Foreword by Liming Li	x
Foreword by Guixing Qiu	xi
Foreword by Robert D. D'Ambrosia	xii
Foreword by Roy Sanders	xiii
Preface	xiv
Acknowledgments	xv
How to Use This Book	xviii
1 General Information	1
Fractures Overview	1
Fracture Classification	1
Bones	3
Segments	3
Types	4
Group and Subgroup	4
Epidemiologic Study of Fractures	4
Incidence of Sex-specific Fractures	5
Fracture Location	10
Fractures in Children	10
2 Fractures of the Humerus	11
Overview	11
Anatomical Features	11
AO Classification and Coding System for Humeral Fractures	12
Clinical Epidemiologic Features of Humeral Fractures	12
Humeral Fractures by Location	15
Proximal Humeral Fractures (Segment 11)	16
Anatomical Features	16
AO Classification of Proximal Humeral Fractures	17
Clinical Epidemiologic Features of Proximal Fractures (Segment 11)	17
Injury Mechanism	31
Diagnosis	31
Treatment	32
Humerus Shaft Fractures (Segment 12)	33
Anatomical Features	33
AO Classification of Humeral Shaft Fractures	33
Clinical Epidemiologic Features of Humeral Shaft Fractures (Segment 12)	34
Injury Mechanism	47
Diagnosis	47
Treatment	47
Distal Humeral Fractures (Segment 13)	48
Anatomical Features	48
AO Classification of Distal Humeral Fractures	49
Clinical Epidemiologic Features of Distal Humeral Fractures (Segment 13)	50
Injury Mechanism	63
Diagnosis	63
Treatment	63
Other Classifications of Humeral Fractures	63
The Neer Classification of Proximal Humeral Fractures	63
Overview	63
Clinical Epidemiologic Features for Neer Classification	66
Classification of Humeral Fractures by Fracture Location	67
Supracondylar Humeral Fractures	67
Intercondylar Humeral Fractures	72
Lateral Humeral Condylar Fractures	75
Medial Humeral Condylar Fractures	79
Lateral Humeral Epicondyle Fractures	83
Medial Humeral Epicondyle Fractures	86
Humeral Capitellum Fractures	89
3 Fractures of the Ulna and Radius	95
Overview	95
Anatomical Features	95
AO Classification and Coding System for Fractures of the Ulna and Radius	95
Clinical Epidemiologic Features of Radius/Ulna Fractures	96
Proximal Fractures of the Radius and Ulna (Segment 21)	101
Anatomical Features	101
AO Classification of Proximal Radius/Ulna Fractures	101
Clinical Epidemiologic Features of the Proximal Radius/Ulna Fractures (Segment 21)	102
Injury Mechanism	116
Olecranon Fractures	116

Fractures of the Radial Head or Neck of the Radius	116	Proximal Femoral Fractures (Segment 31)	177
Coronoid Fractures	116	Anatomical Features	177
Diagnosis	116	AO Classification of Proximal Femoral Fractures	177
Treatment	116	Clinical Epidemiologic Features of Proximal Femoral Fractures (Segment 31)	178
Fractures of the Radial/Ulnar Shaft (Segment 22)	117	Injury Mechanism	192
Anatomical Features	117	Diagnosis	192
AO Classification of Fractures of Radial/Ulnar Shaft	117	Intertrochanteric Fracture	192
Clinical Epidemiologic Features of the Radial/Ulnar Shaft Fractures (Segment 22)	118	Femoral Neck Fractures	192
Injury Mechanism	132	Femoral Head Fractures	192
Radial Shaft Fractures	132	Treatment	193
Ulnar Shaft Fractures	132	Intertrochanteric Fractures	193
Fractures of the Shaft of the Radius and Ulna	132	Femoral Neck Fractures	193
Diagnosis	132	Femoral Head Fractures	193
Treatment	132	Diaphyseal Femoral Fractures (Segment 32)	193
Distal Fractures of the Radius and Ulna (Segment 23)	132	Anatomical Features	193
Anatomical Features	132	AO Classification of Diaphyseal Femoral Fractures	194
AO Classification of Distal Fractures of the Radius and Ulna	133	Clinical Epidemiologic Features of Diaphyseal Femoral Fractures (Segment 32)	195
