

Contents

Preface	vii
1 Natural numbers	1
1.1 Counting	1
1.2 Properties of numbers	3
1.3 Magic squares	7
1.4 Prime numbers	8
1.5 From Pythagoras to Fermat	13
1.6 What are natural numbers?	16
1.7 Applications: Cryptography	19
2 Representations of numbers	23
2.1 How were numbers written in former times?	23
2.2 The abacus and counting board	26
2.3 The decimal system	31
2.4 Divisibility rules	33
2.5 Binary numbers	36
2.6 Applications: Barcodes	38
3 Rational and irrational	41
3.1 Fractions	41
3.2 Ratios	44
3.3 Rational numbers	48
3.4 Irrational numbers: The first crisis	52
3.5 Decimal numbers	57
4 Transcendental numbers	61
4.1 The most mysterious number	61
4.2 Limits	64
4.3 How many transcendental numbers are there?	70

5	Imaginary and complex	75
5.1	Linear equations	76
5.2	Quadratic equations	77
5.3	The drama of the cubic equation	80
5.4	The tragedy of the quintic equation	82
5.5	Every equation can be solved!	84
	Additional Notes	89
	Bibliography	99
	Index	101
