|----------|-----------------------------------------------------------------------|------------|
| <b>1</b> | <b>Introduction</b>                                                   | <b>9</b>   |
| 1.1      | State of the art . . . . .                                            | 10         |
| 1.2      | Objective of the thesis and main results . . . . .                    | 14         |
| 1.3      | Preliminaries . . . . .                                               | 19         |
| <b>2</b> | <b>Matrix representation of the operators</b>                         | <b>23</b>  |
| 2.1      | Laguerre weights . . . . .                                            | 24         |
| 2.2      | Gegenbauer weights . . . . .                                          | 25         |
| 2.3      | Hermite weights . . . . .                                             | 28         |
| <b>3</b> | <b>Best constants for integral differences</b>                        | <b>35</b>  |
| 3.1      | Integral differences in the Laguerre and Gegenbauer setting . . . . . | 36         |
| 3.2      | The Hermite case . . . . .                                            | 37         |
| <b>4</b> | <b>The nonintegral case</b>                                           | <b>45</b>  |
| 4.1      | General considerations . . . . .                                      | 45         |
| 4.2      | The Laguerre case . . . . .                                           | 54         |
| 4.3      | The Gegenbauer case . . . . .                                         | 58         |
| 4.4      | The Hermite case . . . . .                                            | 61         |
| <b>5</b> | <b>Integral operators</b>                                             | <b>65</b>  |
| 5.1      | The Laguerre case . . . . .                                           | 69         |
| 5.2      | The Gegenbauer case . . . . .                                         | 77         |
| 5.3      | The Hermite case . . . . .                                            | 85         |
| 5.4      | Schatten class operators . . . . .                                    | 95         |
| <b>6</b> | <b>Conclusion and outlook</b>                                         | <b>107</b> |
|          | <b>References</b>                                                     | <b>113</b> |