Clinical Epidemiologic Features of Distal Fractures of the Radius and Ulna (Segment 23)	134	Injury Mechanism	209
Injury Mechanism	148	Diagnosis	209
Diagnosis	148	Treatment	209
Treatment	148	Distal Femoral Fractures (Segment 33)	209
Other Classifications of Fractures of the Radius and Ulna	148	Anatomical Features	209
Monteggia Fractures	148	AO Classification of Distal Femoral Fractures	210
Overview	148	Clinical Epidemiologic Features of Distal Femoral Fractures (Segment 33)	210
Clinical Epidemiologic Features of Monteggia Fractures	151	Injury Mechanism	224
Galeazzi Fractures	155	Supracondylar Femoral Fractures	224
Overview	155	Femoral Condyle Fractures	224
Clinical Epidemiologic Features of Galeazzi Fractures	155	Diagnosis	224
Colles Fractures	157	Treatment	224
Overview	157	Other Classification of Femoral Fractures	224
Clinical Epidemiologic Features of Colles Fractures	158	Evans' Classification of Trochanteric Fractures of the Femur	224
Smith Fractures	161	Garden Classification of Femoral Neck Fractures	227
Overview	161	Pipkin Classification of Femoral Head Fractures	230
Clinical Epidemiologic Features of Smith Fractures	162	5 Fractures of the Tibia and Fibula	235
Barton Fractures	166	Overview	235
Overview	166	Anatomical Features	235
Clinical Epidemiologic Features of Barton Fractures	167	AO Classification and Coding System of Fractures of the Tibia and Fibula	236
4 Fractures of the Femur	171	Clinical Epidemiologic Features of Fractures of the Tibia and Fibula	236
Overview	171	Proximal Tibial Fractures (Segment 41)	240
Anatomical Features	171	Anatomical Features	240
AO Classification and Coding System for Femoral Fractures	172	AO Classification of Proximal Tibial Fractures	241
Clinical Epidemiologic Features of Femoral Fractures	172	Clinical Epidemiologic Features of Proximal Tibial Fractures (Segment 41)	241
		Injury Mechanism	256
		Diagnosis	256
		Treatment	256
		Tibial Diaphyseal Fractures (Segment 42)	256
		Anatomical Features	256

AO Classification of Tibial Diaphyseal Fractures	257	Thoracolumbar Fractures	
Clinical Epidemiologic Features		(Segments 52 and 53)	338
of Tibial Diaphyseal Fractures (Segment 42)	257	Anatomical Features	338
Injury Mechanism	272	AO Classification of	
Diagnosis	272	Thoracolumbar Spine Fractures	338
Treatment	272	Clinical Epidemiologic Features of Fractures of the	
		Thoracolumbar Spine (Segments 52 and 53)	339
Distal Tibial Fractures (Segment 43)	272	Injury Mechanism	347
Anatomical Features	272	Diagnosis	347
AO Classification of Distal Tibial Fractures	272	Treatment	347
Clinical Epidemiologic Features		Further Classification of	
of Distal Tibial Fractures (Segment 43)	273	Thoracolumbar Spine Fractures	348
Injury Mechanism	287	Denis Classification	348
Diagnosis	287		
Treatment	287		
Malleolar Injury (Segment 44)	287	7 Fractures of the Pelvic Ring and	
Anatomical Features	287	Acetabulum	351
AO Classification of Malleolar Injury	288		
Clinical Epidemiologic Features		Overview	351
of Malleolar Injury (Segment 44)	290	Anatomical Features	351
Injury Mechanism	303	AO Classification and Coding System for Fractures	
Diagnosis	303	of the Pelvic Ring and Acetabulum	352
Treatment	303	Clinical Epidemiologic Features of Fractures	
		of the Pelvic Ring and Acetabulum	352
Commonly Used Classification		Pelvic Ring Fractures (Segment 61)	358
for Fractures of the Tibia and Fibula	303	Anatomical Features	358
