

Contents

Volume 1

Preface *XIII*

- 1 Introduction 1
- 2 Theory 7
- 3 Methodologies for Determining Stability/Solubility Constants 31
- 4 Statistical Analysis and Selection Criteria 55
- 5 Water 61
- 6 Alkali Metals 135
- 7 Alkaline Earth Metals 155
- 8 Scandium, Yttrium and the Lanthanide Metals 225
- 9 Actinide Metals 325

Volume 2

- 10 Titanium(IV), Zirconium, Hafnium and Thorium 433
 - 10.1 Titanium(IV) 433
 - 10.1.1 Introduction 433
 - 10.1.2 Selection of Thermochemical Data 433
 - 10.1.2.1 Temperature Dependence 435

10.1.2.2	Thermodynamic Parameters	438
10.1.3	Collation and Assessment of Literature Data	438
10.1.4	Speciation	441
10.2	Zirconium	442
10.2.1	Introduction	442
10.2.2	Selection of Thermochemical Data	443
10.2.2.1	Ionic Strength Dependence	446
10.2.2.2	Thermodynamic Parameters	452
10.2.3	Collation and Assessment of Literature Data	453
10.2.4	Speciation	458
10.3	Hafnium	460
10.3.1	Introduction	460
10.3.2	Selection of Thermochemical Data	461
10.3.2.1	Thermodynamic Parameters	462
10.4	Thorium	462
10.4.1	Introduction	462
10.4.2	Selection of Thermochemical Data	463
10.4.2.1	Temperature Dependence	467
10.4.2.2	Ionic Strength Dependence	470
10.4.2.3	Thermodynamic Parameters	478
10.4.3	Collation and Assessment of Literature Data	481
10.4.4	Speciation	487
	References	494
11	First Transition Series Metals	499
11.1	Titanium(III)	499
11.1.1	Introduction	499
11.1.2	Selection of Thermochemical Data	499
11.1.2.1	Ionic Strength Dependence	500
11.1.2.2	Thermodynamic Parameters	501
11.1.3	Collation and Assessment of Literature Data	501
11.2	Vanadium	503
11.2.1	Introduction	503
11.2.2	Vanadium(II)	504
11.2.3	Vanadium(III)	505
11.2.3.1	Selection of Thermochemical Data	505
11.2.3.2	Collation and Assessment of Literature Data	508
11.2.4	Vanadium(IV)	512
11.2.4.1	Selection of Thermochemical Data	512
11.2.4.2	Collation and Assessment of Literature Data	515
11.2.5	Vanadium(V)	517
11.2.5.1	Selection of Thermochemical Data	517
11.2.5.2	Collation and Assessment of Literature Data	532

11.2.5.3	Speciation	539
11.3	Chromium	541
11.3.1	Introduction	541
11.3.2	Selection of Thermochemical Data	542
11.3.2.1	Ionic Strength Dependence	544
11.3.2.2	Temperature Dependence	546
11.3.2.3	Thermodynamic Parameters	549
11.3.3	Collation and Assessment of Literature Data	550
11.3.4	Speciation	553
11.4	Manganese	556
11.4.1	Introduction	556
11.4.2	Manganese(II)	556
11.4.2.1	Selection of Thermochemical Data	556
11.4.2.2	Collation and Assessment of Literature Data	562
11.4.2.3	Speciation	567
11.4.3	Manganese(III)	568
11.4.3.1	Selection of Thermochemical Data	568
11.4.3.2	Collation and Assessment of Literature Data	571
11.4.4	Manganese(IV)	573
11.5	Iron	573
11.5.1	Introduction	573
11.5.2	Iron(II)	575
11.5.2.1	Selection of Thermochemical Data	575
11.5.2.2	Collation and Assessment of Literature Data	580
11.5.2.3	Speciation	585
11.5.3	Iron(III)	585
11.5.3.1	Selection of Thermochemical Data	585
11.5.3.2	Collation and Assessment of Literature Data	602
11.5.3.3	Speciation	618
11.6	Cobalt	620
11.6.1	Introduction	620
11.6.2	Cobalt(II)	620
11.6.2.1	Selection of Thermochemical Data	620
11.6.2.2	Collation and Assessment of Literature Data	625
11.6.2.3	Speciation	626
11.6.3	Cobalt(III)	628
11.6.3.1	Selection of Thermochemical Data	628
11.6.3.2	Collation and Assessment of Literature Data	631
11.7	Nickel	632
11.7.1	Introduction	632
11.7.2	Nickel(II)	633
11.7.2.1	Selection of Thermochemical Data	633
11.7.2.2	Collation and Assessment of Literature Data	642

