

Contents

1	Historical Background — 1
1.1	Consolidation of Space Flight — 3
1.2	Questions for Further Studies — 4
2	Basic Principles — 5
2.1	Solar System — 5
2.2	Atmosphere of the Earth — 6
2.3	Distances and velocities — 7
2.3.1	Linear Velocity — 8
2.3.2	Angular velocity — 8
2.4	Laws of Conservation of Energy and Momentum — 9
2.5	Theoretical Basics of Orbit Mechanics — 12
2.5.1	Ballistic Trajectories — 16
2.5.2	Circular Orbits — 18
2.5.3	Elliptical Orbit — 25
2.5.4	Parabolic Trajectories — 29
2.5.5	Hyperbolic Trajectories — 31
2.5.6	Trajectory Changes — 33
2.5.7	Atmospheric Braking Manoeuvre — 39
2.5.8	Multiple-body Problems — 40
2.6	Attitude Control and Stabilisation — 46
2.6.1	Three-Axis Stabilisation — 48
2.6.2	Spin Stabilisation — 48
2.6.3	Gravitational Gradient Stabilisation — 49
2.6.4	Magnetic Stabilisation — 51
2.7	Questions for Further Studies — 52
3	Propulsion Systems — 53
3.1	Rocket Equation — 54
3.2	Air-Breathing Propulsion Systems — 55
3.3	Chemical Propulsion Systems — 56
3.3.1	Solid Propulsion Systems — 60
3.3.2	Liquid Propulsion Systems — 61
3.3.3	Hybrid Propulsion Systems — 67
3.3.4	Tribrid Propulsion Systems — 67
3.4	Physical Propulsion Systems — 68
3.4.1	Cold Gas Propulsion Systems — 68
3.4.2	Electric Propulsion Systems — 69
3.4.3	Thermonuclear Propulsion Systems — 76

3.4.4	Photon Propulsion Systems — 78
3.5	Questions for Further Studies — 80
4	Missions — 81
4.1	Velocity demand — 82
4.2	Questions for Further Studies — 86
5	Energy Sources — 87
5.1	Batteries — 89
5.2	Fuel Cells — 89
5.3	Solar Cells — 95
5.4	Thermonuclear Energy Sources — 96
5.5	Thermoelectric Modules — 97
5.6	Questions for Further Studies — 98
6	Energy Storages — 99
6.1	Mechanical Flywheels — 99
6.2	Electrochemical Storages — 99
6.3	Chemical Propellants — 100
6.4	Questions for Further Studies — 100
7	Materials and Lubricants — 101
7.1	Mechanical properties — 101
7.2	Lubrication properties — 103
7.3	Materials Used in Space — 103
7.4	Commodity Prices — 104
7.5	Questions for Further Studies — 104
8	Processes — 105
8.1	Manufacturing processes — 106
8.2	Verification Processes — 109
8.3	Testing Processes — 110
8.4	Test philosophy — 111
8.5	Questions for Further Studies — 112
9	Products — 113
9.1	Launch Vehicles — 114
9.1.1	Saturn V — 114
9.1.2	Ariane 5 launch vehicle — 117
9.1.3	Ariane 6 Launch Vehicle — 119
9.1.4	Space Transportation System — 122
9.1.5	Space Launch System — 127

9.1.6	Other launcher systems —	131
9.2	Satellites and Probes —	132
9.2.1	Hubble Space Telescope —	132
9.2.2	Cassini Space Probe —	135
9.2.3	Apollo Modules —	136
9.3	Chemical Propulsion Systems —	139
9.4	Re-entry Bodies —	140
9.5	Single-Stage-To-Orbit vehicles —	142
9.6	Fully re-usable Vehicles —	143
9.7	Re-entry Vehicles —	144
9.8	Expendable 1st / 2nd Stage Vehicles —	144
9.9	Questions for Further Studies —	148
10	Projects and Payloads —	149
10.1	Commercial Projects —	151
10.2	Scientific Projects —	152
10.3	Military Projects —	153
10.4	Questions for Further Studies —	156
11	Launch Sites —	157
11.1	Baikonur Spaceport —	158
11.2	Kennedy Space Center —	160
11.3	Guiana Space Centre —	161
11.4	Questions for Further Studies —	162
12	Environmental and Boundary Conditions —	163
12.1	Environmental Conditions —	163
12.2	Boundary Conditions —	165
12.3	Visibility of Satellites —	168
12.4	Questions for Further Studies —	170
13	Conclusions and Outlook —	171
13.1	Commercialisation of Aerospace Industry —	172
13.2	Scenario for Manned Space Flight to Mars —	173
13.3	Fundamentals of a Manned Mission to Mars —	173
13.4	Possible Trajectories to Mars —	174
13.5	Landing on Mars —	179
13.6	Plannings and Projects —	179
13.6.1	ExoMars Programme —	180
13.6.2	Mars Sample Return Mission —	183
13.7	Estimating Masses and Costs —	184
13.8	Conclusions —	187

X — Contents

13.9 Questions for Further Studies — 188

14 Appendix — 189

14.1 Acronyms and Abbreviations — 189

14.2 Prefixes and Quantities — 196

14.3 Formulary of Classical Orbital Mechanics — 198

14.4 Formulary of Rocket Flights — 204

14.5 Websites — 205

14.6 Credits for Illustrations — 207

Further Reading — 209

Index — 211