Tibial Plateau Fractures	303	AO Classification of Pelvic Ring Fractures	358
Overview	303	Clinical Epidemiologic Features	
Clinical Epidemiologic Features		of Pelvic Ring Fractures (Segment 61)	359
of Tibial Plateau Fractures	306	Injury Mechanism	373
Pilon Fractures	309	Diagnosis	373
Overview	309	Treatment	373
Epidemiologic Features of Pilon Fractures	311		
6 Fractures of the Spine	315	Acetabular Fractures (Segment 62)	374
Overview	315	Anatomical Features	374
Anatomical Features	315	AO Classification of Acetabular Fractures	374
AO Classification and Coding System		Clinical Epidemiologic Features of	
for Spine Fractures	316	Acetabular Fractures (Segment 62)	376
Clinical Epidemiologic Features of Fractures		Injury Mechanism	390
of the Spinal Column	317	Diagnosis	390
		Treatment	390
		Surgical Treatment	390
Cervical Fractures (Segment 51)	320	Other Classifications for Fractures	
Anatomical Features	320	of the Pelvic Ring and Acetabulum	391
AO Classification of Cervical Spine Fractures	321	Tile Classification of Pelvic Ring Fractures	391
Clinical Epidemiologic Features of Fractures of the		Overview	391
Upper Cervical Spine (Segment 51.01–51.02)	322	Young–Burgess Classification	
Clinical Epidemiologic Features of Fractures of the		of Pelvic Ring Fractures	395
Lower Cervical Spine (Segment 51.03–51.07)	329	Overview	395
Injury Mechanism	334	Epidemiologic Features of Pelvic Ring Fractures	
Diagnosis	334	based on the Young–Burgess Classification	396
Treatment	334	Letournel Classification of Pelvic Ring Fractures	404
Further Classification of Cervical Spine Fractures	335	Special Type of Pelvic Ring Fracture: Bilateral	
Anderson Classification of		Sacroiliac Dislocation with an	
Odontoid Fractures	335	Intact Anterior Pelvic Ring	405
Hangman's Fracture	335	Letournel–Judet Classification	
Levine-Edwards Classification		of Acetabular Fractures	405
of Hangman's Fracture	335	Overview	405
Allen-Ferguson Classification		Epidemiologic Features of Acetabular Fractures	
of Lower Cervical Spine Fractures	335	Based on the Letournel–Judet Classification	406
		Tile Classification of Acetabular Fractures	411

8 Fractures of the Hand	413	Clinical Epidemiologic Features of Foot Fractures	486
Overview	413	Talus Fractures (Segment 81)	491
Anatomical Features	413	Anatomical Features	491
OTA Classification and Coding System for Hand Fractures	413	OTA Classification of Talus Fractures	491
Clinical Epidemiologic Features of Hand Fractures	413	Clinical Epidemiologic Features of Talus Fractures	492
Carpal Fractures (Segments 71–76)	418	Injury Mechanism	504
Anatomical Features	418	Diagnosis	504
OTA Classification of Carpal Fractures	418	Treatment	505
Clinical Epidemiologic Features of Carpal Fractures (Segments 71–76)	418	Other Common Classifications of Talus Fractures	505
Injury Mechanism	434	Calcaneus Fractures (Segment 82)	509
Diagnosis	434	Anatomical Features	509
Treatment	434	OTA Classification of Calcaneal Fractures	510
Further Classification of Scaphoid Fractures	434	Clinical Epidemiologic Features of Calcaneal Fractures (Segment 82)	511
Anatomical Features and Coding System	434	Injury Mechanism	520
Clinical Epidemiologic Features of Scaphoid Fractures in Adults	434	Diagnosis	520
Injury Mechanism	441	Treatment	521
Diagnosis	441	Other Classifications of Calcaneal Fractures	521
Treatment	441	Traditional Classification: Essex-Lopresti Classification	521
Metacarpal Fractures (Segment 77)	441	Sanders Classification	521
Anatomical Features	441	Fractures of the Tarsal Navicular Bone (Segment 83)	524
