

Table of contents

Acknowledgement	I
Zusammenfassung	II
Summary.....	VIII
Table of contents	XIII
List of figures.....	XVI
List of tables	XXII
List of symbols	XXIII
1 Introduction.....	1
2 Assembly and reliability issues of LED packages	5
2.1 LED assembly	5
2.2 LED device	7
2.3 Process chain of LED assembly	9
2.4 Reliability issues	11
3 Thermo-mechanical properties of LED components	14
3.1 Thermal expansion.....	14
3.2 Linear elastic material response.....	15
3.3 Thermal properties	17
3.4 The encapsulant.....	18
3.4.1 Epoxy	18
3.4.2 Silicone.....	22
3.5 Summary of material properties.....	25
4 Non-linear elastic strain response	26
4.1 Viscoelasticity of epoxy.....	27
4.2 Hyperelasticity of silicone	33
4.3 Curing	35

5	Interaction with moisture	39
5.1	Moisture Diffusion.....	40
5.1.1	Moisture diffusion in pure epoxy	42
5.1.2	Moisture diffusion in glass fiber reinforced PPA	49
5.1.3	Moisture diffusion in pure silicone	53
5.2	Hygroscopic swelling.....	54
5.2.1	Hygroscopic swelling of epoxy.....	55
5.2.2	Hygroscopic swelling of PPA	58
5.2.3	Hygroscopic swelling of silicone	60
5.3	Moisture induced change in stress relaxation	61
6	Degradation of silicone bulk material and silicone/PPA interface	66
6.1	Temperature-induced bulk degradation	66
6.1.1	Weight loss during degradation	67
6.1.2	Degradation Shrinkage	70
6.1.3	Silicone hardening.....	72
6.1.4	Change of the coefficient of thermal expansion	74
6.1.5	Fracture stress.....	75
6.1.6	Implementation of degradation in FEM	76
6.2	Interface degradation.....	80
6.2.1	Brief introduction to fracture mechanics.....	80
6.2.2	Adhesion tests and sample preparation	82
6.2.3	Experimental setup to investigate the influence of light on adhesion.....	86
6.2.4	Silicone to PPA interface adhesion properties	88
6.2.5	Degradation kinetics.....	92
6.2.6	Implementation in FEM	94
7	Stress simulation and reliability prognosis of LED packages	100
7.1	Cracks in the silicone encapsulant	100

7.1.1	Assembly and typical failure – white high power LED	100
7.1.2	Thermal model	102
7.1.3	Simulation of the Solid State Lighting Test (SSLT)	107
7.1.4	Conclusion and Outlook.....	109
7.2	Adhesion failure in silicone casted package	111
7.2.1	Assembly and typical failure – white high power LED	111
7.2.2	Optical model – determination of irradiation dose	113
7.2.3	Simulation of delamination during steady state operation ...	113
7.2.4	Conclusion and Outlook.....	115
7.3	Glue failure in epoxy casted package	117
7.3.1	Assembly and failure – low power LED	117
7.3.2	Thermo-mechanical-diffusion model	119
7.3.3	Thermo-diffusion results	122
7.3.4	Structural analysis	125
7.3.5	Conclusion and outlook.....	128
8	References.....	131
