1	Introduction	1
2	Fundamentals	5
2.1	Mathematical Fundamentals	5
2.1.1	Statistical Properties of Random Variables	5
2.1.2	Joint and Conditional Probabilities	7
2.1.3	Entropy	7
2.2	Multiple View Geometry	7
2.2.1	Arbitrary Camera Positioning	8
2.2.2	Coplanar Camera Setup	9
2.2.3	Intermediate View Synthesis	10
2.3	Stereo Vision	10
2.4	Signal Compression Fundamentals	13
2.4.1	Lossy Compression	13
2.4.2	Predictive Coding	13
2.4.3	Transform and Quantization	14
2.4.4	Entropy Coding	16
2.5	Video Compression Fundamentals	16
2.5.1	Video Source Formats	16
2.5.2	Distance and Distortion Measures	19
2.5.3	Hybrid Video Coding	20
2.5.4	Motion Estimation	22
2.5.5	Rate-Distortion Optimization	23
2.6	Overview of the HEVC Video Coding Standard	24
2.6.1	Intra Prediction	26
2.6.2	Inter Prediction	26
2.6.3	Residual Coding	28
2.6.4	In-Loop Filtering	29
2.6.5	Entropy Coding	29
2.7	Overview of the Multi-view and 3D Extensions of HEVC	30
2.7.1	Advanced Prediction Structures	31
2.7.2	Depth Map Coding	32
2.7.3	Inter-Component Prediction	34
2.7.4	Combined Prediction	34
2.7.5	Encoder: View Synthesis Optimization	34
2.8	Evaluation Environment	37
2.8.1	Test Video Sequences	37
2.8.2	Coding Performance Assessment	37
2.8.3	Standardization Activity	40

3	Subjective Study on Depth Maps	41
3.1	Depth Map Simplification	41
3.2	General Test Setup	42
3.2.1	Test A: 2D Synthesized View Quality	44
3.2.2	Test B: 3D Depth Impression	45
3.3	Evaluation	47
3.3.1	Test Schedule and Participation	47
3.3.2	Visualization of Results	47
3.3.3	Test A: 2D Synthesized View Quality	48
3.3.4	Test B: 3D Depth Impression	51
4	Segment-wise Depth Map Coding	57
4.1	Depth Map Signal Characteristics	57
4.2	Depth Map Accuracy	59
4.3	Depth Maps for View Synthesis	60
4.4	Impact of View Synthesis Optimization	63
4.5	Segment-wise DC Coding	65
4.5.1	Derivation of Segmentation Mask	67
4.5.2	Coding of DC Residuals	68
4.5.3	Complexity Assessment	70
4.5.4	Coding Performance Analysis	71
4.5.5	Further Complexity Reduction	76
4.6	Depth Lookup Table	78
4.6.1	Histogram Analysis	78
4.6.2	Lookup Table Construction	82
4.6.3	Coding of the Depth Lookup Table	86
4.6.4	Coding of DC Residual Indexes	88
4.6.5	Coding Performance Analysis	90
4.6.6	DC Quantization with Depth Lookup Table	94
4.7	Overall Coding Performance Analysis	98
5	Segment-wise Texture Prediction	103
5.1	General Motion/Disparity Model	104
5.1.1	Motion Vector Field Properties	105
5.1.2	Prediction Model in Multi-view Video Coding	106
5.2	Block-based Compensation	107
5.2.1	Motion Partitioning	107
5.2.2	Multiple Hypothesis Prediction	109
5.2.3	Motion Vector Field Coding	109
5.3	Inter-component Segmentation Analysis	110
5.3.1	Depth-based Segmentation of Texture	110
5.3.2	Depth-based Segmentation of Texture Motion	115
5.4	Segment-wise Prediction	117
5.4.1	Depth-based Segmentation	119
5.4.2	Full Block Compensation	121
5.4.3	Segment-wise Motion Estimation	121

5.4.4	Merging of Prediction Signals	123
5.4.5	Segmentation Boundary Filtering	124
5.4.6	Coding of Motion Parameters and Extensions	127
5.4.7	Analysis of Mask Properties	134
5.4.8	Complexity Assessment	140
5.5	Coding Performance Analysis	145
5.5.1	Common Test Conditions	145
5.5.2	Depth-first Coding Configuration	148
5.6	Combined Coding Performance Analysis	149
6	Summary and Conclusions	153
A	Test Sequences	155
	Bibliography	165
