|                                                                    |    |
|--------------------------------------------------------------------|----|
| List of abbreviations and notation conventions .....               | 9  |
| Preface .....                                                      | 11 |
| <br>                                                               |    |
| 1 Introduction: Why pronunciation matters .....                    | 15 |
| 1.1 Pronunciation as a tool: Ensuring communication .....          | 16 |
| 1.2 Pronunciation as an index: Avoiding negative stereotypes ..... | 19 |
| 1.3 Pronunciation as an art: Aiming to speak like a native .....   | 24 |
| <br>                                                               |    |
| <i>Background</i>                                                  |    |
| <br>                                                               |    |
| 2 Models, targets and norms .....                                  | 27 |
| 2.1 Features shared by RP and GA .....                             | 28 |
| 2.2 Received Pronunciation .....                                   | 30 |
| 2.3 General American .....                                         | 33 |
| 2.4 RP vs. GA: A brief overview .....                              | 36 |
| 2.5 The Lingua Franca Core .....                                   | 40 |
| 2.6 Other models .....                                             | 45 |
| 2.7 Defining targets .....                                         | 46 |
| <br>                                                               |    |
| 3 Factors that influence pronunciation .....                       | 51 |
| 3.1 Our mother tongue .....                                        | 51 |
| 3.1.1 The phoneme: A psycholinguistic reality .....                | 52 |
| 3.1.2 Contrastive Analysis (CA) .....                              | 55 |
| 3.1.3 Markedness .....                                             | 58 |
| 3.1.4 More recent approaches to transfer research .....            | 59 |
| 3.2 Biological factors .....                                       | 62 |
| 3.2.1 Age .....                                                    | 62 |
| 3.2.2 Sex .....                                                    | 63 |
| 3.2.3 Aptitude/Gift .....                                          | 64 |
| 3.3 Motivation .....                                               | 65 |
| 3.4 Other factors .....                                            | 66 |

|      |                                  |    |
|------|----------------------------------|----|
| 4    | Methods and tools .....          | 69 |
| 4.1  | Recording learners' speech ..... | 72 |
| 4.2  | Phonetic transcription .....     | 75 |
| 4.3  | Visual aids .....                | 77 |
| 4.4  | Minimal pairs .....              | 78 |
| 4.5  | Drill .....                      | 80 |
| 4.6  | Authentic material .....         | 81 |
| 4.7  | Out-of-class activities .....    | 84 |
| 4.8  | Feedback and correction .....    | 87 |
| 4.9  | Technology: Using corpora .....  | 88 |
| 4.10 | Games, poems etc. ....           | 90 |

### *Specific problems*

|     |                                                                                       |     |
|-----|---------------------------------------------------------------------------------------|-----|
| 5   | Specific problems 1: Differences in the phonemic inventory .....                      | 95  |
| 5.1 | The dental fricatives [θ] and [ð] .....                                               | 97  |
| 5.2 | The labial-velar approximant [w] .....                                                | 102 |
| 5.3 | The TRAP vowel [æ] .....                                                              | 104 |
| 6   | Specific problems 2: Differences in phonological rules .....                          | 113 |
| 6.1 | Final obstruent devoicing, final obstruent agreement<br>and pre-fortis clipping ..... | 114 |
| 6.2 | Weakening .....                                                                       | 119 |
| 6.3 | Linking .....                                                                         | 127 |
| 6.4 | Medial-t voicing (GA) .....                                                           | 131 |
| 6.5 | The 'vocalic /ɾ/' .....                                                               | 133 |
| 6.6 | Other differences .....                                                               | 135 |
| 7   | Specific problems 3: Suprasegmental differences .....                                 | 137 |
| 7.1 | Stress .....                                                                          | 137 |
| 7.2 | Intonation .....                                                                      | 147 |
| 7.3 | Rhythm .....                                                                          | 154 |
| 7.4 | Phonotactics .....                                                                    | 157 |
| 7.5 | Articulatory Settings .....                                                           | 159 |

8 Specific problems 4: Other causes ..... 163

8.1 Differences in sound-letter correspondence (spelling) ..... 163

8.2 Differences in morphophonology ..... 173

8.3 Individual lexemes ('Hard Words') ..... 176

8.4 Realizational differences ..... 180

8.5 Teaching priorities: What matters most? ..... 190

*Empirical work*

9 Working with empirical data ..... 195

9.1 Data collection ..... 195

9.2 Coding the recordings ..... 206

9.3 Analysing the results ..... 214

9.4 Further observations ..... 217

9.5 Doing your own research project ..... 219

Key to the 'reflections' ..... 223

Bibliography ..... 225
