List of Figures	ix
List of Tables	xiii
Glossary	1
List of Symbols	3
1 Introduction	7
1.1 Thesis Contributions	8
1.2 Dissertation Outline	10
2 Pseudolites: System Concept	13
2.1 Fundamentals on Pseudolites	13
2.1.1 Challenges in Pseudolite Systems	14
2.1.2 Types of Pseudolites	15
2.2 Current Pseudolite Systems	17
2.2.1 Historical Background	17
2.2.2 SCPA: Self-Calibrating Pseudolite Array	18
2.2.3 SNU: Pseudolite System of the Seoul National University	21
2.2.4 LOCATA	26
2.3 A Flexible Pseudolite System: PLIIS	28
2.3.1 RedFIR: Sport tracking system	28
2.3.2 PLIIS	31
2.4 Summary	32

3	Virtually Synchronised Pseudolites	37
3.1	Concept	37
3.2	Frequency Sources: Power-Law Identification Techniques	38
3.2.1	Clock Characterisation in Frequency Domain	40
3.2.2	Clock Characterisation in Time Domain	44
3.3	Modelling Clock Behaviour	49
3.4	Modelling PLIIS Clocks	52
3.4.1	Measurement Equations	52
3.4.2	Modelling Using Power-Law Identification	57
3.4.3	Other Approaches	70
3.5	Estimation of Clock Deviations	71
3.5.1	Dynamic Model	72
3.5.2	Measurement Model	74
3.5.3	Estimator at the Reference Station	75
3.5.4	Predictor at the Rover	76
3.6	Simulation Results	78
3.7	Summary	82
4	Localization of Pseudolite Transmitters	83
4.1	Transmitter Localization Concept	83
4.2	Measurement Model	85
4.3	Transmitter Position Estimation	88
4.3.1	Least Squares Approach	89
4.3.2	Kalman Filter Based Approach	93
4.3.3	SLAM Based Approach	97
4.4	Multipath Effects On Transmitter Localization	103
4.4.1	Multipath Propagation from Transmitter to Reference Station	103
4.4.2	Multipath Between Transmitters and Rover	105
4.5	Results	106
4.6	Summary	115

5	Fault Detection and Identification for a Pseudolite System	117
5.1	State of the Art in Fault Detection and Identification	118
5.1.1	Linear Measurement System	118
5.1.2	Parity Space	119
5.1.3	Fault Detection	121
5.1.4	Single Fault Identification	122
5.2	Fault Identification Using KOSIF	130
5.2.1	Detection Using Multiple Realisations of Measurement Vector . .	131
5.2.2	Identification of Faulty Measurements, Multiple Realisations . .	138
5.2.3	Application of KOSIF to a Single Measurement Vector	150
5.3	KOSIF Applied to the Localization of Pseudolite Transmitters	156
5.4	Results	158
5.5	Summary	163
6	Phase Unwrapping in PLIIS	165
6.1	Tracking Loops in GNSS	166
6.2	Tracking in PLIIS	167
6.3	Classical Unwrapping	170
6.4	Kalman Observer	171
6.5	Results	174
6.6	Summary	176
7	Tests and Results	177
7.1	Test System	177
7.2	Verification of Virtual Synchronisation	179
7.3	Verification of the Fault-Tolerant Transmitter Localization	182
7.3.1	Scenario	183
7.3.2	Navigation Without Considering Absolute Clock Errors	184
7.3.3	Transmitter Position Estimation	184
7.3.4	Navigation in the Calibrated System	191
7.4	Summary	194

CONTENTS

8	Conclusions and Further Research	195
8.1	Conclusions	195
8.2	Further Research	197
A	Window Functions for Power-Law Identification	199
B	Example of KOSIF Applied to a Straight Line Regression	203
	Bibliography	207
