Part I - Multimedia Information Technology

1 Interseum - From Physical to Virtual Showrooms	3
<i>Tanja Woronowicz, Peter Hoffmann, and Michael Boronowsky</i>	
1.1 Introduction.....	3
1.2 The Showroom Concept.....	5
1.2.1 The Physical Showroom.....	5
1.2.2 Concept of the Virtual Showroom “Interseum”.....	8
1.3 Conclusions.....	12
References.....	12
 2 The Synchronization of the Images Based on Normalized Mean Square Error Algorithm	 15
<i>Jakub Pęksiński and Grzegorz Mikołajczak</i>	
2.1 Introduction.....	15
2.2 The Principle of the Algorithm of Determination of the Rotation Axis and Angle Based on the NMSE	20
2.3 The Experimental Results	23
2.4 Conclusions.....	24
References.....	24
 3 Evaluation of the Separation Algorithm Performance Employing ANNs	 27
<i>Marek Dziubiński and Bożena Kostek</i>	
3.1 Introduction.....	27
3.2 AMT System Engineered at the MSD.....	28
3.3 Experiment Lay-Out	31
3.4 Comparative Analysis of the ANN-Based Recognition Results, Subjective Tests and Energy-Based Separation Error Evaluation.....	34
3.5 Conclusions.....	36
References.....	36

4 Localization of Sound Source Direction in Real Time.....	39
<i>Eugeniusz Kornatowski</i>	
4.1 Introduction.....	39
4.2 A and B Formats	40
4.2.1 Analysis of “Soundfield” Microphone Operation Principle	42
4.3 Experimental Testing	44
4.4 Conclusions.....	47
References.....	47
5 Dangerous Sound Event Recognition Using Support Vector Machine	
Classifiers	49
<i>Kuba Łopatka, Paweł Zwan, and Andrzej Czyżewski</i>	
5.1 Introduction.....	49
5.2 Feature Extraction.....	50
5.2.1 Energy-Based Parameters.....	50
5.2.2 Transient-Sensitive Parameters	51
5.2.3 MPEG-7 Features	52
5.3 Building SVM Model.....	53
5.3.1 Principles of Support Vector Machine Classification.....	53
5.3.2 Parameters of the Model.....	55
5.4 Classification Results.....	55
5.5 Conclusions.....	56
References.....	56
6 Noise Tolerant Community Detection Using a Mixed Graph Model.....	59
<i>Anita Keszler, Akos Kiss, and Tamas Sziranyi</i>	
6.1 Introduction.....	59
6.2 Overview of Previous Methods.....	60
6.2.1 What to Model by a Graph?.....	60
6.2.2 How to Build Up the Graph?.....	60
6.2.3 How to Define a Group?.....	60
6.3 The New Algorithm	62
6.3.1 The Model	62
6.3.2 Handling Noisy and Missing Data.....	63
6.3.3 Finding Cores of Clusters Using Complete Information Vectors.....	63
6.3.4 Clustering the Nodes Using a Bipartite Graph and Fuzzy Membership Functions	64
6.4 Test Results.....	66
6.5 Conclusions.....	67
References.....	68

