

Table of Contents

Preface and Introduction	viii
Preface	viii
Acknowledgments	ix
How the Book Is Structured	x
1 Software: How Does Capture One Work?	1
1.1 Basic Concepts and Features	2
1.2 Which Version Do I Need?	5
1.3 An Overview of the Rendering Pipeline	8
1.4 Color Management and ICC/ICM Profiles	12
1.5 All about Panels, Tabs, and the Capture One Interface in General.	17
1.6 Default Settings for Cameras	26
1.7 Program Preferences	27
1.8 Global Tools	31
2 Hardware	39
2.1 The Oldest Question in the Book: Mac or PC?	39
2.2 Choosing the Right Hardware	41
2.3 Using Capture One with Multiple Computers or on a Network ...	43
2.4 Graphics Tablets and Other Input Devices	45
2.5 ICC Profiles: The Importance of Profiling Your Monitor	48
3 The Workflow Pipeline	50
4 The Library Tool Tab	52
4.1 Catalog, Session, or Both?	52
4.2 Default Folders and Folder Structures	56
4.3 The EIP File Format	59
4.4 Importing Images and Basic Organization	62
4.5 User Collections and Folders	68
4.6 Filters	73
4.7 Smart Albums	79
4.8 From a Session to a Catalog and Vice Versa	82
4.9 XMP Files and Metadata	85
4.10 On the Safe Side: Backups and Integrity Checks	86
4.11 Importing Catalogs from Lightroom, Media Pro, and Aperture.	88
5 The Color Tool Tab	92
5.1 Base Characteristics: Rendering Engines, ICC Profiles, and Curves.	92
5.2 Histograms: Evaluate and Understand	95
5.3 White Balance	98

5.4	Color Balance	102
5.5	Black & White	110
5.6	The Color Editor	121
6	The Exposure Tool Tab	129
6.1	The Basics: Contrast, Saturation, Brightness, and Exposure	130
6.2	HDR	130
6.3	Understanding Levels and Curves	133
6.4	The Clarity Tool	139
6.5	The Vignetting Tool	141
7	The Lens Correction Tab	142
7.1	Lens Corrections and Profiles	142
7.2	The Movement Tab	145
7.3	Purple Fringing	146
7.4	LCC Profiles—For More than Just Lens Correction	147
8	The Composition Tool Tab	155
8.1	Crop, Aspect Ratio, Grids, and Guides	156
8.2	Rotate, Flip, and Straighten	162
8.3	Keystone	164
8.4	Overlay	170
9	The Details Tool Tab	174
9.1	The Navigator and the Focus Tool	175
9.2	Input Sharpening	176
9.3	Noise Reduction	183
9.4	Single Pixel	185
9.5	Enhanced Noise Reduction: Details and Film Grain	186
9.6	Eliminating Moirés	194
9.7	Dusty Sensors and Spot Removal	195
10	The Local Adjustments Tool Tab	202
10.1	Adjustment Layers and Masks	203
10.2	Clone and Heal Layers	211
11	The Adjustments Tool Tab	214
11.1	Styles and Presets: Basics and Differences	214
11.2	Saving, Copying, and Applying Presets and Styles	216
11.3	Organizing Styles and Presets	223
12	The Metadata Tool Tab	228
12.1	Applying, Copying, and Deleting Metadata	229
12.2	Working with Hierarchical and Nonhierarchical Keywords	233
12.3	Metadata Compatibility and Third-Party Applications	237

13 The Output and Batch Tool Tabs	240
13.1 Creating and Managing Output/Process Recipes	241
13.2 The Process Recipe Tool	242
13.3 Output Location	244
13.4 Output Naming	245
13.5 The Batch Tool Tab: Queue and History.....	245
 14 Tethered Shooting	 247
14.1 Getting Started.....	248
14.2 All About Tethered Sessions	250
14.3 Capture Location, Collections, and Naming.....	252
14.4 Applying Automatic Adjustments during Capture	253
14.5 Camera Control.....	255
14.6 Capture Pilot: Not Just for Studio Use.....	257
 15 Using Capture One with Third-Party Software.....	 261
15.1 Image Databases and DAM Systems	261
15.2 Plug-ins, Photoshop, and Other Raw Developers	265
15.3 Using AppleScript	268
 Appendix	 273
A.1 The Workflow Pipeline.....	273
A.2 Other Sources	276
 Index	 277
