

# Inhaltverzeichnis

**Key Note**

**1 5G – Realization of an Open Multi-Service Framework ..... 7**  
Hans-Peter Mayer (Nokia, Bell Labs)  
(Eingeladener Vortrag)

**Sitzung 1: Next Generation Mobile Networks**

**2 Cognitive Management of Multi-Service, Multi-Tenant 5G Mobile Networks ..... 8**  
Christian Mannweiler, Henning Sanneck (Nokia Bell Labs, München)

**3 112 eCall – Lessons Learnt and Next Steps ..... 14**  
Ralf Weber (Qualcomm CDMA Technologies, Nürnberg), Nikolai Leung (Qualcomm Inc., San Diego, USA)

**Key Note**

**4 5G Communications: Development and Prospects ..... 20**  
David Soldani (Huawei)  
(Eingeladener Vortrag)

**Sitzung 2: Funkzugang**

**5 Zentrales Koexistenzmanagement für den zuverlässigen Betrieb von industriellen Funkanwendungen ..... 21**  
Marko Kraetzig, Lutz Rauchhaupt (Institut für Automation und Kommunikation, Magdeburg)

**6 Smart-Meter-Anwendungen über LTE-Mobilfunknetze: Stand der Technik, Migrationspfade und Potenzial neuer Endgeräte-Kategorien ..... 26**  
Christian Lüders (FH Südwestfalen)

**7 Experimental Results For the Propagation of Outdoor IEEE802.11 Links ..... 32**  
Michael Rademacher, Markus Kessel, Karl Jonas (HS Bonn-Rhein-Sieg)

**Sitzung 3: LTE Evolution**

**8 On D2D-Communication for Resource Efficient Data Transmission of Delay Critical Services ..... 38**  
Jens Mückenheim (Hochschule Merseburg), André Puschmann, Dariush M. Soleymani, Elke Roth-Mandutz, Abubaker M. Waswa, Andreas Mitschele-Thiel (Technische Universität Ilmenau)

**9 End-user Benefits of LTE Dual Connectivity in Heterogeneous Networks ..... 44**  
John Camilo Solano Arenas, Torsten Dudda (Ericsson), Johannes Schmitz, Rudolf Mathar (RWTH Aachen)

**10 On the Accuracy of Flight Data Records for Aircraft Mobility Modelling ..... 49**  
Maciej Mühleisen, Christoph Petersen, Daniel Auge, Andreas Timm-Giel, Volker Gollnick (TU Hamburg-Harburg), Florian Linke (German Aerospace Center)

|                 |                                                                                                                |
|-----------------|----------------------------------------------------------------------------------------------------------------|
| <b>Key Note</b> |                                                                                                                |
| <b>11</b>       | <b>Industrie 4.0 meets 5G</b> ..... <b>54</b><br>Hans Schotten (DFKI Kaiserslautern)<br>(Eingeladener Vortrag) |

**Sitzung 4: Sicherheit und Smart Grids**

|           |                                                                                                                                                      |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>12</b> | <b>Secure Erasure and Code Update in Legacy Sensors</b> ..... <b>55</b><br>Ghassan O. Karame, Wenting Li (NEC Laboratories Europe)                   |
| <b>13</b> | <b>Informationstechnische Infrastruktur der Energienetze</b> ..... <b>57</b><br>Georg Sven Lampe (ENERTRAG), Stephan Massner (Ingenieurbüro Massner) |

**Sitzung 5: WiFi – Alternative oder integraler LTE-Bestandteil?**

|           |                                                                                                                                                                                                                                                                                 |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>14</b> | <b>A Token-Based MAC For Long-Distance IEEE802.11 Point-To-Point Links</b> ..... <b>63</b><br>Michael Rademacher, Martin Chauchet, Karl Jonas (HS Bonn-Rhein-Sieg)                                                                                                              |
| <b>15</b> | <b>Real Time Workload Monitoring for WLAN</b> ..... <b>69</b><br>Christoph Fischer, Jörg Schneider (DFKI, Kaiserslautern), Hans D. Schotten (TU Kaiserslautern)                                                                                                                 |
| <b>16</b> | <b>Performance Evaluation of Mobile Wi-Fi-based M2M Data Traffic Multiplexing</b> ..... <b>74</b><br>Yasir Mehmood, Carmelita Görg (UNI Bremen), Muhammad Tariq Afridi, Safdar Nawaz Khan<br>Marwat, Jebran Khan (University of Engineering and Technology, Peshawar, Pakistan) |

**Sitzung 6: Software Defined Networking**

|           |                                                                                                                                                                                                                            |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>17</b> | <b>Untersuchung von Wireless Mesh Network-Routing-Protokollen für den Einsatz in Netzen für Katastrophengebiete</b> ..... <b>79</b><br>Auberlin Paguem, A. Lehmann, Ulrich Trick (Frankfurt University of Applied Science) |
| <b>18</b> | <b>Mechanisms for the Automated Setup of Software-Defined Networks</b> ..... <b>85</b><br>Olaf Gebauer, Jannis Ohms, Diederich Wermser (Ostfalia Hochschule)                                                               |

**Sitzung 7: Mobile Mehrwertdienste**

|           |                                                                                                                                                                                                                                                                                                        |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>19</b> | <b>Localization of Objects in Cyber Physical Production Systems for Industry 4.0 via Heterogeneous Camera Environments</b> ..... <b>91</b><br>Daniel Fraunholz, Joerg Schneider, André Wendling, Hans D. Schotten (DFKI)                                                                               |
| <b>20</b> | <b>Monitoring and Testing for Reliable Smart City Applications</b> ..... <b>96</b><br>Thorben Iggena, Daniel Kümper, Marten Fischer, Ralf Tönjes (HS Osnabrück)                                                                                                                                        |
| <b>21</b> | <b>A Novel Description Language for Value-Added Services to enable Automated Functional Testing</b> ..... <b>102</b><br>Patrick Wacht, Ulrich Trick (Frankfurt University of Applied Science), Woldemar Fuhrmann<br>(Darmstadt University of Applied Sciences), Bogdan Ghita (Plymouth University, UK) |