7 Fuzzy Rule-Based Dynamic Gesture Recognition Employing Camera and Multimedia Projector69
Michał Lech and Bożena Kostek

7.1 Introduction.....69

7.1.1 Study Objectives.....70

7.2 System Overview71

7.2.1 Methodology.....71

7.2.2 Image Processing.....72

7.2.3 Hand Motion Modeling72

7.2.4 Fuzzy Rule-Based Gesture Recognition74

7.3 Results.....75

7.4 Conclusions.....77

References.....78

8 Video Structure Analysis and Content-Based Indexing in the Automatic Video Indexer AVI.....79
Kazimierz Choroś

8.1 Introduction.....79

8.2 Related Works.....80

8.3 Text Structure vs. Video Structure.....82

8.4 AVI – Automatic Video Indexer.....83

8.5 Temporal Segmentation Process.....84

8.6 Automatic Scene Detection.....86

8.6.1 Shot clustering.....86

8.6.2 TV Sports News Categorization87

8.6.3 Scene Repetitive Patterns88

8.7 Final Conclusion and Further Studies89

References.....89

Part II - Data Processing in Information Systems

9 Acoustic Radar Employing Particle Velocity Sensors93
Józef Kotus and Andrzej Czyżewski

9.1 Introduction.....93

9.2 Acoustic Particle Velocity Sensors94

9.3 The Algorithm of the Acoustic Radar95

9.4 Practical Evaluation of the Acoustic Radar.....96

9.5 Measurement results95

9.5.1 The Pure Tone Measurement Results95

9.5.2 One-Third Octave Band Noise Measurement Results100

9.5.3 The Impulsive Sounds Measurement Results.....101

9.5.4 PTZ Camera Control102

9.6 Conclusions.....102

References.....102

10 Superresolution Algorithm to Video Surveillance System	105
<i>Tomasz Merta and Andrzej Czyżewski</i>	
10.1 Introduction	105
10.2 Multiframe Superresolution Algorithm	106
10.3 Superresolution Challenges in Surveillance System	107
10.4 Algorithm	109
10.5 Experiment	109
10.6 Conclusion	111
References	112
11 Social Network Analysis in Corporate Management	113
<i>Sebastian Palus and Przemysław Kazienko</i>	
11.1 Introduction	113
11.2 Social Network Approach to Corporate Assessment	114
11.2.1 Social Network Extraction	114
11.2.2 Comparison with Corporate Hierarchy	115
11.3 Static Analysis of Social Networks	116
11.3.1 Centralities	116
11.3.2 Social Groups	116
11.3.3 Lonely Entities	117
11.4 Dynamic Social Network Analysis	117
11.5 Social Concept Networks (SCN)	117
11.6 Discussion	118
11.6.1 Profile of Relationships	118
11.6.2 Decision Making	118
11.7 Conclusions and Future Work	118
References	119
12 AAM Toolkit: A System for Visual Object Appearance Modeling	121
<i>Maciej Smiatacz and Damian Sikora</i>	
12.1 Introduction	121
12.2 The Architecture of AAM Toolkit	122
12.2.1 Training Set Creator	123
12.2.2 Model Creator	144
12.2.3 Regression Matrix Creator	127
12.3 Experiments	128
12.4 Conclusions	129
References	129
13 Service Discovery Approach Based on Rough Sets for SOA Systems	131
<i>Krzysztof Brzostowski, Jakub M. Tomczak, Witold Rekuć, and Janusz Sobecki</i>	
13.1 Introduction	131
13.2 Service Discovery Problem	132
13.2.1 Problem Statement	132
13.2.2 Service Discovery in SOA Systems	133

13.2.3	SLA Contract Negotiation and Translation Using Ontologies	133
13.2.4	Performance Index for Matchmaking	134
13.3	Rough Set-Based Approach	135
13.3.1	Rough Set Theory – Fundamental Definitions	135
13.3.2	Rough Set-Based Approach.....	137
13.4	Application.....	137
13.4.1	Ontology of Vehicle Services.....	137
13.4.2	Illustrative Example.....	139
13.5	Discussion and Future Works	140
	References.....	141
14	Towards Self-defending Mechanisms Using Data Mining in the EFIPSANS Framework	143
	<i>Krzysztof Cabaj, Krzysztof Szczypiorski, and Sheila Becker</i>	
14.1	Introduction.....	143
14.2	Self-Defending Functionality.....	144
14.3	Current Threats to Be Detected.....	145
14.4	Method of Detection	145
14.5	Experiments and Results	147
14.6	Conclusions and Future Work.....	150
	References.....	150
 Part III - Information Systems Applications		
15	User Adaptivity Features of Secured Biomedical User Adaptive System.....	155
	<i>Dalibor Janckulik, Leona Motalova, Ondrej Krejcar, and Petr Czekaj</i>	
15.1	Introduction.....	155
15.2	The User Adaptivity of the System	156
15.2.1	Logged User Context Adapting.....	157
15.2.2	UI Adapting by Interaction.....	157
15.2.3	Smart Environment Adaptation.....	157
15.2.4	Hardware Adaptability	158
15.3	Architecture and Backgrounds of Biomedical Adaptive System	158
15.3.1	Server and Database Parts	158
15.3.2	Embedded and Desktop Part.....	159
15.3.3	Mobile Parts.....	160
15.4	Safety Features in our System.....	160
15.5	User Interface Designing Adaptation.....	162
15.6	Visualization Adaptation.....	162
15.7	Conclusions.....	163
	References.....	164

