|----------------------------------------------------------------------------------------------------------------|-----|
| CONTENTS .....                                                                                                 | 5   |
| PREFACE .....                                                                                                  | 7   |
| N. ALON and N. WORMALD: High Degree Graphs Contain Large-<br>Star Factors .....                                | 9   |
| S. BUTLER and R. GRAHAM: Iterated Triangle Partitions .....                                                    | 23  |
| F. CHUNG and W. ZHAO: PageRank and Random Walks on Graphs ..                                                   | 43  |
| J. CIBULKA, J. KYNČL, V. MÉSZÁROS, R. STOLAŘ and P. VALTR:<br>Solution of Peter Winkler's Pizza Problem .....  | 63  |
| B. CSABA, I. LEVITT, J. NAGY-GYÖRGY and E. SZEMERÉDI: Tight<br>Bounds for Embedding Bounded Degree Trees ..... | 95  |
| G. ELEK: Betti Numbers are Testable .....                                                                      | 139 |
| T. JORDÁN: Rigid and Globally Rigid Graphs with Pinned Vertices ..                                             | 151 |
| G. KALAI: Noise Sensitivity and Chaos in Social Choice Theory .....                                            | 173 |
| A. KOSTOCHKA, M. KUMBHAT and V. RÖDL: Coloring Uniform<br>Hypergraphs with Small Edge Degrees .....            | 213 |
| E. MARCHANT and A. THOMASON: Extremal Graphs and Multi-<br>graphs with Two Weighted Colours .....              | 239 |
| V. RÖDL and M. SCHACHT: Regularity Lemmas for Graphs .....                                                     | 287 |
| B. SZEGEDY: Edge Coloring Models as Singular Vertex Coloring<br>Models .....                                   | 327 |
| T.-L. WONG, D. YANG and X. ZHU: List Total Weighting of Graphs                                                 | 337 |
| OPEN PROBLEMS .....                                                                                            | 355 |
