Nomenclature	xi
Abstract	xv
Kurzfassung	xvii
1 Introduction	1
1.1 Motivation	1
1.2 Vector-Based Attitude Determination	3
1.2.1 Time-Invariant Solutions	4
1.2.2 Time-Variant Solutions	5
1.3 Problem Formulation and State-of-the-Art	6
1.3.1 Nonlinear State Estimation	7
1.3.2 Observability Analysis	7
1.3.3 Recursive Parameter Estimation	8
1.4 Novel Approach to Robust Attitude and Velocity Estimation	8
1.5 Research Contributions	10
2 Estimating Attitude and Velocity	11
2.1 Strapdown INS Mechanization	11
2.1.1 Translational Motion	12
2.1.2 Rotational Motion	13
2.1.3 Strapdown Integration	13
2.2 State Estimator Design	15
2.2.1 Bayesian Methodology	15
2.2.2 Sequential Importance Sampling	16
2.2.3 The Filtered State	21
3 Observability Monitoring for GPS-Aided INS	23
3.1 Observability Analysis	24
3.1.1 General Definitions of Observability	24
3.1.2 Attitude Observability for a Single Vector Observation	25
3.2 A Numerical View on Attitude Observability Issues	28
3.2.1 The Effect of Non-Observable Angular Drift	28
3.2.2 Attitude Errors and the Likelihood Function	31
3.3 Measure of Non-Observability	32

3.4	Simulation Results	34
3.4.1	Sensor Models	34
3.4.2	Single Run Results	37
3.4.3	Monte Carlo Runs	38
4	Safe Integration of Magnetometers with GPS-Aided INS	41
4.1	Magnetic Distortions	42
4.1.1	Non-Orthogonality and Misalignment	42
4.1.2	Soft Iron Effects	43
4.1.3	Hard Iron Effects	43
4.1.4	Scaling	47
4.2	Estimator Design	47
4.2.1	Parameter Ambiguities	49
4.2.2	Estimation Concept	49
4.2.3	Likelihood of the Model Parameters	52
4.2.4	Parameter Learning	54
4.3	Simulation Results	54
4.3.1	Comparison of Attitude Errors	56
4.3.2	Comparison of Velocity Errors	58
4.3.3	Estimated TAM Parameters	58
5	FPGAs for Real-Time Navigation with Particle Filters and sUASs	63
5.1	Technical Background on FPGAs	63
5.2	Research Onboard Computer System	64
5.2.1	Hardware Concept	65
5.2.2	OCM System Architecture	66
5.3	Pipelined Particle Filter	67
5.3.1	Numerical Considerations	67
5.3.2	Particle Pipeline	71
5.3.3	Resampling	72
5.3.4	Initial Distribution	73
5.4	Modified Measure of Non-Observability	73
5.5	Flight Test Results	76
5.5.1	Performance Evaluation	76
5.5.2	sUAS Demonstration	81
6	Conclusion and Future Research	87
6.1	Summary and Conclusion	87
6.2	Future Work	89
A	Fundamentals of Probability	95
B	Common Issues with Particle Filters	99
B.1	Degeneracy Problem	99

.....

B.2 Sample Impoverishment 101