16 Exploration of Continuous Sequential Patterns Using the CPGrowth Algorithm	165
<i>Marcin Gorawski, Pawel Jureczek, and Michal Gorawski</i>	
16.1 Introduction.....	165
16.2 Continuous Sequential Patterns.....	166
16.3 The UCP-Tree Index and the CPGrowth Algorithm.....	167
16.4 Pseudocodes	169
16.5 Experiments	170
16.6 Conclusion	171
References.....	171
17 Detecting New and Unknown Malwares Using Honeynet.....	173
<i>Michał Szczepanik and Ireneusz Józwiak</i>	
17.1 Introduction.....	173
17.2 Honeypot's Network	174
17.3 Malware	175
17.4 Multi-agents System in a Honeynet	176
17.5 Detection of Malicious Traffic.....	178
17.6 Conclusion	179
References.....	180
18 Average Prior Distribution of All Possible Probability Density Distributions.....	181
<i>Andrzej Piegat and Marek Landowski</i>	
18.1 Introduction.....	181
18.2 Safe A Priori Distribution of Probability Density in the Case of Complete Ignorance of the Real Distribution.....	182
18.3 The Average Distribution in the Case When the Real, Unknown Distribution is Unimodal.....	186
18.4 Conclusions.....	190
References.....	190
19 Interactive Visualization of a Product Search Space.....	191
<i>Michał Ciesielczyk, Andrzej Szwabę, and Czesław Jędrzejek</i>	
19.1 Introduction.....	191
19.2 Related work	192
19.3 Requirements	193
19.4 Methodology	194
19.5 Presentation of the System Use.....	197
19.5.1 Use Case I – Searching an Item	197
19.5.2 Use case II – Navigating through a Vector Space	199
19.5.3 Use case III – Comparing Data Entity Arrangement Algorithms.....	199
19.6 Conclusions and Future Work.....	199
References.....	201

Part IV - Web Systems and Network Technologies

20 Adaptive User Profile in Web IR System with Heuristic-Based Acquisition of Significant Terms	205
<i>Agnieszka Indyka-Piasecka</i>	
20.1 Introduction.....	205
20.2 Analysis of Web System Answer.....	206
20.2.1 Relevant Document's Terms Weighting.....	207
20.2.2 Significant Terms Selection from Relevant Documents.....	207
20.3 User Profile	209
20.4 Modification of User Profile	210
20.5 Experiments	211
20.6 Conclusions and Future Work.....	213
References.....	213
21 Vertical Search Strategy in Federated Environment	215
<i>Jolanta Mizera-Pietraszko and Aleksander Zgrzywa</i>	
21.1 Introduction.....	215
21.1.1 Methodology and a Draft of the Research Overall Framework....	216
21.1.2 Related Work.....	218
21.2 Semantic Mutual Resemblance of Bi-Texts.....	218
21.2.1 Multilingual Information Technologies.....	221
21.2.2 Multilingual Federated Environment.....	222
21.2.3 Access to the Deep Web.....	223
21.3 Query Models Efficiency in Translingual Retrieval	224
21.4 Vertical Search Strategy.....	225
21.5 Conclusion	226
References.....	227
22 Music Information Retrieval on the Internet.....	229
<i>Zygmunt Mazur and Konrad Wiklak</i>	
22.1 Introduction.....	229
22.2 Differences and Similarities between Music Information Retrieval and Text Information Retrieval	230
22.3 The Method of Extracting Information from Audio Files.....	231
22.4 Internet Music Information Retrieval Systems Based on MIDI Files.....	232
22.5 Algorithms for Songs Identification Based on Spectral Analysis and Fingerprint Generation	235
22.6 The Method of Updating Missing Metadata in Audio Files.....	236
22.7 Algorithms for Positioning Search Results Music Files URLs	237
22.8 Proposals for Quality Measures of Contemporary Internet Music Information Retrieval Systems.....	239
22.8.1 The File Retrieval Module.....	240
22.8.2 The Music Search Engine Module	241

