	173
Katrin Kierdorf, Yiner Wang, and Harald Neumann	
Neuro-Immune Crosstalk in CNS Diseases.....	197
Martin Kerschensteiner, Edgar Meinl, and Reinhard Hohlfeld	

Prospects for Antigen-Specific Tolerance Based Therapies for the Treatment of Multiple Sclerosis.....	217
Danielle M. Turley and Stephen D. Miller	
Immuno-Therapeutic Potential of Haematopoietic and Mesenchymal Stem Cell Transplantation in MS.....	237
Paolo A. Muraro and Antonio Uccelli	
Multiple Sclerosis Therapies: Molecular Mechanisms and Future	259
Paulo Fontoura and Hideki Garren	
Examination of the Role of MRI in Multiple Sclerosis: A Problem Orientated Approach	287
Henry F. McFarland