OTA Classification of Metacarpal Fractures	441	Anatomical Features	524
Clinical Epidemiologic Features of Metacarpal Fractures in Adults (Segment 77)	441	OTA Classification of Tarsal Navicular Fractures	524
Injury Mechanism	457	Clinical Epidemiologic Features of Tarsal Navicular (Segment 83)	525
Diagnosis	457	Injury Mechanism	531
Treatment	457	Diagnosis	531
Further Classification of Base Fracture of the First Metacarpal Bone	457	Treatment	531
Anatomical Features and Classification	457	Cuboid Fractures (Segment 84)	531
Clinical Epidemiologic Features of Fractures of the Base of the First Metacarpal Bone	458	Anatomical Features	531
Injury Mechanism	462	OTA Classification of Cuboid Fractures	532
Diagnosis	462	Clinical Epidemiologic Features of Cuboid Fractures	532
Treatment	462	Injury Mechanism	538
Phalanx Fractures (Segment 78)	462	Diagnosis	538
Anatomical Features	462	Treatment	538
OTA Classification of Phalanx Fractures	462	Cuneiform Fractures (Segment 85)	538
Clinical Epidemiologic Features of Phalanx Fractures (Segment 78)	463	Anatomical Features	538
Injury Mechanism	478	OTA Classification of Cuneiform Fractures	539
Diagnosis	478	Clinical Epidemiologic Features of Cuneiform Fractures (Segment 85)	539
Treatment	478	Injury Mechanism	546
Multiple Fractures (Segment 79)	478	Diagnosis	546
OTA Classification of Multiple Fractures of the Hand	478	Treatment	546
Clinical Epidemiologic Features of Multiple Fractures (Segment 79)	478	Metatarsal Fractures (Segment 87)	546
9 Fractures of the Foot	485	Anatomical Features	546
Overview	485	OTA Classification of Metatarsal Fractures	547
Anatomical Features	485	Clinical Epidemiologic Features of Metatarsal Fractures (Segment 87)	548
OTA Classification and Coding System for Foot Fractures	485	Injury Mechanism	563
		Diagnosis	563
		Treatment	563

Phalangeal Fractures (Segment 88)	563	Clavicle Fractures (Segment 15)	603
Anatomical Features	563	Anatomical Features	603
OTA Classification of Phalangeal Fractures	564	Anatomical Features and Muscular	
Clinical Epidemiologic Features		Attachment of the Clavicle	603
of Phalangeal Fractures (Segment 88)	565	OTA Classification and Coding System	
Injury Mechanism	581	for Clavicle Fractures	603
Diagnosis	581	Clinical Epidemiologic Features	
Treatment	581	of Clavicle Fractures (Segment 15)	607
Multiple Fractures of the Foot (Segment 89)	581	Injury Mechanism	613
Clinical Epidemiologic Features of Multiple		Diagnosis	613
Fractures of the Foot (Segment 89)	581	Treatment	613
OTA Classification of Multiple Fractures		Further Classifications of Clavicle Fractures	614
of the Foot	581	Allman Classification of Clavicle Fractures	614
		Robinson Classification of Clavicle Fractures	619
10 Fractures of Other Locations	585	Scapular Fractures (Segment 14)	622
Fractures of the Patella (Segment 34)	585	Anatomical Features	622
Anatomical Features	585	OTA Classification and Coding System	
OTA Classification and Coding System		for Scapular Fractures	623
for Patellar Fractures	585	Epidemiologic Features of Scapular Fractures	
Clinical Epidemiologic Features		(Segment 14)	623
of Patellar Fractures (Segment 34)	586	Injury Mechanism	634
Injury Mechanism	598	Diagnosis	634
Diagnosis	598	Treatment	634
Treatment	598	Further Classifications of Scapular Fractures	635
Further Classifications of Patellar Fractures	598	Coracoid Process Fractures	635
Regazzoni Classification	598	Acromion Fractures	642
		Scapular Neck Fractures	648
		Glenoid Fractures	654
		Index	661