22.9 The Trends in Development of Internet Music Information Retrieval Systems.....	242
References.....	243
Abbreviations.....	243
23 Verifying Text Similarity Measures for Two Layered Retrieval.....	245
<i>Andrzej Siemiński</i>	
23.1 Introduction.....	245
23.2 Two Layered Retrieval.....	246
23.3 Statistical Full Text Search	247
23.4 Semantic Full Text Search	248
23.4.1 BestSim Measure.....	248
23.4.2 The SimSum Measure	249
23.4.3 ExtSim Measure	250
23.4.5 Synsets Based Measures.....	250
23.4.6 Semantic Groups Based Measures.....	251
23.5 Verification	251
23.6 Conclusions.....	254
References.....	254
24 Verification of Open Source Web Frameworks for Java Platform.....	257
<i>Dariusz Król and Jacek Panachida</i>	
24.1 Introduction.....	257
24.2 Application Performance Study	258
24.3 Java Metrics Study	259
24.4 Page Templates Study	262
24.5 Accessibility and Maintainability Study of Trinidad Components	263
24.6 Conclusions and Future Work.....	265
References.....	266
Part V - E-Learning Platforms	
25 E-learning Usability Testing Platform.....	269
<i>Adam Wojciechowski and Pawel Meller</i>	
25.1 Introduction.....	269
25.2 Web Usability Testing.....	270
25.3 Testing and Measuring Web Usability.....	271
25.4 User Activity Tracking Platform.....	272
25.5 Tests	274
25.6 Conclusions and Future Work.....	277
References.....	277
26 E-learning in Teaching the Object Oriented Programming	279
<i>Jerzy Kisilewicz</i>	
26.1 Introduction.....	279
26.2 Materials for Students	280
26.3 Materials for Teachers.....	283
26.4 System of the e-Learning Materials	284

26.5 Conclusion	285
References	285
27 Analytical Framework for Mirroring and Reflection of User Activities in E-Learning Environment.....	287
<i>František Babič, Ján Paralič, Peter Bednár, Michal Raček</i>	
27.1 Introduction	287
27.1.1 Related Work	288
27.2 Technical Description of the Analytical Framework	289
27.2.1 Data for Analyses as Log of Events	290
27.2.2 Experimental Integration with Selected Systems	291
27.3 Analytical Approaches	292
27.3.1 Time-Line Based Analyses	292
27.3.2 Evaluation within KP-Lab System	293
27.4 Conclusions	295
References	295
28 The Paradigm of Screencasting in E-Learning	297
<i>Marek Kopel</i>	
28.1 Introduction	297
28.2 Educational Aspects of Screencasting	298
28.3 Experiment	299
28.4 Results and Discussion	301
28.5 Conclusions	304
References	304
29 An Opened Agent-Oriented System for Collaborative Learning	307
<i>Mazyad Hanaa and Kerkeni Insaf</i>	
29.1 Introduction	307
29.2 MAETIC Method	308
29.2.1 Description of the Method	308
29.2.2 Contribution of Multi-agents System	308
29.2.3 Related Works	309
29.3 A Multi-Agent Approach for Modeling a Collaborative Learning System	309
29.3.1 The System Modeling	310
29.3.2 The Analysis Phase	310
29.3.3 The Design Phase	311
29.3.4 The Relaiization Phase	312
29.3.5 The COLYPAN System	312
29.4 The Group Working Way	313
29.5 Conclusion and Future Work	315
References	316
Author Index.....	317