11.7.2.3	Speciation	647
11.7.3	Nickel(III)	647
11.8	Copper	650
11.8.1	Introduction	650
11.8.2	Copper(I)	650
11.8.2.1	Selection of Thermochemical Data	650
11.8.2.2	Collation and Assessment of Literature Data	654
11.8.3	Copper(II)	655
11.8.3.1	Selection of Thermochemical Data	655
11.8.3.2	Collation and Assessment of Literature Data	666
11.8.3.3	Speciation	669
11.9	Zinc	675
11.9.1	Introduction	675
11.9.2	Selection of Thermochemical Data	676
11.9.2.1	Temperature Dependence	676
11.9.2.2	Ionic Strength Dependence	681
11.9.2.3	Thermodynamic Parameters	686
11.9.3	Collation and Assessment of Literature Data	687
11.9.4	Speciation	699
	References	700
12	Second and Third Series Transition Metals	717
12.1	Introduction	717
12.2	Molybdenum	719
12.3	Technetium	719
12.4	Rhodium	721
12.4.1	Selection of Thermochemical Data	721
12.4.1.1	Temperature Dependence	721
12.4.1.2	Ionic Strength Dependence	721
12.4.2	Collation and Assessment of Literature Data	723
12.5	Palladium	723
12.6	Silver	725
12.6.1	Selection of Thermochemical Data	725
12.6.1.1	Temperature Dependence	725
12.6.1.2	Ionic Strength Dependence	727
12.6.1.3	Thermodynamic Parameters	728
12.6.2	Collation and Assessment of Literature Data	728
12.6.3	Speciation	730
12.7	Cadmium	730
12.7.1	Selection of Thermochemical Data	730
12.7.1.1	Ionic Strength Dependence	730
12.7.1.2	Thermodynamic Parameters	733
12.7.2	Collation and Assessment of Literature Data	736

- 12.8 Iridium 736
- 12.9 Platinum 739
- 12.10 Gold 740
 - 12.10.1 Gold(I) 740
 - 12.10.2 Gold(III) 740
- 12.11 Mercury 741
 - 12.11.1 Mercury(I) 741
 - 12.11.2 Mercury(II) 742
 - 12.11.2.1 Selection of Thermochemical Data 742
 - 12.11.2.2 Collation and Assessment of Literature Data 745
 - References 751

- 13 Aluminium, Gallium, Indium and Thallium 757**
 - 13.1 Aluminium 757
 - 13.1.1 Introduction 757
 - 13.1.2 Selection of Thermochemical Data 758
 - 13.1.2.1 Temperature Dependence 758
 - 13.1.2.2 Ionic Strength Dependence 764
 - 13.1.2.3 Thermodynamic Parameters 776
 - 13.1.3 Collation and Assessment of Literature Data 776
 - 13.1.4 Speciation 795
 - 13.2 Gallium 797
 - 13.2.1 Introduction 797
 - 13.2.2 Selection of Thermochemical Data 798
 - 13.2.2.1 Temperature Dependence 798
 - 13.2.2.2 Ionic Strength Dependence 803
 - 13.2.2.3 Thermodynamic Parameters 806
 - 13.2.3 Collation and Assessment of Literature Data 806
 - 13.2.4 Speciation 812
 - 13.3 Indium 812
 - 13.3.1 Introduction 812
 - 13.3.2 Selection of Thermochemical Data 813
 - 13.3.2.1 Ionic Strength Dependence 813
 - 13.3.2.2 Thermodynamic Parameters 816
 - 13.3.3 Collation and Assessment of Literature Data 816
 - 13.4 Thallium 817
 - 13.4.1 Introduction 817
 - 13.4.2 Thallium(I) 817
 - 13.4.2.1 Selection of Thermochemical Data 817
 - 13.4.2.2 Collation and Assessment of Literature Data 822
 - 13.4.3 Thallium(III) 822

- 13.4.3.1 Selection of Thermochemical Data 822
- 13.4.3.2 Collation and Assessment of Literature Data 825
- References 827

- 14 Tin and Lead 835**
- 14.1 Introduction 835
- 14.2 Tin 836
- 14.2.1 Tin(II) 836
- 14.2.1.1 Selection of Thermochemical Data 836
- 14.2.1.2 Collation and Assessment of Literature Data 838
- 14.2.1.3 Speciation 840
- 14.2.2 Tin(IV) 840
- 14.3 Lead 843
- 14.3.1 Lead(II) 843
- 14.3.1.1 Selection of Thermochemical Data 843
- 14.3.1.2 Collation and Assessment of Literature Data 855
- 14.3.1.3 Speciation 862
- 14.3.2 Lead(IV) 866
- References 868

- 15 Bismuth and Polonium 873**
- 15.1 Introduction 873
- 15.2 Bismuth 874
- 15.2.1 Selection of Thermochemical Data 874
- 15.2.1.1 Temperature Dependence 874
- 15.2.1.2 Ionic Strength Dependence 876
- 15.2.1.3 Thermodynamic Parameters 882
- 15.2.2 Collation and Assessment of Literature Data 882
- 15.2.3 Speciation 884
- 15.3 Polonium 884
- 15.3.1 Polonium(II) 884
- 15.3.2 Polonium(IV) 888
- 15.3.2.1 Thermodynamic Parameters 889
- References 890

- 16 Prediction of Stability and Solubility Constants 893**
- 16.1 Theory 893
- 16.2 Prediction of Hydrolysis Stability Constants 894
- 16.3 Prediction of Solubility Constants of Oxide and Hydroxide Phases 901
- 16.4 Prediction of Stability Constants for Monomeric Species of Higher Stoichiometry 904
- 16.5 Prediction of Constants at Temperatures other than 25 °C 905

16.6	Application of the UTMIC in Assessment of Stability/Solubility
	Constant Data 906
	References 907
Appendix	Extended Specific Ion Interaction Theory: Ion Interaction
	Coefficients 909
	Index 911
