

Contents

1 Introduction — 1

- 1.1 Goal of the study — 1
- 1.2 Subject materials — 3
- 1.3 The Shanghai Museum “Zhouyi 周易” manuscript — 7
- 1.4 The *Shuowen jiezi* in the light of the Warring States manuscripts — 15
 - 1.4.1 Three archaic scripts, *xiaozhuan*, *guwen* and *Zhouwen* — 15
 - 1.4.2 The *xiaozhuan* ‘Small Seal script’ as a regional variety of the Warring States script — 17
 - 1.4.3 The identity of the *Zhouwen* ‘Script of Scribe Zhou’ and *guwen* ‘Old script’ — 22

2 The Old Chinese phonology — 31

- 2.1 Manuscripts as new sources of data for Old Chinese — 31
- 2.2 A reconstruction system of Old Chinese phonology — 34
 - 2.2.1 Overview — 36
 - 2.2.1.1 The third vs. non-third division syllables and the second division medial *-r- — 37
 - 2.2.1.2 The initial *-r- — 38
 - 2.2.1.3 The initials *-l- and *[g]- — 38
 - 2.2.1.4 The initials *-z-, *-s-g- and *-s-d- — 40
 - 2.2.1.5 Uvular initials — 41
 - 2.2.1.6 The diphthongs -wa- and -wə- — 41
 - 2.2.1.7 Nasal initials, *-N- prefix, *-s- prefix — 42
 - 2.2.1.8 Sources of MC sy- — 46
 - 2.2.1.9 Palatalization of velar and uvular initials — 46
 - 2.2.1.10 The coda *-r — 49
 - 2.2.1.11 The post-codas *-ʔ and *-s, and *-s as a suffix — 51
 - 2.2.1.12 Inventories of simple initials and rhymes — 55
 - 2.2.2 Two notes — 57
 - 2.2.2.1 The uvulars — 57
 - 2.2.2.2 A reconsideration of the ‘Rounded vowel hypothesis’ — 66

3 The Shanghai “Zhouyi” and the Warring States script — 73

- 3.1 Elaborate and casual styles — 73
- 3.2 Decorative strokes — 83
- 3.3 Simplification and development of the Warring States script — 87

3.3.1	Stroke simplification —	88
3.3.2	Simplification of graphic components —	91
3.3.2.1	Deletion and interruption of components —	91
3.3.2.2	Replacement by simpler forms —	93
3.3.2.3	Compression and merger of components —	94
3.3.3	Simplification and residue of iconicity —	98
3.3.3.1	Diminishment of heavy dots, thick lines, and fillings —	98
3.3.3.2	Neutralization of iconicity —	101
3.3.3.3	Transition to the Warring States script —	102
3.4	Structural variability in the early Chinese writing system —	106
3.4.1	Graphic components and functional values —	107
3.4.2	The tendency towards Signific-Phonophoric compound structure —	109
3.4.2.1	Increase of compound characters in the Warring States script —	111
3.4.2.2	Consequences for textual variation —	115
3.4.2.3	The case of Shanghai “Zhouyi” and the received version —	117
3.4.3	The case of the <i>fu</i> 簋 vessel —	123
4	The Chu Script —	139
4.1	The Five-region script system —	139
4.2	The Common Warring States character forms —	142
4.3	Chu regional character forms —	143
4.3.1	Regional variation in componential structure —	144
4.3.2	Regional variation in use of decorative strokes —	153
4.3.3	Regional variation in simplified forms —	155
4.3.4	Regional character shapes —	162
4.4	The nature of regionalism in the Warring States script —	166
4.5	Some ‘true’ Chu characters for a diagnosis of the Chu script —	169
5	The Shanghai “Zhouyi” and the Early Chinese Orthography —	171
5.1	Synonymous Significs —	171
5.2	Equivalent phonophorics —	196
5.2.1	Phonophorics in the early Chinese orthography —	199
5.2.2	Western Zhou and Chu phonophorics —	208
5.2.3	Negative particles —	215
5.2.4	Sound symbolism and Phonograms —	220
5.2.5	Old Chinese dialect words —	222
5.2.6	Etymological relations —	227

5.2.7 Phonologically motivated lexical variation — 239

6 Conclusions — 241

6.1 The last phase of the early Chinese writing system — 241

6.2 Regionalism in a single script system — 242

6.3 The Old Chinese phonology and the early Chinese
orthography — 243

6.4 Further implications — 244

Appendix I: A Lexicon of the Shanghai “Zhouyi” — 247

**Appendix II: Index of Synonymous Significs and Equivalent
Phonophorics — 311**

Index of Equivalent Phonophorics — 317
