

Contents

1. Introduction	1
1.1. Energy harvesting	1
1.2. State of the art	3
1.3. Motivation	7
1.4. Outline of the thesis	7
2. Vibration based energy harvesting	9
2.1. Mechanical structure	9
2.1.1. Excitation mechanisms and types	9
2.1.2. Structural design	10
2.1.3. Bistable DUFFING oscillator	13
2.2. Electromechanical transducers	22
3. Nonlinear energy harvesters	25
3.1. Bistable beam	25
3.1.1. Modelling	25
3.1.2. Kinematics	26
3.1.3. Derivation of the equation of motion	27
3.1.4. Nondimensionalization and parameter reduction	30
3.2. Bistable electromechanical beam	32
3.2.1. Modelling	32
3.2.2. Derivation of the equation of motion	33
3.2.3. Nondimensionalization and parameter reduction	38
3.3. Composite plate	39
3.3.1. Modelling	39
3.3.2. Derivation of the equations of motion	40
3.3.3. Nondimensionalization and parameter reduction	47

3.4. Electromechanical composite plate	48
3.4.1. Modelling	48
3.4.2. Derivation of the equations of motion	49
3.4.3. Nondimensionalization and parameter reduction	53
3.5. Multistable plate	55
3.5.1. Modelling	55
3.5.2. Derivation of the equations of motion	56
3.5.3. Nondimensionalization and parameter reduction	58
4. Analytical framework	61
4.1. Multiple scales method	62
4.1.1. Electromechanical system	65
4.1.2. Composite plate	69
4.2. The MELNIKOV function	70
4.3. Criterion for chaos	74
4.3.1. Bistable oscillator	75
4.3.2. Electromechanical system	77
4.4. Harmonic balance	78
4.4.1. Bistable system	78
4.4.2. Electromechanical system	80
4.5. FLOQUET theory	81
4.6. Normal form theory	83
4.6.1. Normal form transformation	83
4.6.2. Transformation of non-autonomous systems	86
4.6.3. Application to the bistable DUFFING equation	87
4.7. Empiric criteria	91
5. Analysis of nonlinear energy harvester designs	95
5.1. Bistable system	95
5.1.1. Measure for the harvesting capability	96
5.1.2. Parameter study	99
5.1.3. Comparison to analytic criteria	104

5.2. Bistable electromechanical system	106
5.2.1. Optimal electrical resistance	106
5.2.2. Comparison to analytic criteria	113
5.2.3. Optimal domain for energy harvesting	114
5.3. Composite plate	116
5.3.1. Principal investigations	116
5.3.2. Comparison to analytic criteria	121
5.4. Electromechanical composite plate	122
5.5. Multistable plate	126
5.5.1. Principal investigations	126
5.5.2. Parameter study	130
5.6. Combined harmonic and noise excitation	134
5.6.1. Bistable DUFFING oscillator	134
5.6.2. Bistable electromechanical system	139
5.6.3. Composite plate	141
6. Experimental investigations	147
6.1. Experiments with beam structures	147
6.1.1. Experimental setup	147
6.1.2. Bistable prestressed beam	149
6.1.3. Bistable electromechanical beam	151
6.2. Composite plate	160
6.2.1. Experimental setup	160
6.2.2. Experimental results	161
7. Conclusion	163
Bibliography	167
A. Appendix	181
A.1. Coefficients for the electromechanically coupled equations . . .	181
A.2. Nonlinear restoring force of the composite plate	182
A.3. Equations of motion of the electromechanical composite plate .	182
A.4. Nonlinear restoring force of the multistable plate	187
