Nomenclature	IX
1 Introduction	1
1.1 Background and Motivation.....	1
1.2 Objectives.....	10
1.3 Thesis Outline	11
2 Literature Review	13
2.1 Inflow Disturbances Interaction.....	13
2.2 Annular Boundary Layer Interaction	23
2.3 Critical Assessment.....	25
3 Methodology	27
3.1 Signal Processing.....	27
3.1.1 Spectral Analysis.....	27
3.1.2 Filtering Technique	29
3.1.3 Short-Time Fourier Transform.....	30
3.2 Generic Test Fan	30
3.3 Experiments.....	32
3.3.1 Fan Test Facility.....	32
3.3.2 Aerodynamic Performance Measurements	33
3.3.3 Inflow Control Devices	34
3.3.4 Acoustic Measurements	35
3.3.5 Flow Visualization	36
3.3.6 Flow Field Measurements	37
3.3.7 Surface Pressure Measurements.....	39
3.4 Numerical Simulations.....	40
3.4.1 Preliminary Remarks.....	40
3.4.2 Classical CFD Approaches	41
3.4.2.1 Governing Equations.....	42
3.4.2.2 RANS Approach	43
3.4.2.3 SAS Approach.....	46
3.4.3 Lattice-Boltzmann Approach	47

3.4.4 Numerical Setups	49
3.4.4.1 Selection of the Different Approaches	49
3.4.4.2 Scale Adaptive Simulations (SAS)	50
3.4.4.3 Reynolds-averaged Navier-Stokes Simulations (RANS).....	51
3.4.4.4 LBM simulations.....	52
3.5 Acoustic Prediction Methods	55
3.5.1 Ffowcs Williams Hawkings Approach	55
3.5.2 Tonal Sound Model	57
4 Experimental Characterization of BPF Sound	59
4.1 Overall Aerodynamic and Acoustic Performance.....	59
4.2 Identification of Source Mechanism	61
4.2.1 Impact of Operating Point.....	61
4.2.2 Impact of Inflow Conditioner.....	63
4.2.3 Impact of Upstream Duct Length.....	63
4.2.4 Unsteadiness of Tonal Sound.....	65
4.2.5 Impact of Wall Distance.....	69
4.3 Chapter Conclusions	69
5 Inhomogeneous Inflow as a Cause for Tonal BPF Sound	71
5.1 Experimental Flow Field at the Intake	71
5.2 Fluctuating Surface Pressure Data under Different Inflow Conditions	75
5.2.1 Time Domain Analysis	75
5.2.2 Blade Pressure Correlation Technique.....	76
5.3 Unsteady Flow Simulations	81
5.3.1 Aerodynamic Impact of Inflow Distortion.....	82
5.3.2 Tonal Sound Prediction.....	88
5.4 Chapter Conclusions	91
6 Impact of the Large-Scale Inlet Plenum	93
6.1 Flow Visualizations.....	93
6.2 Experimental Study with Various Inlet Plenums	94
6.3 Numerical Study with Various Inlet Plenums.....	97
6.3.1 RANS Simulation of the Baseline Configuration	97
6.3.2 LBM Simulation of the Baseline Configuration	98
6.3.3 Variation of the Inlet Plenum	101

6.4 Chapter Conclusions	106
7 Summary und Conclusions	107
Appendix A: Experimental Uncertainty Analysis	111
Appendix B: Aerodynamic and Acoustic Impact of the Inflow Conditioner	115
Appendix C: Calibration of Blade Pressure Transducers	119
References	123
