

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Contents and Structure	14
1.3	Main Results	17
2	Real Options in Theory and Practice	21
2.1	Introduction	21
2.2	Basics of Real Options	22
2.3	Diffusion Processes in Classical Probability Theory	29
2.3.1	Definition: Diffusion Process - 1st Version	29
2.3.2	Definitions: Infinitesimal Expectation and Variance	30
2.3.3	Denominations for Diffusion Processes	31
2.3.4	Stationary Distribution of a Diffusion Process	33
2.3.5	Example: One-Dimensional Brownian Motion	34
2.4	Introduction to the Ito Calculus	35
2.4.1	Definition: Ito Integral	35
2.4.2	Properties of an Ito Integral	36
2.4.3	Definition: A Broader Class of Ito Integrals	37
2.4.4	Definition: One-Dimensional Ito Process	38
2.4.5	Theorem: Existence and Uniqueness of the Solution of a Stochastic Differential Equation	39
2.4.6	Coefficients of an Ito Process	40
2.4.7	Definition: Diffusion Process - 2nd Version	40
2.4.8	Remark: Relationship of the Two Definitions of a Diffusion Process	40
2.4.9	Theorem: Solution of a One-Dimensional, Linear Stochastic Differential Equation	41
2.4.10	Definition: Mean Reversion Process	42
2.4.11	Example: Ornstein-Uhlenbeck Process	42
2.5	Discretization of Continuous-Time Stochastic Processes	43
2.5.1	Mathematical Methods to Generate Random Variables	43
2.5.2	Euler Scheme	44
2.5.3	Milstein Scheme	45

2.5.4	Taylor 1.5 Scheme	45
2.5.5	Strong Convergence of Order κ	46
2.6	Evolution of the Real Options Theory and Models in the Literature	47
2.6.1	Decision-Tree Analysis	48
2.6.2	Contingent-Claims Analysis	52
2.6.3	Categorization of Real Options Valuation Methods	59
	Analytical Methods	59
	Numerical Methods	61
2.6.4	Flexibility Due to Interest Rate Uncertainty	66
2.7	Summary	69
3	Stochastic Models for the Term Structure of Interest Rates	71
3.1	Introduction	71
3.2	The Term Structure of Interest Rates	72
3.2.1	Introduction to the Term Structure of Interest Rates and Short Rate Models	72
3.2.2	Yield Curve Interpolation with Cubic Splines	77
	Definition: Cubic Spline Function	78
	Theorem: Basis of the Set S_Δ	78
	Algorithm: Cubic Spline Construction	82
3.2.3	General Overview of Stochastic Interest Rate Models ..	85
3.3	Stochastic Interest Rate Models	96
3.3.1	The Mean Reversion Feature in Short Rate Models	96
3.3.2	One-Factor Term Structure Models	97
	Vasicek Model	97
	Cox-Ingersoll-Ross Model	101
	Ho-Lee Model	105
	Hull-White One-Factor Model	108
	Heath-Jarrow-Morton One-Factor Model	111
3.3.3	Two-Factor Term Structure Models	117
	Hull-White Two-Factor Model	118
	Heath-Jarrow-Morton Two-Factor Model	124
3.4	Summary	129
4	Real Options Valuation Tools in Corporate Finance	133
4.1	Introduction	133
4.2	Numerical Methods for Real Options Pricing, Constant Interest Rates	136
4.2.1	Lattice Methods	136
	Cox-Ross-Rubinstein Binomial Tree	136
	Trigeorgis Log-Transformed Binomial Tree	143
4.2.2	Finite Difference Methods	154
4.3	Schwartz-Moon Model	165
4.4	Real Options Pricing with Stochastic Interest Rates	171

4.4.1	Ingersoll-Ross Model	178
4.4.2	A Modification of the Cox-Ross-Rubinstein Binomial Tree	182
4.4.3	A Modification of the Trigeorgis Log-Transformed Binomial Tree	189
4.5	Summary	194
5	Analysis of Various Real Options in Simulations and Backtesting	197
5.1	Introduction	197
5.2	Calibration of Stochastic Interest Rate Models	199
5.2.1	Calibration Procedure for the Vasicek and the Cox-Ingersoll-Ross Models	200
5.2.2	Calibration Procedure for the Ho-Lee Model	200
5.3	Description of the Test Strategy	202
5.4	Test Situation 1: The Schwartz-Moon Model with a Deferred Project Start	216
5.5	Test Situation 2: Preliminary Tests for Real Options Valuation	223
5.5.1	Analysis for Test Situation 2 in 11 Consecutive Steps ..	224
5.5.2	Recapitulation of the Main Results in Test Situation 2 ..	248
5.6	Test Situation 3: Real Options Valuation Using Equilibrium Models	249
5.6.1	The Influence of the Salvage Factor and the Expand Factor	250
5.6.2	Analysis for the Vasicek Model	265
5.6.3	Analysis for the Cox-Ingersoll-Ross Model	280
5.6.4	Recapitulation of the Main Results in Test Situation 3 ..	290
5.7	Test Situation 4: Real Options Valuation Using No-Arbitrage Models	291
5.7.1	Ho-Lee Model	291
5.7.2	Hull-White One-Factor Model versus Hull-White Two-Factor Model	299
5.7.3	Ho-Lee Model versus Hull-White One-Factor Model ...	312
5.7.4	Recapitulation of the Main Results in Test Situation 4 ..	314
5.8	Test Situation 5: Real Options Valuation in Historical Backtesting	315
5.8.1	Analysis for Case 1	327
5.8.2	Analysis for Case 2	337
5.8.3	Analysis for Case 3	347
5.8.4	Recapitulation of the Main Results in Test Situation 5 ..	356
5.9	Summary	360
6	Summary and Outlook	363
6.1	Purpose of the Research	363
6.2	Summary of the Research Results	366

6.3 Economic Implications	372
6.4 Outlook and Future Areas of Research	373
