Contents

1. Introduction **1**

1.1. Devices, Data and Users 2
1.2. Mobile AR/VR Interfaces 4
1.3. Thesis Structure 6

2. Related Work **11**

2.1. Mobile Graphical Standard 12
2.2. Mobile Tracking Technologies 13
2.2.1. Sensor Tracking 15
2.2.2. Visual Tracking 16
2.2.2.1. Camera calibration 17
2.2.2.2. Marker based tracking 18
2.2.2.3. Natural feature based tracking 20
2.3. User Study Design 22
2.3.1. Research questions and hypotheses. 22
2.3.2. Independent and dependent variables. 23
2.3.3. Experiment design 23
2.3.4. Pilot study and formal experiment 25
2.3.5. Data analysis and report 26
2.4. Mobile Remote Rendering 27
2.4.1. Imposter/panorama based approaches 27
2.4.2. Simplified model based approaches 28
2.4.3. Depth image based approaches 28
2.5. Multiple Mobile Displays 29
2.5.1. Mobile Tiling Displays 29
2.5.2. Mobile Multi-Perspective Displays 31
2.6. Mobile Navigational Interfaces 32
2.6.1. Mobile Outdoor Navigational Interfaces 32
2.6.2. Mobile Indoor Navigational Interfaces 33
2.7. User Perception of System Latency in AR/VR applications 34

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3. Contributions 37
3.1. Visual Content Generation and Transmission 37
3.2. Interaction with Visual Content 38
3.2.1. Multiple Mobile Displays 38
3.2.2. Multiple Perspective Displays 39
3.2.3. Mobile Navigational Interfaces 40
3.3. User Perception of Visual Content 41

I. Visual content generation and transmission 43

4. Remote Computing, Transmission and Local Re-synthesis 45
4.1. System Architecture 47
4.2. Coarse 2.5D Mesh Generation 48
4.2.1. Rendering Server 48
4.2.2. Image Segmentation 49
4.2.3. Edge Detection 49
4.2.4. Monotonic Line Growing 50
4.2.5. Inverse Bresenham Algorithm 51
4.2.6. Triangulation 52
4.3. Immersive Display 52
4.4. Results 55
4.5. Discussion and Design Implications 58

II. Interaction with visual content 59

5. Multiple Mobile Devices AR/VR Interface Design 61
5.1. Ad-Hoc Multiple Mobile Displays 63
5.1.1. System Structure 64
5.1.2. Calibration Process 65
5.1.2.1. Pose Estimation 65
5.1.2.2. Manual Fine Tuning 65
5.1.3. Synchronization 67
5.1.3.1. Multi-Device Multi-Touch 67
5.1.3.2. Tiling Display 69
5.1.4. Evaluation 69
5.1.4.1. Participants 69
5.1.4.2. System Configuration 70

5.1.4.3. Tasks . . . 70
5.1.4.4. Procedure . . . 71
5.1.4.5. Results . . . 71
5.1.5. Discussion . . . 72
5.2. Dynamic Tiling Displays . . . 75
5.2.1. Design . . . 76
5.2.1.1. System Structure . . . 76
5.2.1.2. View Computation . . . 78
5.2.2. Exemplary Application . . . 79
5.2.3. Experiment and Results . . . 79
5.2.4. Discussion . . . 81
5.3. Active Tangible User Interfaces . . . 83
5.3.1. Design . . . 84
5.3.1.1. System overview . . . 84
5.3.1.2. Touch patterns . . . 85
5.3.1.3. Device Tracking . . . 86
5.3.2. Exemplary applications . . . 86
5.3.2.1. Magic lens . . . 87
5.3.2.2. Bench viewer display . . . 87
5.3.3. Evaluation . . . 89
5.3.4. Discussion . . . 90
5.4. Design Implications . . . 91

6. Mobile AR Navigational Interface Design 93
6.1. Segway AR-Tactile Navigation System . . . 94
6.1.1. Design and prototype . . . 96
6.1.1.1. Navigation graphical interface . . . 97
6.1.1.2. Turning instruction feedback . . . 98
6.1.2. Setup and experiments . . . 99
6.1.2.1. Study 1: Driving test in real traffic . . . 99
6.1.2.2. Study 2: Lane switching test in artificial environment . . . 105
6.1.3. Discussion . . . 107
6.1.3.1. The utility of navigation interfaces . . . 107
6.1.3.2. The effectiveness of navigation instructions . . . 108
6.1.3.3. Design implications and future research . . . 108
6.2. Mobile Projector based Indoor Navigation Interface . . . 110
6.2.1. Spatial cognition and individual differences in navigation . . . 111
6.2.2. Technology acceptance of navigation devices . . . 113

6.2.3. Methodology . . . 114
6.2.3.1. Research questions . . . 114
6.2.3.2. Experimental design . . . 114
6.2.3.3. Independent variables . . . 115
6.2.3.4. Hardware . . . 118
6.2.3.5. Experimental setup . . . 118
6.2.3.6. Dependent variables . . . 119
6.2.3.7. Procedure . . . 122
6.2.3.8. Sample . . . 122
6.2.3.9. Statistical analysis . . . 123
6.2.4. Results . . . 123
6.2.4.1. Effects of navigation device, information type and learnability on navigation performance . . . 123
6.2.4.2. Effects of navigation device and information type on end-user perceptions . . . 123
6.2.4.3. Effects of users' spatial ability on navigation performance and perceptions . . . 128
6.2.4.4. Prediction of user satisfaction . . . 131
6.2.5. Discussion . . . 132
6.2.5.1. The utility of navigation devices: screen vs. projector . . 132
6.2.5.2. The effectiveness of navigation information: map vs. arrow 133
6.2.5.3. Determinants of users' satisfaction when using navigation devices . . . 134
6.2.5.4. The impact of spatial abilities . . . 135
6.2.5.5. Design implications and application scenarios . . . 136
6.2.5.6. Methodological considerations and future research. . . . 138
6.3. Product Finder in a Supermarket Scenario . . . 139
6.3.1. Implementation . . . 140
6.3.1.1. Visual Tracking . . . 140
6.3.1.2. AR Interface and Pattern types . . . 141
6.3.2. Experiment . . . 141
6.3.3. Results . . . 143
6.3.4. Discussion . . . 144
6.4. Design Implications . . . 146

III. User perception of visual content **149**

7. User Perception of AR System Latency **151**
7.1. System Implementation 153
7.1.1. IR Tracking System 154
7.1.2. Setup of Markers 154
7.1.3. Mobile AR Interface 154
7.2. Questions Addressed and Logic of Experiment 156
7.3. Method 157
7.3.1. Independent Variables 157
7.3.2. Dependent Variables 158
7.3.3. Study design 158
7.3.4. Procedure 159
7.3.5. Participants 159
7.4. Results 160
7.4.1. Performance 160
7.4.2. Ease of Use 163
7.5. Discussion and Design Implications 164

8. Conclusion **169**
8.1. Summary 169
8.2. Future Work 171

Bibliography **173**

Curriculum Vitae **195**
